FORTY-FOURTH ANNUAL REPORT

OF THE

Board of Managers of the Thomas Asylum for Orphan  
and Destitute Indian Children.

---

BUFFALO, N. Y., *October 1, 1899.*

*To the Legislature of the State of New York:*

Gentlemen.—By order of the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children at Iroquois, N. Y., I have the honor to forward their report for the year ending September 30, 1899, with its accompanying papers.

Very respectfully,

HENRY R. HOWLAND,

*President.*

## FORTY-FOURTH ANNUAL REPORT

OF THE

### Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children.

---

#### *To the Legislature:*

In compliance with the statute, the board of managers of the Thomas Asylum for Orphan and Destitute Indian Children beg leave to present their report for the fiscal year ending September 30, 1899.

At the opening of the year there were 116 children enrolled at the asylum. Of these, six have been transferred to the United States Government School at Carlisle, Pa.; three have been placed in the Western New York Home, at Randolph, N. Y.; two have been placed with private families, and seven have been returned to parents or guardians. Fourteen children have been admitted, so that we now have a total of 112 upon our rolls.

Healthful conditions have prevailed at the asylum during the year; the superintendence has been excellent, the discipline kindly but well maintained; a generous dietary, good and suitable clothing, abundant outdoor exercise and work, all have contributed to the happiness and well-being of these dependent children.

There has been no serious sickness at any time, and the occasions are rare when even a single child fails to report at roll-call

or at meal-time. A "good digestion waits on appetite and health on both."

The near completion of the new dining-room building, with its assembly hall, will fill a much needed requirement, and add much to the comfort of the children and their care-takers.

The school work of the year has been commendable and the special training in sloyd as well as the systematic instruction in sewing is not only enjoyed by the children, but serves a valuable purpose in the co-ordinate development of mind and hand. Better facilities for industrial training are much needed, and it is hoped may soon be supplied.

It is to be regretted that the large advances in costs of building materials and of labor in the spring and summer of the present year were such as to make it impossible to build the schoolhouse and the two dormitories for girls, for which the appropriation of last winter was intended to provide. The present accommodations are inadequate, and we trust that suitable provision may be made for these buildings by your generous action, and that an appropriation may be made for grading and fencing, for moving the horse barn and for building a new piggery, as suggested in the superintendent's report.

The success of the gas well bored this season, effecting a saving already of at least \$500 per annum, leads us to suggest that if another of like capacity were opened, its flow and the unused surplus from the present well would suffice for firing our boilers and would make a further annual saving of about \$1,800, now expended for steam coal.

It is with sincere regret and with a deep sense of personal loss that we report the death during the past year of two members of our board, Mrs. Lily Lord Tift, who died December 28, 1898, and

Mr. King Tallichief, whose death, the result of an accident, occurred July 8, 1899.

Mrs. Tift, who had been a member of the board for many years, was widely known and beloved for her deep and practical interest in helpful humanitarian and educational work. Her presence on this board was at all times a help and a cheerful encouragement to the management of the asylum. Her judgment was clear and wise. She loved these Indian children, and their faces brightened at her frequent visits with a quick recognition of her affection and with its hearty return. Her healthful influence has so impressed itself upon the institution that its effect cannot be lost or forgotten.

Mr. King Tallichief was in the prime of vigorous life when suddenly called from among us. He was a full-blooded Seneca Indian, a member of the Seneca Council, having at one time been its secretary, and a representative of that which is best in his race. He was manly, industrious, ambitious, in the best sense of the word, and progressive; respected by all who knew him for his upright and honorable character. In his untimely death the Seneca Nation has suffered a great loss, and his associates on this board cherish his memory with a genuine regard.

The superintendent's report, which is annexed, marked Appendix B, will be found of much interest as outlining the nature and scope of the excellent work which the State is doing here, and its suggestions are of timely value.

The report of the treasurer, Hon. H. M. Blasdell, marked Appendix A, is respectfully submitted, also the report of the attending physician, A. D. Lake, M. D., marked Appendix C.

In Appendix D is given the names and nationalities of the children, with the name of the reservation from which each was

received. Appendix E gives a statement of the real and personal property of the institution.

## SUPERINTENDENT'S REPORT.

*To the Board of Managers of Thomas Asylum for Orphan and Destitute Indian Children:*

Complying with the rules and regulations of this institution I beg leave to present the following report of the administration of this institution for the fiscal year ending September 30, 1899:

### CHANGES IN THE POPULATION.

Number of pupils in the institution at this date:

Girls. . . . .	61
Boys. . . . .	51
	<hr/>
	112
	<hr/> <hr/>

### RECEIVED DURING THE YEAR.

Girls. . . . .	2
Boys. . . . .	6

### READMITTED.

Girls. . . . .	4
Boys. . . . .	2

Total received and readmitted. . . . . 14

---

---

### DISCHARGED.

Girls. . . . .	3
Boys. . . . .	4

## TRANSFERRED TO CARLISLE.

Girls. . . . .	3
Boys. . . . .	3

## TRANSFERRED TO RANDOLPH.

Girls. . . . .	3
Boys. . . . .	..

## PLACED IN FAMILIES.

Girls. . . . .	2
Boys. . . . .	..

Total. . . . .	18
----------------	----

---

---

During the vacation season several children were placed in families, or, rather, given an opportunity to earn a little pin money. They returned to the institution at the opening of the school. The outing system is beneficial to these children. It gives them an opportunity to earn a little money and to learn the ways and manner of living of the white people. Our children are so young that we do not deem it wise to place them in families permanently. All of them are of the school age, and they should be required to attend school at least until they have passed the examinations that were recently adopted.

## SCHOOL.

Our school has been working under the graded system which was adopted last year and the results are entirely satisfactory. In June we held our first commencement exercises. Two of our boys, Commodore Doxtator and Amos George, having completed the course, were given diplomas and have been transferred to Carlisle. These commencement exercises were an interesting feature of the school year. A large number of people were in

attendance from the reservation, surrounding country and adjacent villages, many of them driving a long distance to be present. In these exercises we aimed to show the work accomplished in the different grades or branches of the school. They consisted of songs from the kindergarten children, recitations and a cantata given by the older pupils, and addresses from Mr. Wright, of the State Department of Public Instruction, and Mr. Howland, president of this board. Mr. Wright came a long distance, at considerable sacrifice on his part, and I wish to take this opportunity of publicly thanking him for his very able address, personally and on behalf of the children of this institution and the people that were present.

There has been no abatement in the effort for advancement in any department of our school; on the contrary a stronger determination to place the school on an equal footing with other institutions of learning has been evidenced on the part of the teachers, and the children have shown a greater interest in the work. The kindergarten is maintaining its popularity and efficiency. The sloyd or manual training department, our latest acquisition, has fully met our expectations. Both boys and girls have been instructed in this branch, and they show a degree of proficiency and aptitude that is extremely encouraging. Their work has been neatly and accurately executed and many useful and ornamental articles have been manufactured. This is certainly a popular branch of the school. The children enjoy it and take great interest in it. This teacher also gives instruction in plain and fancy sewing which is interesting and helpful.

Indian children are especially fond of music. They learn to sing readily as well as to play upon musical instruments, hence music is one of the strong features of the institution. All have

received vocal instruction and a large percentage receive instrumental lessons. Many of them have sweet voices and our choir or glee club is always entertaining and receives many compliments. On the whole the year just passed has been an exceedingly profitable school year.

#### FARM AND GARDEN.

The farm is under a good state of cultivation and large crops have been harvested. A good supply of hay, corn and oats has been stored for the general use of the farm and an abundant supply of potatoes and other vegetables, such as beets, carrots, turnips and cabbages has been raised and is now stored in the cellar for the general use of the institution. As usual a large part of the work on the farm and garden has been done by the boys under the supervision of competent employees. This of itself is a practical education for the boys and will be of much benefit to them when they leave the institution and begin earning their own livelihood.

The health of the children has been exceedingly good. No deaths have occurred and there has been no serious sickness. The robust and healthy appearance of the children is undisputed evidence that the dietary has been ample and wholesome and that the clothing furnished has been sufficient.

I wish again to urge upon you the importance of establishing in the near future a complete system of industrial training. Too much can not be said in favor of this branch of education for these Indian boys. It will do more towards preparing them for citizenship and fitting them to cope with the outside world than anything else. It is not practicable even if it were possible, to train them for a professional life. What they actually need is to be fitted to work side by side with their white brothers in any

of the trades. They should be taught farming, carpentry, masonry and blacksmithing. This can be done and when this is accomplished the serious side of the Indian question has been successfully met.

A building designed for industrial training should be provided and fully equipped so that instruction can be given in all of the trades mentioned.

The new dining hall, although not yet complete, is occupied in part. It is a convenient and well arranged building and will fully meet the needs and requirements of the institution. The assembly hall or chapel in this building when finished and furnished will supply a much needed improvement.

This building and the administration building are substantial structures. They are a decided contrast to the old frame buildings and demonstrate very forcibly the necessity of providing the other buildings indicated in the group as adopted by the State Board of Charities.

The gas well drilled under the appropriation granted for that purpose by the Legislature of 1899, while not so large as we had hoped for, is very satisfactory and will prove to be a wise investment. It is being used to heat the hospital building, in both kitchen ranges, the laundry stoves and for lighting in several places when same is needed after the electric system has been shut down. It has displaced entirely the use of hard coal in those places and will effect a saving of about \$500 per year. Gas was found at a depth of 1,111 feet. The flow is about 70,000 feet per day with a pressure of about 300 pounds.

The farm fences need extensive repairs. It will require an expenditure of about \$600 for this purpose. The horse barn also needs many repairs and it should be moved to another location

so as not to be in such close proximity to the dormitory buildings. It is estimated that these changes will cost about \$600. A new pig pen is an imperative necessity. The present one is altogether too small for the needs of the institution and is beyond repair. The old barn, known as the east barn, can be moved and converted into a comfortable piggery at the expense of about \$600. Appropriations for these purposes and also an amount of not less than \$1,500 for grading and incidental expenses in connection with the rearrangement of the grounds and buildings should be granted by the coming Legislature.

The friendly and pleasant relationship existing in the past between the officers and employees has continued through this year. This earnest co-operation has aided us materially in raising the institution to its present state of efficiency. The instruction, guidance and the support that you as a board have given us has been duly appreciated.

Respectfully submitted,

GEORGE I. LINCOLN,

*Superintendent.*

# Appendix C.

---

## REPORT OF THE ATTENDING PHYSICIAN.

*To the Board of Managers:*

I beg to submit herewith my annual report as attending physician.

The following named cases have been under treatment during the year:

Acute dyspepsia .....	7
Acute rheumatism .....	1
Ague .....	1
Amputation .....	1
Caries of spine .....	1
Conjunctivitis .....	5
Eczema .....	2
Fracture .....	2
Goitre .....	1
Influenza .....	3
Inflammation, middle ear.....	2
Ivy poisoning .....	2
Pneumonia .....	2
Tuberculosis of bone.....	2
Tuberculosis of glands.....	2
Tonsillitis .....	1
Typhoid fever .....	5

---

---

None of the sickness has been of a severe character and no deaths have occurred.

It is with a sense of much satisfaction that I am able to say that during my connection, of many years, with the institution, no year has been attended with such good health to all the inmates as the year just past, I am sure it would be difficult to locate the same number of people elsewhere who have suffered from so little sickness as those living here.

The excellent results following the system employed in our institution is a splendid illustration of the great good which may be attained in the preservation of health by the application of established hygienic rules.

The beneficiaries who are cared for here come to us with a strong inherited tendency to certain constitutional diseases. Many of them are of low vitality when received, with the conditions which would surround them, if left among their own people, they would speedily succumb.

With the good care, food and physical training they receive here, they rapidly improve, and in most instances when they leave the institution are vigorous young men and women.

One important factor in the present good health I think is due to the increased capacity of the dormitories, made possible by the completion of the two new buildings. The air space is still, however, much too limited and it seems to me that the erection of the new buildings intended for dormitory purposes is urgently demanded.

With these buildings completed and in use, our sanitary condition will be unexcelled.

Very Respectfully,

A. D. LAKE,

*Attending Physician.*

Gowanda, N. Y., October 9, 1899.

## **FORTY-FIFTH ANNUAL REPORT**

**OF THE**

### **Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children.**

---

*To the Legislature:*

In compliance with the statute the board of managers of the Thomas Asylum for Orphan and Destitute Indian Children beg leave to present their report for the fiscal year ending September 30, 1900.

At the opening of the year there were 112 children on the rolls of the Asylum. During the year 7 boys and 15 girls have been received; 1 girl has been transferred to Carlisle, 6 boys and 1 girl have been returned to parents and guardians or have been discharged, leaving at the close of the fiscal year 126 children in the Asylum, 52 of whom are boys and 74 girls. Favorable conditions as to the health and happiness of the children under our charge have prevailed throughout the year. There has been no serious sickness, except in the case of one boy who has been transferred to the Buffalo State Hospital. The children have been well clothed and most careful attention has been given to providing for them a generous and healthy dietary; the superintendence has been watchful and praiseworthy, kindly relations have existed between the officers, the employees and the beneficiaries. As will be seen by the attending physician's report, he again calls attention to the remarkable decrease in the number of cases of consumption, a result that has been effected

by a proper attention to sanitary conditions, to proper food, clothing and healthful exercise.

During the year the new dining-room building was completed and its much needed accommodations have added materially to the comfort of all concerned.

The new buildings which have been begun during the year are now in progress and their completion will fill a much desired want. While waiting for the completion of the new school building it has been necessary to provide for the school work in one of the old dilapidated buildings, which it was hoped might have been sooner abandoned. The new dormitories now being erected will provide for the girls, and we respectfully ask that similar and suitable provision be made for new dormitories for the boys, for the new power-house and its equipment, for connections between the buildings, for grading and for converting an old nursery building into a laundry. Another gas well is also much needed. We commend to your consideration the report of the superintendent, which is annexed and marked Appendix B. It contains many interesting details regarding the work among these Indian children, the result of a careful study of their characteristics and capabilities. The suggestions made by him are based upon the experience and observation of several years and are worthy of your careful thought and action. Especially are these statements and suggestions valuable as they relate to the school and training work at this institution, the ultimate purpose of which is to prepare these dependent children to become self-reliant and capable of self-help when they reach manhood and womanhood.

The report of the treasurer, Hon. H. M. Blasdell, marked Appendix A, is respectfully submitted. The report of the attending physician is marked Appendix C.

Appendix D gives the names and nationalities of the children, showing the reservation from which each has been received.

Appendix E gives a statement of the real and personal property of the institution,

HENRY R. HOWLAND,

*President.*

### **SUPERINTENDENT'S REPORT.**

*To the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children:*

I present, herewith for your consideration, my report as superintendent for the fiscal year ending September 30, 1900:

The population of the institution has increased 14 during the year. There were 112 pupils in the institution at the close of the last fiscal year, of whom 61 were girls and 51 were boys. At the close of this fiscal year, there are 126 pupils, of which 74 are girls and 52 are boys. The several reservations of the State are represented as follows: Allegany 13, Cattaraugus 45, Oneida 10, Onondagas 24, Tonawanda 13, Tuscarora 12, St. Regis 7, Shinnecock 2.

It is a satisfaction for me to be able to report that there has been a decided decrease in the per capita cost of the institution during the past year. This is more gratifying when we stop to consider that the cost of all supplies that are needed for the maintenance of the institution has increased materially and in addition to this, we have had considerable additions in the way of new buildings that have had to be warmed and cared for.

It is unfortunate that the institution is located so far from railroad facilities. It being about four miles from Lawtons, our nearest railroad station. This distance, however, could be shortened at least a mile by the laying out of a new highway between the institution and the railroad station and besides this a more

favorable grade can be secured, in fact nearly all of the disagreeable hill that we are compelled to go up and down at present, can be avoided. This change means much to the institution by way of a saving in expenses. In the item of coal alone, it means a saving of over twelve hundred miles of haul in one year's supply. I believe this new highway can be built for about \$5,000, and I recommend that the Legislature be requested to grant an appropriation of this amount.

The advancement in the several branches and grades of the school, while not so great as we had hoped for and anticipated, owing to the inadequate quarters and facilities caused by the abandonment of the old school building that had to give way for the new school building and the new dormitory buildings, has been very satisfactory. With the completion and occupancy of the new school building and with modern text and reference books, a good library and other necessary equipment, there is much for encouragement. Two of our boys, James Green and Bennett Gordon, were able to pass the required examinations and graduated. These exercises were witnessed by a large number of people and were an interesting feature of the school year. We were fortunate in having with us at these exercises a representative of the Department of Public Instruction, Mr. Charles T. Andrews, who gave us an entertaining and instructive address. This address was thoroughly enjoyed by all and I wish at this time to publicly thank Mr. Andrews and the Department of Public Instruction.

The special branches of the school, kindergarten and music, have received their usual attention. The kindergarten is both interesting and instructive and continues to grow in favor. Great advancement has been made in music, both instrumental and

vocal. Some of the pupils have reached a state of efficiency hardly expected even by the most sanguine. This branch of the school work is unquestionably the most popular of any and its influence is elevating and refining, and it furnishes a great deal of pleasure and amusement to the pupils, to the teachers and to the employes.

The Sloyd department has been vacant owing to the fact that Miss Rosenberg, the Sloyd instructor, resigned her position at the close of last year and we were unable to secure any one at the low salary fixed by the Commission.

One of the pressing demands of the institution is a building in which the trades may be taught. This building I consider the most important of any, for industrial training is the essential training for these Indian boys. They need to be taught the trades so that they may have some incentive to go out into the world, away from the reservation and reservation influence and be men among men, self-respecting and self-supporting. This is not a work of to-day, but for the future. These children are being prepared for fields of usefulness and citizenship and the means and facilities for giving them an education or training, that is conceded by all to best fit them for citizenship, should be granted as speedily as possible, and in this connection I think I may be permitted to say that I believe the time is now ripe for the agitation of the question of citizenship for the Indians of the State.

I have long been of the opinion that we should give more instruction in farming and gardening than we have done in the past. This industry has not received the attention that its importance demands, owing to the common and mistaken notion that no special training is necessary for this line of work. Public sentiment, I am pleased to state, is changing and it is now recognized by those that have given the question any thought

that it is necessary to have special training and special instruction along this line, to be a successful farmer. I am also pleased to state that there is a strong effort on the part of all persons interested in the care of and education of dependent children to popularize this important vocation. Schools and colleges are establishing special departments for this line of work and the State is granting liberal appropriations for experimental farming. To be sure our boys have something of a practical training along this line but it is not a scientific training. This instruction and training can be given them only by employing a thoroughly educated person for farmer, one that has been trained along this line, a graduate of an agricultural department of some school or college.

The new buildings for which the last Legislature granted us an appropriation are well under way and will soon be ready for occupancy. These buildings are substantial structures, of artistic design, and well adapted for the purpose for which they are intended. These buildings, with the connecting passage-ways, which passage-ways should be provided for by the next Legislature, complete one-half of the group as adopted by the State Board of Charities and approved by the State architects, and will permit us to properly house all of the girls now in the institution and enable us to prosecute advantageously the scholastic school work.

The boys are still without suitable quarters and two new dormitories of the same size and of the same design as the ones now being built should be provided. A new power-house is also needed, the present one being dilapidated and must be removed from its present location. These buildings, with an industrial building of which I have already made mention, complete the entire group and it seems to me that it would be economical to provide all the

money needed, for these buildings and changes, in one appropriation as a more desirable contract can be secured if all the work is done at one time than by dividing it up into parcels and extending it over a term of years. This plan would also permit the institution to enter at once upon the work designed for it to accomplish.

The following sums will be needed: For the industrial building and the two dormitory buildings, having a capacity of forty each and the connecting passage-ways between these buildings and the dining hall and the administration building, \$54,000; for a new power-house, \$7,500; for new boilers, setting same and connecting them with the main supply, \$1,500; for changing the electric light plant from its present location to the new power-house and for an additional dynamo, \$1,500; for moving and converting one of the present dormitory buildings into a laundry, \$1,500; for drilling a new gas well and connecting the same with the present gas system, \$2,200; furnishing and equipment, \$1,000; making a total of \$69,200.

A spirit of co-operation between all those charged with the care and supervision of the institution has prevailed throughout the entire year, the same spirit that has predominated throughout the whole period of the present administration which spirit of co-operation has been instrumental in lifting the institution to a higher plain of usefulness and placing it in its proper position among educational institutions of the State. For this hearty co-operation, to you as a board, and to the officers and employes, I wish to acknowledge my sincere appreciation and hope for its continuance in the future.

Respectfully submitted,

GEORGE I. LINCOLN,

*Superintendent.*

# Appendix C.

---

## REPORT OF ATTENDING PHYSICIAN.

### *To the Board of Managers:*

I beg to submit herewith my report for the fiscal year. The following-named diseases have been under treatment during the year:

Abscess . . . . .	1
Bronchitis, acute . . . . .	3
Chlorosis. . . . .	3
Contusion. . . . .	3
Conjunctivitis. . . . .	6
Dyspepsia, acute . . . . .	4
Eczema. . . . .	2
Erysipelas. . . . .	3
Fracture. . . . .	3
Herpes. . . . .	1
Inflammation of middle ear. . . . .	2
Ivy poisoning . . . . .	4
Insanity. . . . .	1
Laryngitis. . . . .	1
Pneumonia. . . . .	1
Rheumatism. . . . .	2
Synovitis. . . . .	2
Tuberculosis of bones. . . . .	2
Tuberculosis of glands. . . . .	7
Tonsillitis. . . . .	4
Typhoid fever. . . . .	1

No deaths have occurred, and there is now remaining under treatment only a few cases of minor importance.

The case of insanity, a boy 17 years of age, has been committed to the Buffalo State Hospital.

It is gratifying to discover, from an examination of our case record, that consumption, once so prevalent in the institution, is largely on the decrease. No deaths from this cause have taken place for the past four years. This fortunate condition may be ascribed, to a great extent, to the larger space given the children in the dormitories and living rooms, which, although considerably smaller than required by law, are double in extent to those occupied ten years ago.

So far as the state of the older buildings permit an excellent sanitary condition is maintained.

It should be stated that the water in use has, at times, an offensive taste and odor. I believe this is due to the condition of the wooden storage tank, which has been in use for many years, and should be replaced by a new one constructed of steel or iron.

Very respectfully,

A. D. LAKE,  
*Attending Physician.*

GOWANDA, N. Y., *October 6, 1900.*

Two pairs scrim curtains.....	75
One hamper.....	75

---

**LARGE GIRLS' PLAY ROOM.**

One book case.....	\$5 00
Two tables .....	2 00

Two rocking chairs .....	\$1 00
Twelve chairs.....	3 00
One bell .....	50
One reading table.....	4 00

---

### LARGE GIRLS' DORMITORY.

Ten iron beds.....	\$60 00
Fourteen iron beds.....	70 00
Ten mattresses .....	40 00
Fourteen mattresses .....	28 00
Ten pillows.....	19 70
Fourteen pillows.....	3 50
Seventy-two sheets.....	7 20
Ten chairs.....	5 00
Fourteen shades.....	10 00
Forty-eight pillow cases.....	4 80
Twenty-four blankets .....	10 00
Ten mattress covers.....	3 50
Twenty-four counterpanes.....	7 50

---

### DRESSING ROOM.

Two dressers .....	\$12 00
One commode.....	5 00
One table.....	1 00
Four pictures.....	1 50
One rug .....	7 00
Two chairs .....	40
Two shades.....	40

---

## SCHOOL.

## PRINCIPAL'S ROOM.

Thirty-four double seats .....	\$68 00
One desk .....	4 00
One waste paper basket.....	75
One bell.....	25
One organ and stool.....	50 00
One book case and books.....	18 00
Five blackboards.....	20 00
One clock .....	4 00
One dictionary.....	8 00
School books .....	100 00
Six chairs.....	1 20
One thermometer .....	25
One picture.....	1 00
One globe.....	20 00

---

## INTERMEDIATE ROOM.

Three benches.....	\$7 20
Two blackboards.....	12 00
One desk.....	4 00
One chair .....	30

---

## KINDERGARTEN ROOM.

Two long tables, 8 x 18.....	\$16 00
Two small tables, 6 x 18.....	15 00
Two small tables 3 x 18.....	8 00
One piano and stool.....	100 00
One revolving chair.....	7 00
Twenty-four small chairs.....	1 00

One piano cover .....	\$1 00
Seven pictures .....	12 00
Eleven small pictures framed .....	2 00
One book case .....	19 00
Kindergarten material .....	30 00
One black board .....	6 00
One reading chart .....	1 00
One number chart .....	2 00

---

**TEACHER'S ROOM.**

One desk .....	\$4 00
Eight chairs .....	1 60
One waste basket .....	40

---

**PRIMARY.**

Sixteen desks .....	\$32 00
Three benches .....	7 50
Two blackboards .....	9 00
One teacher's desk .....	4 00

## FORTY-SIXTH ANNUAL REPORT

OF THE

# Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children.

---

### *To the Legislature:*

In compliance with the statute the board of managers of the Thomas Asylum for Orphan and Destitute Indian Children beg leave to present their report for the fiscal year ending September 30, 1901.

At the opening of the year there were 126 children on the rolls of the asylum. During the year 12 boys and 17 girls have been received; there has been one death, and 4 boys and 8 girls have been transferred or returned to their parents or guardians, leaving at the close of the fiscal year 142 children in the asylum, of whom 60 are boys and 82 are girls.

During the year the health of the children has been most excellent. Only one death has occurred. As will be seen from the report of the attending physician, the death-rate at this institution has been reduced in ten years from a death-rate of 10 per annum in a population of 100 children to a present death-rate in a largely increased population of but one death in two years. This remarkable change is undoubtedly attributable to the improved sanitary conditions furnished by the new buildings which have thus far been provided and to the watchful care of the present management in providing proper clothing, a suitable

and healthy dietary, with an abundance of out-door life and out-door work to strengthen mind and body.

The educational work which is the most essential in training these Indian boys and girls to become self-helpful men and women has been very successfully carried on with the means at our disposal. Increased facilities for industrial training are much needed and should be provided soon.

It is greatly to be regretted that, by reason of increased costs of labor and material, the dormitory building for boys could not be built this year, as your appropriation was insufficient. You will be asked to provide for this deficiency and for another boys' dormitory, which is much needed, as well as a new power-house, with its connections. To provide for the large increase in the population an additional sum for maintenance must be appropriated. The report of the superintendent which is annexed (Appendix B) gives the details of these requirements and will be found to be most interesting and suggestive in its report of a single year's progress.

The corner-stone of the first building erected for this praiseworthy work was laid September 14, 1855. Forty-six years have passed since that day of small beginnings and have seen great changes. The Thomas Asylum owes its existence to the Christian sympathy and self-sacrificing labors of the Rev. Asher Wright and of his wife, Laura M. Wright, who as early as 1830 were missionaries to the Senecas, with whom from that time they lived and died. If there has been an abiding influence that has remained to make for civilization and for righteousness among these Indians it has been the memory of their helpful ministrations. When the original corner-stone was removed to be replaced in the central building of the new group, the sealed

lead box placed therein in 1855 was opened and among the interesting documents which it contained was a "Brief Account of the Origin of the Thomas Asylum for Orphan and Destitute Indian Children" in the handwriting of Laura M. Wright, which is worthy of permanent record. It is as follows:

"During the summer of 1854, nine children in one family were left destitute by the death of one man, Joseph L. Peter. Five of them were his own and four were orphan relatives, or worse than orphans, cast upon his care, and dependent on his family. This led to an examination of the subject and it was soon ascertained that there were about fifty orphan and destitute children on the Cattaraugus Reservation alone, many of them in a very wretched condition and exposed to the most fearfully degrading influences.

"In view of their hopeless condition, Mrs. Wright commenced an effort for their relief by corresponding with a few friends upon the practicability of establishing an Asylum upon the Reservation. Meeting with some encouragement, she then undertook to interest the Indians in the undertaking. Nathaniel T. Strong, Esq., one of the Councillors of the (Seneca) Nation called the attention of that body to the subject and procured the passage of the following resolution, as it appears upon the minutes of the council of the 9th of September, 1854: 'Resolved that Mr. N. T. Strong and his associates may establish and maintain an Orphan Asylum for the benefit of the Destitute Orphan Children, and to locate it upon the Cattaraugus Reservation, to be supported by the contributions of the benevolent public: and resolved further that this council approve such an institution and authorize its managers to locate it, and purchase such lands of any individual Indian or Indians as may be

necessary for its use, and that if the Nation shall make any appropriations for its support, such appropriations shall be regarded in the same light as all others benefactions from the benevolent, and that the institution shall be considered as entirely disconnected from the National Government in respect to its control and management.

“Finding the government favorable to the object, it was determined to make an effort to get the institution into operation on a limited scale, so as to relieve the most needy during the approaching winter, which promised to be one of scarcity and distress. On applying to the Prudential Committee of the American Board, permission was obtained to finish off a portion of the Mission Building into rooms sufficient for the accommodation of eight or ten children, and to charge them with the wages of a matron to take care of them until other provisions could be made for them. Philip E. Thomas of Baltimore, an aged and highly honored member of the Society of Friends and long known as a devoted friend of the Indians advanced one hundred dollars toward their support. This was the first donation to the institution; and in view of this fact as well as out of respect to his disinterested benevolence to the Indian race, the trustees subsequently decided to give it his name. At the suggestion of Aaron Rumsey, Esq., of Buffalo, who kindly undertook to make the arrangements and secured an audience, a concert was given in that city by the brass band and the choir of singers of the Indian congregation and so energetic were his efforts, that, after defraying all expenses, one hundred and seventy-four dollars remained for the institution. Some kind friends in Fredonia contributed nearly seventeen dollars for the purchase of a cow, besides some clothing and provisions. Other friends

sent in some twenty dollars more in cash and provisions. Thus encouraged it was decided to take in as many as there should be room for as soon as their apartments could be prepared, and the necessary arrangements made for taking care of them. Accordingly on the 25th of January one boy was received, on the 31st one boy and two girls; on the 17th of February another boy; on the 22d a girl; on the 23d another; on the 24th another boy, and on the 26th another.

“Meanwhile in order to secure the permanence of the institution the trustees deemed it necessary to procure an act of incorporation and one of their number, Rev. A. Wright, was sent to Albany for that purpose. Through the kind assistance of Hon. James Kirkland, member of the Assembly from Cattaraugus, the Hon. J. V. H. Clark, from Onondaga, chairman of the committee, on Indian affairs, and the Hon. A. H. Walker Senator from Chautauqua, and other friends of the Indians, the bill introduced for that object was carried through both branches of the Legislature and received the Governor’s signature on the 10th of April, 1855. By this act the State furnishes two thousand dollars for the erection of buildings, and ten dollars each for any number not exceeding fifty beneficiaries sustained in the asylum; besides placing this on the list of the incorporated Asylums of the State, thus entitling it to a share of any appropriations hereafter to be made to such institutions.

“The trustees held their first meeting under this charter on the 27th of April, and organized by electing Samuel G. Ellis president, Asher Wright clerk, and Eber M. Pettit treasurer. Then they appointed committees for procuring land and selecting a plan for the buildings. The land committee at once commenced negotiations, and on the 17th of May the trustees decided to

purchase the lot on which they are now building, containing fifteen acres, for the sum of \$300; on the 4th of June they obtained a conveyance of the same from Caleb Davis, the former owner. On the 6th of July they adopted the plan of the building, and appointed a building committee, with instructions to contract for its completion so far as could be done with the means furnished by the State, having no other funds yet at their disposal. On the 1st day of August this committee executed a contract with Joseph Ansley, Esq., of the town of Perrysburgh, by whom the building is now in the process of erection. On the 3d of September the trustees voted to have the corner stone laid on the 14th, in the hope that He who cares for the poor and the orphan and whose kind Providence feeds the raven and clothes the lily, will smile upon the enterprise, and furnish means for carrying it forward to a happy completion, and render it an efficient instrumentality in relieving human misery and promoting the welfare of the people for whose benefit it is especially intended. This brief sketch is deposited under that corner stone with the confident expectation that whatever future generation may bring it to light, will be no less deeply interested than their predecessors in everything which tends to alleviate woe, to elevate the depressed, and to cover with smiles the face of redeemed and enobled humanity."

So wrote that gentle soul whose one thought while living was to lessen the suffering of humanity, to comfort and help where comfort and help were needed and to aid in the advancement of a simple-hearted, but alien race, to whom her life and its untiring efforts were given. During the forty-six years that have passed by since her pen traced these words the work which was then begun has at times struggled and languished, until within recent

years a wider public interest has been awakened and by your generous provision it has been greatly prospered and extended. The hope which she expressed is now seeing its fulfillment. The education and training of these Indian children that they may become self-helpful, self-supporting members of the body politic is a worthy undertaking on the part of the State which should commend itself to every thoughtful citizen.

The report of the treasurer, Hon. H. M. Blasdell (marked Appendix A) is respectfully submitted, also the report of the attending physician, Dr. A. D. Lake (marked Appendix C). Appendix D gives the names and nationalities of the children, showing the reservation from which each has been received. Appendix E gives a statement of the real and personal property of the institution.

### **SUPERINTENDENT'S REPORT.**

*To the Board of Managers of the Thomas Asylum for Orphan and Destitute Children:*

Pursuant to law, I present herewith my report as superintendent for the year ending September 30, 1901.

The institution's population at this date is 142, consisting of 60 boys and 82 girls, received from the several reservations of the State as follows: 11 from the Allegany, 56 from the Cattaraugus, 10 from the Oneida, 21 from the Onondaga, 10 from the Tonawanda, 20 from the Tuscarora, 6 from the St. Regis and 2 from the Shinnecock.

I deem it proper to call your attention to the increase in the per capita cost of maintenance during the past year and to its causes. The largest factors in producing this have been first, the greatly increased cost of fuel and the large increase in heating space occasioned by the occupancy of the new school building and the new dormitories; second, the notable increase in costs of meat, flour and other necessary food supplies, and added to this the advance in wages and salaries caused by the operation of chapter 282, of the Laws of 1899, under which a new schedule was drawn up for our use. This per capita cost is not large for an institution of this character, on the contrary it will be seen to be very moderate, if all the objects of the institution, as promulgated in its charter, are properly carried

out, to wit: the furnishing of the Indian children placed under its supervision, with care, moral training, education and instruction in husbandry and in the arts of civilization. Neither is it large in comparison with other similar institutions, that are really educational and not eleemosynary in their character, such as the schools for the blind and for the deaf and dumb.

I am pleased to say that the school work, in all of its branches for the past year, has been profitable and satisfactory and it is gratifying for me to be able to report that we graduated a class of six pupils, three girls and three boys, Molly Jimerson, Salina Maybee, Minnie Tallchief, Peter Jimerson, John Pierce and Gurney Twoguns, a class that any school might well be proud of, and that in its closing exercises departed itself creditably in every way. We all look forward in pleasant and hopeful anticipation to a successful career for these persons in whatever position of usefulness they may be placed.

The majority of the crops on the farm yielded abundantly, the exceptions being the potato crop, which fell off about 25 per cent. and the oat crop which might almost be called a failure, the yield being only about 40 per cent. of the yield of former years. The farm on the whole, notwithstanding these two short crops, shows a handsome credit over and above all expenses, including the salary of the farmer and other laborers, and besides this the boys have received considerable training and instruction in this important industry that will be of incalculable value to them in after years.

Practically no industrial training has been given the children during the past year, owing to the fact that we were unable to employ a competent instructor in this important branch of education and to the further fact that we had no available room that could be utilized for this purpose.

Industrial training is an important branch of education and is certainly the kind especially needed for these boys and girls who are being prepared for citizenship and self-support. The only true way to civilize the Indian is to teach him to work and to respect work, to teach him thoroughly one of the many trades so that he may go out into the world away from the reservation and away from the reservation influences fully fitted to earn a livelihood and so prepared for this that the old style of reservation life will have no charms or temptations for him. To properly do this the institution should be provided with a complete manual training or industrial department, thoroughly equipped with tools and machinery and manned with the most competent help that can be secured so that the boys and girls placed under its care may be thoroughly and properly trained both in body and mind.

Five of the buildings embraced in the plan adopted for the reconstruction of the institution are now finished and occupied. These buildings are, the administration building, the dining-room and kitchen building, the school building and the two dormitories for girls. Each building is a model in its arrangement, and fully meets the requirements and purposes for which it was designed. Their grouping is pleasing and artistic, and convenient for administration, while their separation insures proper sunlight, pure air, and good ventilation and takes away to a large extent the undersirable institutionizing features, giving a homelike appearance to them and to their surroundings.

With the addition of the two dormitories for boys and the industrial school building, the group as designed by the architects and approved by the State Board of Charities, will be as con-

plete in all of its appointment as any institution in the State. It will be an institution built on modern lines in which the safety and health of its inmates and employees are properly protected and so equipped as to accomplish great good along the lines of practical education and training; a credit to the great State of New York and of much value to all of those interested in the future welfare of the Indians.

One of the urgent needs of the institution at this time is more dormitory space for boys. The Legislature of 1901 granted an appropriation for one new dormitory, but owing to the advance in the price of all building material, no bid could be secured within the sum appropriated. An increase should be granted by the coming Legislature to the sum already granted so that this dormitory may be built and provisions should be made for the building of the second dormitory.

A new power house is also needed. The present heating system is insufficient to properly and economically heat the institution and the building is old, dilapidated and unfit for use. A new laundry also must be provided and it has been suggested that one of the frame buildings now occupied by the boys for dormitory purposes be moved to another location and converted into a laundry. This may be the wisest plan to adopt, yet I am not thoroughly committed to the scheme for the reason that a laundry with its drying apparatus should be of brick and not frame, so as to avoid the great danger from fire. This frame building could be made to serve as a cottage for the employees at a very small outlay and I believe that it is better adapted to that purpose than for a laundry.

To carry out these improvements the following appropriations will be needed: an increase of \$4,000 to the appropriation of

\$13,000 made by the last Legislature for a dormitory building; an appropriation of \$17,000 for the second dormitory building for boys; \$12,600 for a new power house, chimney, stack and connecting subways; \$5,000 for two new boilers, connections and accessories; \$2,500 for conduit, piping and tank fittings in connection with the new water tower; \$3,000 for an additional dynamo, lights and wiring. If the old frame building be converted into a laundry, an appropriation of \$2,000 will be needed, but if it be converted into a cottage for the employees, \$1,000 will be sufficient; in the latter case \$5,000 will be needed for a new brick laundry and \$1,000 for furniture and equipment.

It may be asked whether the results accomplished here are such as to justify the State's expenditure. These results are not to be gauged by a mere debit and credit standard. The question involved is (except for its greater scope) that which arises in the consideration of a proper education for our own children. No one can estimate with precision the return he is to receive from the money expended in the education of his children, yet no one would advise withholding the means of securing this education, for the mere reason that the return on the investment can not be figured out in dollars and cents. The task that we are confronted with in the education and proper training of our Indian wards is not an easy one; for it is a difficult undertaking to change the peculiar characteristics of a people acquired through long generations, a work which until within late years has been neglected or has been done in such a manner as to accomplish no lasting good. To do this work so that its results may be permanent the Thomas Asylum should employ well trained and competent teachers and all of its employees should be people of high Christian character. Its equip-

ment should be the very best; its buildings should be substantial and tasteful, for this institution is certain to be a cogent regenerating influence and inspiration in arousing this people from their present listless condition to an ambition for responsibility and citizenship. We must do something to encourage a spirit of emulation and set a standard sufficiently high to merit emulation. This I think is being done in the reconstruction of the institution on broad, liberal and substantial lines and I am confident that the work and influence of the institution is permeating the several reservations of the State through its children that are being sent out to a much larger degree than ever before. The work of the year past has been profitable in many ways along this line. It has, I believe, been the most successful in the history of the institution and the field of usefulness that it has reached was little dreamed of by its founders; it is, however, only the beginning of a great work that can be accomplished through no other source as well as by the Thomas Asylum.

#### ACKNOWLEDGMENTS.

We are under great obligations to Hon. Charles Z. Lincoln for the instructive and helpful lecture delivered to the graduating class at the commencement exercises of the school and I wish to take this opportunity of conveying to him the thanks of myself, the members of the graduating class and all those interested in the school and the institution. I wish also to extend our thanks and the assurances of our appreciation to Hon. George Urban, Jr., for his generous gift of over forty tickets of admission to the Pan-American Exposition, thus affording an opportunity to our children of seeing one of the greatest and most beautiful expositions of modern times. Mr. W. F. Fisher

has again placed us under renewed obligations for a most liberal supply of valentines furnished the children, for which I am pleased to extend our hearty thanks. Also to the board of managers and our many friends for their generous contributions to the Christmas fund.

In closing permit me to extend to each member of the board the sincere thanks of both Mrs. Lincoln and myself for the cordial support and active interest each has taken in the welfare of the institution and its pupils. Your advice and assistance have given us much encouragement and have been of inestimable value to the institution. Our thanks are also due and appreciatively extended to all the teachers and employees who have so loyally and faithfully aided us in our efforts to give these Indian boys and girls such an education and training as will fit them for useful and Christian citizenship.

Respectfully submitted,

GEORGE I. LINCOLN,

*Superintendent.*

# APPENDIX C.

---

## REPORT OF ATTENDING PHYSICIAN.

*To the Board of Managers:*

I beg to submit herewith my report as attending physician for the fiscal year ending September 30, 1901.

The following-named diseases have been under treatment since my last report:

Abcess. . . . .	2
Anaemia. . . . .	3
Bronchitis, acute . . . . .	3
Catarrh, chronic . . . . .	1
Chlorosis. . . . .	5
Conjunctivitis. . . . .	5
Contusion. . . . .	2
Dyspepsia, acute . . . . .	5
Eczema. . . . .	6
Felon. . . . .	1
Herpes. . . . .	5
Hystero-epilepsy. . . . .	1
Infl. middle ear. . . . .	2
Influenza. . . . .	4
Kick from horse. . . . .	1
Liver, congestion . . . . .	1
Laryngitis. . . . .	3

Pneumonia. . . . .	3
Pleurisy. . . . .	1
Poison, ivy . . . . .	5
Pott's disease of spine. . . . .	1
Rheumatism, acute . . . . .	2
Ringworm. . . . .	1
Tuberculosis, glands . . . . .	3
Tuberculosis, bone . . . . .	1
Tuberculosis, lungs . . . . .	3
Tonsilitis. . . . .	5
Sprains. . . . .	2
Synovitis, knee . . . . .	1
Vaccinations made . . . . .	178

All have recovered except one girl, who died from consumption.

It is most gratifying to note the increased healthfulness of the institution during the past few years, clearly the result of more room furnished by the new buildings, and the generally better sanitary condition thus provided. Ten years ago the children were crowded into a space in dormitories and living rooms less than one-half that which they now occupy. At that time the average annual death rate was about four. Now, for the past five years, it is about one in two years. This must be regarded as splendid evidence of the wisdom of the Legislature in authorizing the necessary expenditure for new buildings. When the entire group shall have been completed we may reasonably hope that tubercular diseases, so common among the Indians on the reservation, will largely be eradicated from among the children of the institution. Our better condition in this respect con-

firm the opinion, so prominently entertained at the present time, that in the prevention and cure of tubercular affections we must depend, largely, upon pure air and not upon drugs.

Very respectfully,

A. D. LAKE,

*Attending Physician.*

GOWANDA, N. Y., *October 1, 1901.*

# APPENDIX D.

## CATALOGUE OF CHILDREN, WITH THEIR NATIONALITY AND THE RESERVATION FROM WHICH EACH CAME.

### ALLEGANY RESERVATION.

Males.	Nationality.
Cooper, Lawrence .....	Seneca.
Doxtator, Theodore .....	Seneca.
Gordon, Bertie .....	Seneca.
Jimerson, Aleck .....	Seneca.
Titus, Hectar .....	Seneca.
Titus, Sylvester .....	Seneca.
Females.	Nationality.
Crouse, Rhoda .....	Seneca.
Gordon, Sophia .....	Seneca.
Gordon, Olive .....	Seneca.
Jimerson, Gertrude .....	Seneca.
Jimerson, Margaret .....	Seneca.

### CATTARAUGUS RESERVATION.

Males.	Nationality.
Bishop, Willie .....	Cayuga.
Bishop, Harold .....	Cayuga.
Blusky, Bertie .....	Seneca.
Green, James .....	Seneca.
Hemlock, Simon .....	Seneca.
Jimerson, James .....	Seneca.
Jackson, Fillo .....	Munsee.
Johnnyjohn, Cleveland .....	Seneca.

Males.	Nationality.
Johnnyjohn, Mitchel .....	Seneca.
Johnson, Arthur .....	Seneca.
Johnson, Harvey .....	Seneca.
Jimerson, Franklin .....	Cayuga.
Johnson, Richard .....	Seneca.
Kennedy, Raymond .....	Seneca.
Kennedy, Alvin .....	Seneca.
Lay, Carl .....	Seneca.
Pierce, John .....	Seneca.
Twoguns, Gurney .....	Seneca.
Twoguns, Harrison .....	Seneca.
Thompson, Raymond .....	Seneca.
Thompson, Frederick .....	Seneca.
Winnie, William .....	Seneca.
Wilson, George .....	Seneca.
Warrior, Frederick .....	Cayuga.
Females.	Nationality.
Blusky, Tillie .....	Seneca.
Boyle, Grace .....	Seneca.
Charles, Lucy .....	Seneca.
Darnell, Rhoda .....	Seneca.
Doxtator, Alta .....	Seneca.
Doxtator, Ella .....	Seneca.
Ground, Flossie .....	Seneca.
Hemlock, Helena .....	Seneca.
Hemlock, Tillie .....	Seneca.
Hemlock, Julia .....	Seneca.
Jackson, Marjory .....	Munsee.
Johnson, Lizzie .....	Seneca.

Females.	Nationality.
Johnnyjohn, Betsy .....	Seneca.
Jimerson, Grace .....	Cayuga.
Jimerson, Marjory .....	Cayuga.
King, Rachael .....	Seneca.
Paul, Virginia .....	Abnankis.
Pierce, Gertrude .....	Seneca.
Snow, Alta .....	Seneca.
Snow, Lena .....	Seneca.
Sundown, Sally .....	Seneca.
Spring, Emma .....	Seneca.
Spring, Ruby .....	Seneca.
Tallchief, Flora .....	Seneca.
Tallchief, Jennie .....	Seneca.
Twoguns, Evelyn .....	Seneca.
Thompson, Geneva .....	Seneca.
Thompson, Florence .....	Seneca.
Thompson, Lucy .....	Seneca.
Thompson, Lorenza .....	Seneca.
Winnie, Claracy .....	Seneca.
Wilson, Isabelle .....	Seneca.

#### ONONDAGA RESERVATION.

Males.	Nationality.
Edwards, Thomas .....	Onondaga.
George, Adam .....	Onondaga.
Hill, Levi .....	Oneida.
Honyoust, Charley .....	Oneida.
Powlas, Gilbert .....	Onondaga.
Waterman, Chester .....	Onondaga.

Females.	Nationality.
Gypson, Helen .....	Onondaga.
Gypson, Jennie .....	Onondaga.
Gypson, Lizzie .....	Onondaga.
Hill, Evelinda .....	Onondaga.
Hill, Mary .....	Oneida.
Hill, Laura .....	Oneida.
Hill, Nora .....	Oneida.
Hill, Maria .....	Oneida.
Hill, Lovina .....	Oneida.
Jacobs, Laura .....	Onondaga.
Jacobs, Agnes .....	Onondaga.
Jacobs, Susie .....	Onondaga.
Quart, Maggie .....	St. Regis.
Smith, Rose .....	St. Regis.
Thomas, Edith .....	Onondaga.

### ONEIDA RESERVATION.

Males.	Nationality.
Powlas, Baptist .....	Oneida.
Powlas, John .....	Oneida.
Scanandoah, Elias .....	Oneida.
Females.	Nationality.
Doxtator, Anna .....	Oneida.
Doxtator, Emma .....	Oneida.
Doxtator, Electa .....	Oneida.
Doxtator, Lucy .....	Oneida.
Doxtator, Ellen .....	Oneida.
Scanandoah, Dinah .....	Oneida.

## SHINNECOCK RESERVATION.

Males.	Nationality.
Beeman, Leroy .....	Shinnecock.
Females.	Nationality.
Beeman, Lessie .....	Shinnecock.

## TUSCARORA RESERVATION.

Males.	Nationality.
Bissell, Harry .....	Tuscarora.
Kusic, Alvis .....	Tuscarora.
Kusic, Simon .....	Tuscarora.
Sylvester, David .....	Tuscarora.
Thompson, Grover .....	Tuscarora.
Thompson, Oliver .....	Tuscarora.
Females.	Nationality.
Chew, Sarah .....	Tuscarora.
Garlow, Ethel .....	Tuscarora.
Garlow, Winifred .....	Tuscarora.
Green, Mary .....	Tuscarora.
Henry, Eva .....	Tuscarora.
Henry, Esther .....	Tuscarora.
Hewett, Minnie .....	Tuscarora.
Jack, Augusta .....	Tuscarora.
Kusic, Jane .....	Tuscarora.
Printup, Villa May .....	Tuscarora.
Thompson, Myrtle .....	Tuscarora.
Williams, Virginia .....	Tuscarora.
Williams, Laura .....	Tuscarora.
Williams, Irene .....	Tuscarora.

## TONAWANDA RESERVATION.

Males.	Nationality.
Carpenter, Simeon .....	Seneca.
Carpenter, Wesley .....	Seneca.
Printup, Clark Wilson.....	Seneca.
Poodry, Dudley .....	Seneca.
Shanks, Grover Cleveland.....	Seneca.
Sundown, Farley .....	Seneca.
Skye, Wilbur .....	Seneca.
Sky, McRay .....	Seneca.

## INVENTORY OF THOMAS ASYLUM OCTOBER, 1901.

---

### ADMINISTRATION BUILDING.

Building..... \$25,000 00

---

---

### SUPERINTENDENT'S OFFICE.

One filing case and base..... \$20 00  
One hundred filing boxes..... 35 25  
One carpet sweeper..... 2 50  
One floor brush..... 1 50  
One dictionary and stand..... 11 50  
Two card index cases ..... 11 00  
One letter file ..... 7 00  
Two document files ..... 3 50  
One revolving bookcase ..... 12 00  
One large Brussels rug..... 25 20  
One small Brussels rug..... 1 00  
Three window shades..... 1 50  
One waste paper basket..... 25  
One picture ..... 50

---

\$132 70

---

---

## ACCOUNTANT'S ROOM.

One Mosler safe .....	\$50 00
One desk .....	15 00
One revolving chair .....	7 50
One typewriter desk .....	25 00
One typewriter .....	70 00
One stenographer's chair .....	3 50
One letter press .....	1 50
One pigeon hole case .....	9 00
One Brussels rug .....	9 00
Two small rugs .....	1 00
One window shade .....	50
	<hr/>
	\$192 00
	<hr/> <hr/>

## PUBLIC OFFICE.

One large desk .....	\$50 00
One high stool .....	1 50
One large table .....	20 00
Six chairs .....	12 00
Two window shades .....	1 00
One large Brussels rug .....	18 00
One small rug .....	50
	<hr/>
	\$103 00
	<hr/> <hr/>

## PUBLIC RECEPTION HALL.

One large Brussels rug .....	\$38 00
Three small rugs .....	30 00
One Mottle rug .....	50

Six chairs .....	\$15 00
Two hall settees.....	45 00
Three sofa pillows.....	1 50
	<hr/>
	\$130 00
	<hr/> <hr/>

## PUBLIC PARLOR.

Three oak rockers .....	\$22 00
Four chairs .....	8 00
One stand .....	10 00
Six pictures .....	10 00
Four pair lace curtains and poles.....	12 00
One pair portieres .....	8 00
Four window shades.....	2 00
One large Brussels rug.....	55 00
One small Brussels rug.....	75
	<hr/>
	\$127 75
	<hr/> <hr/>

## MATRON'S OFFICE.

One desk .....	\$15 00
One revolving chair.....	7 50
One Brussels rug.....	16 50
One small rug.....	75
One window shade.....	50
Two pictures .....	1 00
Two chairs .....	7 00
One waste paper basket.....	50
	<hr/>
	\$48 75
	<hr/> <hr/>

## SUPERINTENDENT'S LIVING APARTMENTS.

One patent rocker .....	\$25 00
One upholstered rocker .....	16 00
One mahogany sofa.....	28 50
Two chairs .....	14 00
One mahogany table.....	13 00
One Brussels carpet.....	54 00
One pair portieres .....	20 00
Three pair lace curtains.....	18 50
Three window shades.....	1 50
One large Brussels rug.....	29 00
One table .....	10 00
Two chairs .....	21 00
One divan .....	7 75
One pair portieres .....	19 40
Two window shades.....	1 50
Three curtains .....	2 50
One table .....	25 00
One sideboard .....	54 00
Nine chairs .....	31 50
One large chair.....	5 50
One large rug .....	30 60
One small rug.....	75
Four window shades.....	2 00
Four pair lace curtains.....	4 00
Three beds .....	33 40
Three mattresses .....	30 40
Two dressers .....	53 00
One chiffonier .....	18 00
Three blankets (pair).....	6 00

One Morris chair .....	\$6 00
Nine window shades .....	4 50
Eight pair white curtains .....	8 00
One sash curtain .....	50
Four large Brussels rugs .....	53 20
Four Mottle rugs .....	3 00
Three small rugs .....	2 25
One table .....	4 00
Three rockers .....	4 50
Twelve sheets and pillowcases .....	6 00
Six pillows .....	10 75
Two hampers .....	1 00
	<hr/>
	\$679 25
	<hr/> <hr/>

## ROOM No. 1.

One bed .....	\$5 70
One dresser .....	13 00
One commode .....	4 00
Two chairs .....	3 00
One chamber set .....	4 50
One picture .....	1 50
One pair white curtains .....	1 25
One window shade .....	50
One ingrain rug .....	5 95
One Mottle rug .....	50
One mattress .....	12 80
One mattress cover .....	50
Eight sheets .....	1 20
Four pillowcases .....	40

One pair blankets .....	\$4 30
One counterpane .....	2 00
Two pillows .....	2 75
	<hr/>
	\$63 85
	<hr/> <hr/>

## ROOM No. 2.

One ingrain rug.....	\$5 95
One Mottle rug.....	75
One large iron bed.....	5 70
One dresser .....	13 00
One commode .....	4 00
One chamber set.....	4 50
One chair .....	1 50
One rocker .....	2 00
One window shade.....	50
One pair white curtains.....	40
One mattress .....	11 50
One mattress cover.....	40
Four sheets .....	60
Four pillowcases .....	40
One pair bankets.....	4 30
One counterpane .....	2 00
Two pillows .....	2 50
	<hr/>
	\$60 00
	<hr/> <hr/>

## ROOM No. 3.

One ingrain rug.....	\$6 57
Two rockers .....	2 50
One chair .....	1 50
Two single beds .....	11 40
Two mattresses .....	17 28
One dresser .....	13 00
One commode .....	4 00
One chamber set.....	4 50
Three pair scrim curtains.....	90
Three window shades.....	1 50
Two mattress covers.....	80
Six sheets .....	90
Two pair blankets.....	8 60
Two counterpanes .....	2 50
Four pillowcases .....	40
Two pillows .....	2 50
	<hr/>
	\$78 85
	<hr/> <hr/>

## ROOM No. 4.

One ingrain rug .....	\$6 30
One dresser .....	13 00
One commode .....	4 00
One rocker .....	1 50
One chair .....	1 50
Two single iron beds.....	11 40
Two mattresses .....	17 28
Two mattress covers .....	80
Six sheets .....	90

Four pillow cases .....	\$0 40
Two pair blankets .....	8 60
Two counterpanes .....	2 50
Two window shades .....	1 00
Two pair scrim curtains.....	60
Two pillows .....	2 50
	<hr/>
	\$72 28
	<hr/> <hr/>

## ROOM No. 5.

One ingrain rug .....	\$6 30
One dresser .....	13 00
One rocker .....	1 50
One chair .....	1 50
One small rug .....	25
Two single beds .....	11 40
Two mattresses .....	17 28
Two mattress covers.....	80
Six sheets .....	90
Four pillow cases.....	40
Two pair blankets .....	8 60
Two counterpanes .....	2 50
Two pillows .....	2 50
Three window shades .....	1 50
Three pair scrim curtains.....	90
	<hr/>
	\$69 33
	<hr/> <hr/>

## ROOM No. 6.

One ingrain rug .....	\$6 30
Two small rugs .....	75
One table .....	4 50
One chair .....	2 50
One dresser .....	13 00
Two single beds .....	11 40
Two mattresses .....	17 28
Two mattress covers .....	80
Two pair blankets.....	8 60
Two counterpanes .....	2 50
Two pillows .....	2 50
Two window shades .....	1 00
Four pillow cases.....	40
Six sheets .....	60
	<hr/>
	<b>\$73 43</b>
	<hr/> <hr/>

## DINING ROOM No. 2.

Seven window shades.....	\$3 50
One table .....	2 50
Twelve dining room chairs.....	6 00
One side board .....	30 00
Two spoon holders .....	40
Two glass pitchers .....	1 00
One sugar bowl .....	30
One vinegar cruet .....	40
Three table cloths.....	3 00
Eight salt and pepper shakers.....	50
	<hr/>
	<b>\$47 60</b>
	<hr/> <hr/>

## SERVING ROOM.

One water tank .....	\$3 00
Table dishes .....	10 00
	<hr/>
	\$13 00
	<hr/> <hr/>

## KITCHEN.

One range .....	\$90 00
One table .....	4 00
Two rolling pins .....	20
Two potato mashers .....	20
Two dippers .....	30
One funnel .....	5
Eight granite basins .....	2 00
Eight pie tins .....	1 25
Seven pans .....	1 75
Ten bread tins .....	1 00
Four cake tins .....	40
One meat chopper .....	1 68
One chopping knife.....	30
Four tin cups .....	20
One skimmer .....	5
One colander .....	10
Eight one-half gallon jars.....	80
Six gallon jars .....	90
Two bread boxes .....	1 50
One refrigerator.....	10 00
Two sheet iron spiders.....	1 00
Three iron spiders .....	1 50
Four gem pans.....	80
One steamer .....	35

Two toasters .....	\$0 25
Two chopping bowls .....	50
Two teapots .....	50
One coffee pot .....	25
One teakettle .....	1 50
One waffle griddle .....	3 00
One ice cream freezer .....	4 00
Four small cookers .....	1 20
Two large cookers .....	2 00
One stew kettle .....	50
One chinese strainer .....	75
One flour sieve .....	10
One granite dripping pan .....	30
One hamper .....	50
Four scrubbing pails .....	40
Two scoops .....	10
One frying kettle .....	2 00

---

---

\$138 18.

**STORE.**

One table .....	\$8 00
One desk (no value).	
One chair .....	25
One counter .....	1 50
One coffee mill .....	3 00
One pair scales .....	5 00

# REPORT.

---

*To the Legislature:*

As required by the statute, the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children beg leave to present their report for the fiscal year ending September 30, 1902.

At the beginning of the year there were 142 children in the institution. Since that time there have been two deaths, eight boys and ten girls have been placed in families, discharged or returned to parents or guardians, and twenty-three children have been received, so that, at the present time, there are sixty-one boys and eighty-four girls enrolled, making a total of 145 pupils at the present date.

During the year two deaths have occurred, but, as is shown by the report of the attending physician, the general health of the children has been excellent and the tendency to tubercular disease, the greatest scourge among the Indians, is steadily lessening as a result of good sanitary conditions, healthful diet, suitable clothing and abundant exercise in the open air.

The educational work of the year has been excellent so far as it has gone, but the necessity for increased facilities for industrial training is very pressing and the Superintendent in his report urges most strongly the great need of having an industrial school building. A practical training in the trades is of the utmost importance in fitting the boys for independent self-

supporting manhood and manual training, with at least the beginnings of domestic science is no less needful for the girls. We hope that this may receive your thoughtful attention.

Owing to the increased number of children now cared for, the school building is becoming overcrowded and should be enlarged by adding another class-room. Changes should also be made in the location of the toilet rooms for reasons which are made clear by the Superintendent's report.

By a moderate expenditure in the purchase of an additional fifty acres of farm land our farm products could be increased to meet the needs of the institution. This would prove to be an important economy.

The Superintendent's report, which is annexed (Appendix A), also calls attention to the need of a larger allowance for provisions and for clothing.

The earnest efforts of the Board of Managers throughout the years of their service has been directed towards providing for the best welfare of these Indian children, that while under the care of the State they may be so educated and trained in mind and body that they may become self-reliant men and women, useful to the world in which they are to live when they reach maturity, and in their turn helpful to those of their own race in their steady struggle towards better civilization. In this endeavor they have relied upon the conscientious and capable management of the Superintendent and Matron, who in all these years have served the State and your Board most faithfully and well. Their discouragements have but stimulated them to stronger effort with results of which the State may well be proud. They are justly entitled to this record of appreciative praise.

The report of the Treasurer, Mr. Samuel G. Keyes (marked Appendix C), is respectfully submitted, also the report of the Attending Physician, Dr. A. D. Lake (marked Appendix B), while Appendix D gives the names and nationalities of the children, showing the reservation from which each has been received, and Appendix E gives a statement of the real and personal property of the institution.

## APPENDIX A.

*To the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children:*

I present herewith my report as Superintendent for the year ending September 30, 1902.

The per capita cost of the institution has been reduced quite materially during the past year, and a further reduction cannot reasonably be expected; neither do I believe that the present low rate can be maintained during the year, owing to the high price of all food supplies. The allowance for provisions is not sufficient, neither is the allowance for clothing. The cost of provisions last year was extremely small, the meals averaging only two cents each on the pupil population, and on the total population only .017. A substantial increase to the regular maintenance fund should be granted.

The school work of the year was quite satisfactory. Not so large a class was graduated as in the previous year, there being only three in the class, Sophia Gordon, Flora Tallchief and Bertie Bluesky. These three are bright scholars, and I am sure that the education and training that they received here will be of lasting benefit to them. A new principal has been employed in the school, and the future prospects are exceedingly bright and promising.

The school building, although recently constructed, is overcrowded, and should be enlarged so as to provide another class

room, and in providing for this class room a much-needed change in the toilet rooms can be made. The present toilet rooms are directly under the main stairway. They are poorly ventilated, and the odor rising from them permeates the entire building. It is especially noticeable in the large school room on the second floor. There is also only one passageway leading to these toilet rooms, and both boys and girls are compelled to pass down this hallway, which is in direct violation of the Public School Law requiring the entire separation of the toilet rooms or closets for the sexes. Both of these serious objections could be completely obviated in providing for the addition for the class room. This I consider a much-needed improvement; it is almost imperative, and I urge most emphatically that provision be made for the same.

The interest shown by the pupils in the study of music is very great, and the advancement is most gratifying. We are, however, crippled considerably by the lack of instruments, those now in the institution having been in constant use for a number of years; they are practically worn out, and should be replaced by new ones.

Athletics are always an interesting feature, and, I might add, a necessary one, in all of the modern schools. Our boys have shown great interest in all athletic games. The foot ball team deserves especial mention, having lost only two games during the season, and they have played with teams of considerable reputation, such as that of the Central High School of Buffalo, and the High Schools of Bradford, Dunkirk, Gowanda, Springville and other villages in this vicinity.

The work of the industrial branch of the school has been very limited, owing to the lack of proper facilities, and of an

instructor in carpentry. This instructor in carpentry has been provided for by the salaries classification committee, and we expect to employ one in the near future. A number of the boys, however, have worked with the temporary carpenter, who was employed for a portion of the year, and considerable aptitude and much interest has been shown in this line of work. It has demonstrated conclusively to the minds of us all that these boys are capable of learning the trades, and that they can be developed into good workmen. In this connection, I wish to again urge upon you the importance of providing an industrial school building. I have repeatedly recommended this improvement in my annual reports, and am convinced more and more each year of its necessity. I feel that a great mistake is being made, and an injustice is being done to the institution in delaying the means for prosecuting this most important branch of instruction. A practical education and training is what these children need, and the sort that they must have to fit them for fields of usefulness.

Manual training is recognized by all modern educators as a necessary adjunct to the public schools, and it is being adopted in nearly all of the city schools with very satisfactory results. If it be beneficial for the white children, it is doubly so for these Indian boys and girls, for there are not as many ways open to them for earning a livelihood as there are open to the white children, and when the State recognizes this fact and provides the way of giving these Indian boys and girls a practical industrial training, it will soon see long strides toward civilization, and a greater independence on the part of the individual Indians.

This industrial building has been approved in the plan and general scheme of the institution by those in authority, and it

seems to me that it would be a much better business policy to provide for the construction of this building and the other buildings, and improvements contemplated in one appropriation so that the institution may be completed in one contract, instead of by piecemeal. The institution would then be able to go forward with the work designed for it with some hope of success. I realize and appreciate fully that the State has been most generous in providing for new buildings and other improvements, for which I am exceedingly grateful, but one of the most important features for the successful prosecution of its work is being denied, and I earnestly desire that you impress upon the Legislature the importance of this industrial school building, and the necessity of providing funds for its construction.

The farm and garden have yielded abundantly, and a handsome income is shown in the way of home products consumed in the institution, which amounts to nearly \$4,000. The institution farm consists of 100 acres, fully 25 of which are occupied by the buildings and grounds, but for the past two seasons we have rented an adjoining patch of 25 acres, so that we have practically 100 acres for cultivation, which has, as shown above, produced nearly \$4,000 or practically \$40 per acre; this is certainly a very creditable showing. The farm is not large enough to supply all of the vegetables, hay and grain that is needed for the institution, and it seems to me advisable that the State acquire, either by lease or purchase, an additional 50 acres. We could then enlarge our dairy to 25 head of milch cows, which would provide us with a larger supply of milk and butter — two articles of food greatly needed — and we would also be able to raise a sufficient amount of hay and corn fodder and a large portion of the corn and oats needed for feeding the cows and horses.

The extremely wet season, and the flood of July twenty-first, which covered a large portion of the farm, damaged the crops to a great extent. The potato crop was damaged about 50 per cent. on account of the wet season, and fully 150 bushels of oats were destroyed by the flood, besides great injury being done to the hay uncut at that time.

The demands for admission to the institution have been many and quite urgent during the past year, but we were compelled to refuse admission to many worthy and deserving applicants, owing to the lack of accommodations for them, which fact emphasizes very forcibly the necessity of another dormitory building for the boys in addition to the one provided for by the Legislature of 1901. Provisions should be made for this dormitory building, but I do not consider it as important as the industrial school building, and if both cannot be provided I most emphatically urge that the industrial school building be given preference.

In my last year's report I had something to say in justification of the expenditures of what might seem to some a large sum of money for the support of this school, and I wish at this time to cite a few instances that to me fully warrant these expenditures.

One of our former pupils is employed in a large manufacturing establishment, holding a responsible position. He is steady, temperate and industrious. In conversation with the manager one day, he stated that this young man "was one of the best employees in the factory; that he did more work than the average man in his employ." Many of our boys have found employment on farms away from the reservation, and the almost uni-

versal report is that they are faithful, intelligent and deserving employees. The same pleasing reports have been received in regard to the girls who have been placed in families as domestics or nurses. In one family, where two of our girls were employed during the vacation, we had this report: "With one exception only, these girls are the best help we ever employed." I might give you many similar instances, but that is, of course, unnecessary, and I mention these only to show that some results are being accomplished.

Many of our pupils have a desire to procure a higher education than can be given them here, and those that have a strong inclination in that direction, and seem to possess the qualifications that would fit them for teachers or occupations that require a higher education, we strive to aid in this ambition. Three of our pupils are attending the Fredonia Normal School, two are attending the Gowanda High School, and two are attending the Genesee Wesleyan Seminary at Lima. All of these pupils, with perhaps one exception, are maintaining successfully their position and standing in their several classes in competition with the white children.

While I am not a believer in the present centralizing policy of the State in the control of its charitable institutions, having strong convictions that they cannot be conducted as efficiently, if results are to be considered, for it would practically prohibit the carrying out of any scheme or plan for the advancement of the institution that the Managers or Superintendent may have — they becoming mere machines with no individuality — yet I wish to acknowledge my conviction of the wisdom of that change in the Charities Law by the Legislature of 1902, author-

izing the appointment of a Fiscal Supervisor of State Charities. The benefits of this change, in this institution, are being felt in many ways. Its wants and needs are receiving intelligent and careful consideration, and if the policy of the present Fiscal Supervisor is continued many of the irritating and irksome requirements of this centralized system will be eliminated.

Our thanks are due, and I take pleasure in thus publicly extending them to Hon. J. S. Whipple, of Salamanca, for the interesting and instructive address delivered at the closing exercises of the school. We also wish to extend our thanks to Mr. William F. Fisher for again remembering the children with a supply of pretty valentines, and Mr. H. J. Weisenheimer, for his donation of several copies of the Buffalo Daily Times.

To all of those who contributed so liberally to our Christmas fund we are especially grateful, and we extend to them our most hearty and sincere thanks. It enabled us to make this day a happy and memorable one in the hearts of the children placed under our care. These Christmas festivities are bright and green spots in their memories. It is the day of anticipation, of pleasure, and of rejoicing. Its proper observance is as essential as the providing of food and raiment. The seeds of Christianity, and civilization thus planted in their young hearts is sure to grow and have its influence in shaping their lives, and destinies. And we trust that it may be the means of leading them to look to Him, who said: "Suffer little children to come unto me," for guidance and support.

You as a Board, and as individuals, have been loyal in your support, and untiring in your efforts to advance the interests of the institution, and its pupils, and it is a pleasant duty for us to extend to you our most hearty and sincere thanks. I

wish also to take this opportunity for expressing my appreciation of the efficient and conscientious service rendered by the present officers and employees of the Institution.

Respectfully submitted,

GEORGE I. LINCOLN,

*Superintendent.*

## APPENDIX B.

*To the Board of Managers of Thomas Asylum for Orphan and Destitute Indian Children:*

I beg to submit herewith my report as attending physician for the year ending September 30, 1902.

The following-named diseases have been under treatment since my last report:

Amenorrhoea . . . . .	1
Chicken-pox . . . . .	5
Chlorosis . . . . .	1
Conjunctivitis . . . . .	9
Contusion . . . . .	1
Convulsions . . . . .	1
Dysentery, acute . . . . .	1
Dyspepsia, acute . . . . .	4
Eczema . . . . .	11
Erysipelas . . . . .	3
Ivy poisoning . . . . .	2
Pneumonia . . . . .	3
Rheumatism, acute . . . . .	4
Scabies . . . . .	1
Sprain . . . . .	3
Tonsillitis . . . . .	4
Tuberculosis of glands . . . . .	8
Tuberculosis of intestines . . . . .	1

Tuberculosis of joints . . . . .	2
Tuberculosis of lungs . . . . .	1
Vaccinations . . . . .	77
Whooping cough . . . . .	5
Wounds . . . . .	2

---

Two deaths have occurred, one from tuberculosis of the lungs, the other from intestinal tuberculosis.

Although the list shows a large number of diseases, it is to be noted that the larger number are of the class due to inherited taint and depraved blood. There has been no zymotic diseases, and we have had less than the usual number of cases the result of exposure and errors of diet.

It is very satisfactory to be able to observe that pulmonary tuberculosis is steadily lessening in frequency. No doubt this may largely be attributed to larger air space, and better sanitary surroundings, which the new buildings afford.

The only unsanitary condition which I have observed during the year has been the condition of the drinking water. This has been somewhat contaminated as a result of the decayed condition of the wooden water tank. The speedy completion of the new water tower, now in process of erection, assures a supply of pure water for the future.

Very respectfully,

A. D. LAKE,

*Attending Physician.*

GOWANDA, N Y., *October 10, 1902.*

# REPORT.

---

*To the Legislature:*

As required by the statute, the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children beg leave to present their report for the fiscal year ending September 30, 1903.

There were 145 children in the institution on the first of October, 1902, since which time 19 boys and 11 girls have either been placed in families or returned to parents or guardians and thus discharged from the institution, and 37 children have been received into the institution, so that there are at present 59 boys and 93 girls under our care, making a total population of 152 children at the present date.

We are very glad to report that no deaths have occurred during the year. The report of the attending physician will call your attention to the excellent health of the children in general, the result of good sanitary conditions, abundance of outdoor work and exercise, suitable diet and proper clothing. In this connection we deem it proper to say that the allowance for clothing and provisions is, in our judgment, hardly sufficient, as it does not enable us to provide all the clothing that is really needed, nor are we able to provide a dietary which, in our judgment, is sufficiently generous.

The report of school work for the year is in the main very satisfactory, but we greatly need an industrial school building, for which we have asked an appropriation for several years. We deem it of the utmost importance that these boys should be

trained in trade work and the girls in domestic science more largely that it is possible to do at the present time. As the population has increased materially during the year, the school building is even more overcrowded than at the date of our last report, and the changes then suggested in location of toilet rooms and in the addition of another classroom are much needed.

The superintendent asks permission to purchase or lease 40 or 50 acres of land in addition to that which we now have, inasmuch as the farm is not large enough to meet the present demands of the institution. We believe that this purchase would be desirable. The superintendent also asks for the employment of a gardener, by which he means, as he states, a person thoroughly competent to give instruction in gardening and farming and in the care of dairy products. This is of especial importance in connection with these Indian children, as the great majority of the boys will become farmers and the girls will become farmers' wives. We commend this to your consideration.

It is gratifying to the Board of Managers and to the friends of this institution to see the positive evidences of good results from its training, to which the superintendent calls attention in his report and of which he gives the details. The object of this training has been to teach these Indian children a self-reliance based upon a knowledge of the better ways of civilization and their own fitness therefor; that they may rightly value moral rectitude and proper obedience to the laws of physical health and of cleanly living; that they may learn how to think and how to use their hands, and how they may best become self-helpful men and women—helpful not only to themselves but to those of their own race who may not have had the same advantages, but who feel their good influence and are led to profit thereby.

The superintendent's report, which is marked Appendix A, is respectfully submitted; also the report of the treasurer, Mr. Samuel G. Keyes, marked Appendix B, and the report of the attending physician, Dr. A. D. Lake, marked Appendix C, while Appendix D gives the names and nationalities of the children, showing the reservation from which each is received, and Appendix E gives a statement of the real and personal property of the institution.

## **SUPERINTENDENT'S REPORT.**

*To the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children:*

I present you herewith for your consideration and transmittal to the Legislature, as required by law, my annual report as superintendent for the year ending September 30, 1903.

The prediction that was made to you in my last annual report that the low per capita cost of last year could not successfully be maintained for the present year has proven to be a fact, and there has been a small increase in the per capita cost of maintenance. But I do not consider the present cost high; on the contrary, it is low, too low to permit of the carrying out successfully all of the objects and aims for which the institution was founded and incorporated.

It is my strong conviction that a more liberal policy should be pursued in the management and control of the institution; that its scope of education and training should be broadened so as to embrace the important trades— those trades that are most commonly employed in the country such as carpentry, painting and masonry. Education along these lines is no longer experimental. Its advantages and benefits are conceded by all who have given it careful and thoughtful attention. We are now giving instruction in a small way in these important branches, but we can not successfully prosecute the work unless the necessary equipment be provided. An industrial building is the first

requirement, and it is my hope that the Legislature will soon be convinced of its necessity and importance.

Permit me to say in this connection that I think the time has come when the name of the institution should be changed from the "Thomas Asylum" to the "Thomas Indian School." The educational feature of the institution is the predominating one, and it should be given a name in keeping with its work.

Greater attention and more intelligent consideration should also be given to agriculture. This is an important vocation, and the people are awakening to the fact that it is just as necessary to acquire a knowledge of this calling as that of any other trade or profession if it be made profitable. There should be in the employ of the institution a person thoroughly competent to give instruction in gardening and farming and the care of dairy products. It is not sufficient that the pupils simply be employed on the farm and in the garden at the ordinary routine work, but they need to be given instruction as to the kind of vegetables to plant on certain kinds of soil, its proper cultivation and tillage, the sort of crops that would be most productive, the quantity of seed needed and the time for planting, etc. They also should be instructed in the care of milk and its manufacture into the various products, especially that of butter; the care of the stock, the ventilation of the barns, the kind and variety of feed to increase the flow of milk; in fact, an almost unlimited number of questions that must be understood by a successful farmer. This is really an important industry and the most natural one for these Indian boys, as more of them will follow it for a livelihood than any other trade or calling.

The work in the school has been along the same lines that have been followed for the past two or three years and the same

course of study pursued. The graduating class was not large but the exercises were exceedingly interesting nevertheless, and the address given by the Hon. Carey D. Davey was instructive and most thoroughly appreciated. The large number in attendance from the reservation and surrounding towns was an earnest of the interest that is felt in the institution and its pupils.

The large girls are employed about the institution—in the laundry, kitchen and bakery. They are taught how to do ordinary household work; and each girl after she reaches a certain age is taught how and required to do her individual laundry work in the ordinary way and not by the use of machinery. The girls are also employed in the sewing-room and given instruction in plain sewing, mending and darning, there being two classes each day in charge of the teachers, and the older girls, so far as it is profitable or practicable, are taught how and required to make their own clothes, particularly those for every-day wear. The boys have assisted in the general work of the farm and in the garden, the planting, cultivating and the harvesting of the crops, the care of the stock, and have worked with the carpenter and painter in making the ordinary repairs.

The farm is a valuable adjunct to the institution. It produced fully one-half of all of the food supplies consumed the past year. This supply, however, could be largely increased and its variety varied by the employment of a vegetable gardener. The employment of this gardener, I am convinced, would not increase the expense of the institution, but on the contrary, it would effect a saving, for the extra amount of provisions produced would more than cover his salary, and besides the boys would have the benefit

of the instruction in this line of work that would be of great value to them.

In this connection I wish to renew my recommendation of last year for the purchase or lease of from 40 to 50 acres of land. The farm is not of sufficient size to meet the demands of the institution, and provision must soon be made for additional acreage.

Taken as a whole, I feel that the year just past has been most successful; that the influence of the institution has been uplifting; that those children who have gone out during the year, whether they have graduated or not, are better fitted to take up the duties of life and its responsibilities, and better prepared to earn a livelihood than they would be without the training they have received here; they will, in fact, make better citizens, thus enriching the State by adding to its wage-earning capacity.

The remark is sometimes made that it is a waste of time and money to attempt the education of these boys and girls or to train them in the trades, claiming that in a short time after they leave the institution they drift back to the reservation and soon fall back into the ways of their fathers and of their grandfathers and are Indians still.

That the Indians have and always will have characteristics peculiar to their race is admitted by all, and we do not claim or pretend to change those characteristics. The elm can not be cultivated until it becomes an oak, nor the oak be cultivated until it becomes an elm, neither can an Indian be trained and educated to the extent of eliminating those characteristics that are peculiar to his race. They are the characteristics that distinguish him as an Indian and it would be folly on the part of any one to try to change them, but we do aim to improve his con-

dition by giving him a higher and nobler conception of life, and we have demonstrated thoroughly that education and Christian training will do this; that it makes of them respectable men and women; that it inspires them with greater ambition and loftier purposes; that it increases their usefulness, and that it makes of them better citizens and neighbors. We know that the majority of the children who have gone out from the institution during the past eight years live better and cleaner lives; that their influence has been elevating and broadening; that they certainly are more self-helpful and more self-reliant than those who have received no education. We have convincing proof of this in the reports that we are constantly receiving.

For several years past we have followed the plan of placing some of the older boys and girls in families during the summer vacation. The boys have usually been employed on farms and the girls as domestics, and almost invariably from the people with whom these children have been placed we receive complimentary reports. Permit me to quote from a letter received from Mr. J. B. Smallwood, for whom one of the boys worked the past vacation:

“The boy fits into affairs here admirably; he is interested in everything and everybody. You could not have sent us a nicer or better boy. He is handling a yoke of steers and breaking them himself, and wants to show them at the county fair. How long can you let him stay? I am willing to pay him \$14 per month until November.”

Mr. Smallwood also stated in a personal interview:

“We never had a better boy of any nationality in our employ. He shows that he has had excellent training; he is a credit to you and the institution.”

Also permit me to quote from a letter from Mrs. Buell, in whose home one of the girls has been employed for two or three

vacation periods and is now and has been since she graduated last June:

“She has been a good and faithful girl, and while disappointed that she was not going away to school with the other girls, has now settled down contentedly. She has done her share of the work with a patient and loving spirit. And we all grow more and more attached to her and want to keep her. What a good and far-reaching work you and Mrs. Lincoln are accomplishing in the world!”

Many of the boys who have gone out from the institution have found employment in the manufacturing establishments in the different cities, many more are employed on farms, and with hardly an exception they have proven to be efficient and most satisfactory employees. Some have been transferred to other institutions such as Carlisle Indian School, and Hampton Normal and Agricultural Institute, and we have pleasing and encouraging reports from these. Mr. Turner, the chaplain at Hampton Normal and Agricultural Institute, stated while here that they were especially pleased with the two boys whom we transferred to them last year; that they were doing good work, and that they show that they had received most excellent training while here. Several of our graduates desiring to pursue their studies further have entered other schools, some at Fredonia, some at Lima, some at Gowanda and one at Geneseo, and I am pleased to state that they are not disappointing us in the least, but are taking hold of their studies with a zeal and determination that would be creditable to any child.

Permit me to mention the case of one boy who after he left here graduated from Chamberlain Institute, then worked on a farm during the summer to get some money with which to buy clothing, then attended school a year at Fredonia, working for part of his board while there, and is now employed in the Brooks

Locomotive Works. He wrote me the other day that he had been promoted and had been given an increase in his wages. He is scrimping and saving on every corner and laying by every cent that he can get so that he may enter college next year.

The girls who have married and settled down on the reservation are making for themselves clean, respectable homes, and are bringing into use the training and instruction received while here. Their houses are neat, tidy and orderly, and their home life in every way is respectable. The older they grow the more forcibly they appreciate the education they have received.

The institution has certainly been productive of much good. The results that have been accomplished and are being accomplished every year are not easy to estimate. Its influence has extended to every reservation of the State, and it is a strong factor in the education, development and advancement of the Indians of the State and in their preparation for citizenship.

We have been constantly reminded during the year of the increased interest that the public is taking in the institution by frequent visits of prominent people from almost every section of the State and of many other States. Many of them have shown their genuine interest by generous contributions of money, magazines, papers and of other articles for the amusement and edification of the pupils. Space will not permit me to make special mention of each favor, but I assure you of our hearty appreciation of each and every one of them, and I wish to take this opportunity of extending to them our most hearty thanks, and I trust that their interest will continue and that the management will always be such as to merit approval.

The results that have been accomplished in the past, the improvements that have been made and the larger field of usefulness to which the institution has been advanced is due to the combined efforts on the part of all who have official connection with the affairs of the institution, and it is with pleasure that we extend our thanks to the State Board of Charities for its counsel and advice; to the Fiscal Supervisor of State Charities for his fair consideration of the needs of the institution; to the Board of Managers for their kind courtesy, wise counsel and loyal support, and to the teachers and employees for their fidelity and cooperation.

Respectfully submitted.

GEORGE I. LINCOLN,

*Superintendent.*

IROQUOIS, N. Y.

## REPORT OF ATTENDING PHYSICIAN.

*To the Board of Managers:*

I beg to submit herewith my report as attending physician for the year ending September 30, 1903.

The following named diseases have been under treatment during the year:

Abcess .....	3
Amenorrhœa .....	1
Bronchitis, acute .....	7
Burn .....	1
Chicken-pox .....	2
Chlorosis .....	2
Conjunctivitis .....	9
Contusion .....	6
Dyspepsia, acute .....	3
Eczema .....	9
Herpes .....	2
Inflammation middle ear.....	1
Influenza .....	1
Ivy poisoning .....	4
Kidneys, congestion of .....	1
Lichen .....	2
Mumps .....	10
Pneumonia .....	7

Rheumatism .....	1
Scabies .....	11
Synovitis .....	1
Tuberculosis of lungs .....	2
Tuberculosis of glands .....	2
Tuberculosis of bone.....	1
Tuberculosis of joints.....	2
Wound .....	1
Dislocation, elbow.....	1

---

No deaths have occurred during the year.

It is very gratifying to note the continued decrease of tubercular affections among the children. Without doubt this is very largely due to the better sanitary condition of the institution and to the increased air-space made possible by the use of the new dormitories.

We can not divest ourselves, however, of the constant fear of infection which follows the reception of a case of consumption in the hospital. Here we have only two rooms in which patients can be kept—one for each sex. When consumptives are received they must be placed in one of these rooms, remaining in close contact with patients suffering from other diseases. The danger from communication of the disease thus becomes prominent. This danger would be averted during a part of the year by the use of tents.

This would also give these patients closer contact with the open air, a most desirable factor in the treatment of this affection.

Permit me again to advise that measures be inaugurated, if possible, for the transfer of our incipient cases of consumption

to the State Sanitarium for Consumptives as soon as that institution is prepared to receive them.

Very respectfully,

A. D. LAKE,

*Attending Physician.*

GOWANDA, N. Y., *September 30, 1903.*

## FORTY-NINTH ANNUAL REPORT.

---

### *To the Legislature:*

In compliance with the statute the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children beg leave to present their report for the fiscal year ending September 30, 1904.

There were 152 children in the institution on the 1st of October, 1903. During the year there have been 2 deaths and 16 children have been placed in families or returned to their parents and guardians, and thus discharged from the institution, while 23 have been admitted to it, so that at the present time there is a population of 157, of which 59 are boys and 98 girls.

The general conditions of health have been good, as will be shown by the accompanying report of the attending physician; the school work has been very satisfactory, but we greatly need the services of a farmer to take charge of the garden and to give the boys systematic instruction in agricultural work. The farmer whom we now employ is fully occupied with his many exacting duties and cannot be called upon for this special work which we regard as of great importance.

The appropriation for maintenance should be increased to \$30,000. With a population of about 160 children this would be only a fair appropriation when it is remembered that this is an educational institution. The present appropriation does not fully provide for suitable clothing and such a generous dietary as should be furnished.

Your attention is respectfully called to the inadequate appropriation made by the last legislature for equipping the new power house and its connections, and for furnishing the new laundry. When these were built the appropriation for equipping them was not granted and the appropriation last winter proved insufficient by about \$10,000. As a result these new buildings have remained unused for nearly two years to the loss of the State and of the institution for whose benefit they were intended.

The need of the second dormitory building for boys is most pressing and it is hoped that you may make necessary provision therefor in this year's appropriations.

Your attention is asked to the report of the superintendent sent herewith and to its several suggestions. An enlargement of the

school house seems imperative and proper provision should be made for covered ways leading thereto and connecting the dormitories for the better protection of the children in stormy weather.

The superintendent's report is respectfully submitted, marked Appendix A, also the treasurer's report, marked Appendix B, and the report of the attending physician, Dr. A. D. Lake, marked Appendix C. Appendix D gives the names and nationalities of the children, showing the reservation from which each child is received. Appendix E gives a statement of the real and personal property of the institution.

APPENDIX A.

---

*To the Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children:*

I present you herewith my report as superintendent for the year ending September 30, 1904.

The population of the institution has shown a steady yearly increase during the past ten years, from 104, in 1894, to 157 at the present time, and there are 5 now about to be admitted, which will make in October a total population of 162. The demands for admission are greater than ever before, but we have reached the full limit of the capacity of the institution as fixed at the time its reconstruction was decided upon.

The per capita cost of the institution has been reduced from that of the preceding year. We are trying to accomplish results. The main object of the institution is to take the waifs from the several reservations of the State and educate them, civilize and Christianize them, and train them so that they may be able to enter the industrial world on a plane with their white brothers, and be fully competent to cope with them. This cannot be done successfully unless we are permitted to employ competent instructors in both the scholastic and industrial branches of the school. As yet we have been unable to employ a person qualified to teach any of the agricultural pursuits in a scientific or up-to-date manner. This is an important line of training for these boys and it has even been suggested by some that they should be instructed along this line rather than in the trades. While I am decidedly in favor of teaching the agricultural pursuits, having urged and recommended it many times, yet from conclusions based on my observations of the Indians outside the institution, as well as of those boys that have come under my care, I do not believe that one line of industrial training should be followed to the exclusion of the others, but rather that all should be taught, for it is quite evident that a good farmer cannot be made of every Indian boy, neither can you make good carpenters or painters of them all. Some have natural inclinations for one trade, while others have just as strong an inclination for another. It is, therefore, essential that both the agricultural and the industrial features should be a part of the curriculum of the school, and a sufficient maintenance appropriation should be granted for this purpose.

The work in the educational branches of the school has been quite satisfactory. The children are showing a greater interest in education and are beginning to appreciate the benefits of the school, and we feel that greater effort is being made on the part of all to pass the required examinations.

The usual graduating exercises were held and it is gratifying to note that there is a continually increasing interest shown in these exercises. The hall was filled to overflowing, and I think it is safe to state that there were more people outside that could not get in than were in the hall. Rev. J. W. Purvis, delivered an inspiring address and Lay's Seneca Indian band, unquestionably the finest brass band in Western New York, furnished the music. Since we adopted the plan of graduation, quite a number of pupils have been graduated, and last year a start was made towards forming an alumni association, which is an evidence that the former pupils still maintain their interest in the institution, neither is their interest in education waning, for many of these graduates are continuing their school work in the high schools and State Normal schools, and one has entered college.

The boys in the carpentry class also made excellent progress. They really did some fine work, a sample of which was sent to the St. Louis exposition, and I am sure that it compared favorably with that of any school. The work done in the carpenter class demonstrates conclusively that they have the material from which competent carpenters can be made. The work in this class has not been confined to shop work alone, but they have assisted the carpenter in making the general repairs of the institution and the building of new work, so that they have thus had actual experience as well as being taught the theoretical part.

The division of the work and instruction of the institution has been so arranged that each boy has received some training in carpentry, and in agriculture, to the extent that our limited facilities permitted, such as assisting in the care of the dairy and the planting and harvesting of the crops, on the farm and in the garden.

The farm has maintained its standard of productiveness and has yielded a large return to the institution in the way of milk, butter, vegetables, fruits, meats, etc., the total market value of which amounted to \$4,079.40 for the year. This is certainly a satisfactory yield from a farm of only 100 acres. Permit me to state that this farm is a paying investment, for after deducting all of the expenses that can consistently be charged to the farm and garden, there remains a handsome margin of profit. While the returns

from the farm have been exceedingly gratifying, they could be enhanced very materially by the employment of a competent gardener, and I am greatly disappointed to learn that the classification commission has declined to grant the request of the board for the employment of such a person.

But very little has been accomplished in the way of new improvements during the past year, yet something has been done. The dormitory for boys was finished and occupied in the early spring. It was a much-needed improvement and one that is thoroughly appreciated by all. One of the old frame cottages has been moved and is being converted into a cottage for the employees. A conduit or basement to the connecting passage ways has been constructed from the dining hall to the dormitory for boys and temporary steam connection placed therein. The buildings have been repainted and repointed, a much-needed silo provided, and many other repairs and changes have been made out of the appropriation for "Repairs and Equipment." The new power house and laundry which were completed a year ago are still unoccupied owing to a lack of sufficient funds for their equipment.

An effort was made last year to secure a sufficient appropriation to complete the heating system in the new power plant and to extend the steam mains and to relay and to regrade the present ones but we found when bids were received that the appropriations were not sufficient. The total amount granted was, in round numbers, \$19,200, but out of this sum \$2,000 was for repairs and equipment, \$1,000 for furnishing the boys' cottage, and \$2,350 for conduits, leaving only \$13,850 available for new boilers and the other necessary steam appliances and equipment, and for moving the electric apparatus and for new electric cables. The total of the lowest bid for this work as per plans and specifications prepared by the State architect, amounted to \$23,031—in round numbers, \$10,000 more than the available funds. We will, therefore, need an appropriation of \$10,000 from the incoming legislature to enable us to complete the work, as mapped out by the State architect.

The present machinery in the laundry has been in use for a long time and much of it is so badly worn that it would simply be extravagance to attempt to repair it and reinstall it in the new laundry. An appropriation of \$1,000 is needed for new laundry machinery.

Another dormitory for boys is almost an imperative necessity. The present building that is being used for that purpose is terribly old and dilapidated and is really not fit for further use. With this dormitory provided for, the full number of dormitories contem-

plated in the plan approved by the State authorities will have been furnished, and it seems to me important that this building should not be delayed longer. An appropriation of \$16,000 will be needed for this purpose.

This dormitory provides for the accommodation of forty pupils, which is on a basis of \$400 per capita. This is certainly not exorbitant or unreasonable when you take into consideration that the building provides day rooms, locker rooms, lavatories, in addition to the dormitories proper.

With the increased population we find that the school building is overtaxed and it is necessary that an additional class room be provided. We also need a complete change in the toilet arrangements in this building, so as to provide for the entire separation of the sexes. This class room and much-needed toilet system can be provided for by an addition of something like sixteen feet to the rear of the building and it will not change, materially, the design for the grouping of the buildings that has been adopted by the State authorities, and in providing for this addition it seems to me that it would be wise to provide for the connecting passageways between the buildings of the west wing of the institution. These passageways are really a much-needed improvement. They not only will complete the general plan of the institution and add to its attractiveness, but will also provide protection to the children that must pass to and from the dormitory buildings to the dining hall and school building many times each day, regardless of the inclemency of the weather, and without these passageways the children are really subjected to severe exposure and great danger from colds, which often result in serious cases of pneumonia. I estimate that an appropriation of \$9,000 will be needed for this purpose.

Toilet rooms, lavatories and sewer connections are needed in the employees cottage, and an appropriation of \$500 should be granted for this purpose.

We had an unusually heavy freshet last spring and the main sewer was damaged to a considerable extent, it being practically cut in two in the middle and now empties or flows in the open field of an adjacent farm. This must be repaired, and I recommend an appropriation of \$200 for this purpose.

The dairy is a valuable adjunct to the institution. The milk is one of the largest items in the dietary, but with our increased population the present dairy is not sufficient, although it is as large as can be accommodated, and it should be increased, but in order to do

this an addition to the cow barn must be made and I earnestly recommend an appropriation of \$500 for the purchase of materials for this purpose, but that the work be done by the boys in the carpentry class, under the supervision of the instructor in carpentry. It can be done more economically in this way and will serve to give the boys actual and practical training in carpentry.

If an appropriation be granted for the boys' dormitory, the old building now occupied for that purpose should be converted into other use, and as we are without a store room, I would suggest that this be moved to a suitable location and converted into a general store. It will require about \$400 to make this change.

In all institutions there are many extraordinary repairs that are not strictly chargeable against the maintenance fund; repairs that need to be made to properly protect the buildings from decay, and I would advise and urge that an appropriation of \$2,000 be granted for repairs and equipment, so that we may have a fund that can be used for this purpose.

My experience in the past few years has convinced me that improvements at this institution can be made more economically by day's labor than by contract. We are so isolated that it is not easy for contractors to get skilled workmen to come out here. They prefer to work in the large cities or in some thriving village. I am, therefore, in favor of doing all of the work contemplated by these special appropriations by day's labor rather than by contract, except the steam extensions and the electrical work. The dormitory building for boys should be built by day's labor, and the boys of the institution should be given an opportunity to work with the others in its construction. It will be a most valuable education and training for them, and, besides, it will give them a feeling of ownership or proprietorship in the building and they will consequently have greater interests in keeping it in order and protecting it from harm by those mischievously inclined, and if this plan be approved, I am confident that this building can be constructed for \$15,000.

For convenience, I have arranged these items of special appropriations in tabulated form and attach them hereto.

As I have often stated, the institution is largely and almost purely an educational institution, and for that reason a more liberal per capita appropriation should be accorded it than is given to institutions that are merely custodial in their character, and figuring on a per capita cost of \$185 is certainly moderate and conservative, on a population of 160, we will need \$30,000 for maintenance, and

I trust you will urge upon the legislature the necessity of granting this amount.

While the fundamental principles and objects of the institution remain the same as at the time it was founded in 1855—that of caring for the orphan and destitute Indian children of the several reservations in the State—its scope has broadened and it has taken a wider field of usefulness and the educational feature is the pre-dominating one now. It seems to me that the time has come for changing the name, so that it will be more in keeping with the present work of the institution. For sentimental reasons, if for no other, I think the general public would be in favor of retaining the name of its founder and first benefactor, Philip E. Thomas, but the word "asylum" should be dropped, and I suggest that it be called either the "Thomas Indian School" or the "Thomas School for Orphan and Destitute Indian Children." The word "asylum" is repugnant and distasteful to many, it suggests a defective condition and it has no relation whatever to the character of the work now being done by the institution. I have made it a point to discuss this question with many people—those that are directly interested in charity work and those not so actively engaged—and with many of the Indians, and I have yet to find a person who is not in favor of eliminating the word "asylum." I am very anxious that the name be changed, it certainly will be in keeping with the progress and advancement of the institution and in harmony with the spirit of the times.

I wish to make public acknowledgement and to express here our thanks and appreciation of the hearty and substantial support that has been accorded us, during the past year, by the public and those in an official capacity. We have received many generous contributions to our Christmas fund, for which I wish, on behalf of the children, to thank you heartily, as well as personally.

Mr. W. F. Fisher, of Buffalo, the "St. Valentine" for the children here, again remembered each of the children with a valentine. This generous act on his part produces more happiness than can be estimated.

We are under obligations to Joseph Keppler for an annual subscription to *Puck*, to Mr. H. J. Wiesenheimer for several copies of the *Buffalo Daily Times*, to Mr. N. A. Ballard, of Olean, for a generous supply of magazines and other periodicals, to Mr. O. W. Pierce for a liberal contribution to be used in the purchase of swings, etc., for the children, to the management of the Erie County Fair Association for free admission to the annual fair.

to the management of the Iroquois Fair Association for a like favor, to the members of Lay's band for music furnished on several occasions, to Mr. and Mrs. W. R. Smallwood for a stereopticon entertainment, and to Mr. C. M. Parker for lecture and recitations: To all of whom we extend our cordial thanks.

Miss Lilla C. Wheeler has been most generous in her contributions of a large number of choice books for the children and for money and clothing donated to those that have desired to enter other schools, for which we wish to extend our hearty thanks and sincere appreciations. And to you, as a board, who have given us such loyal support and have worked so zealously to promote the interests of the institution and the welfare of those for whom it is provided, are entitled to our hearty thanks, and it is a pleasure to extend them thus publicly, and to say that your management of this institution demonstrates conclusively the wisdom of conducting institutions by boards of managers. I also wish to extend to the officers, teachers and other employees, thanks for the fidelity and loyalty with which each has served the institution.

Respectfully submitted,

GEORGE I. LINCOLN,

*Superintendent.*

IROQUOIS, N. Y., November 29, 1904.

## APPENDIX C.

*To the Board of Managers of Thomas Asylum for Orphan and Destitute Indian Children:*

I beg to submit herewith my report as attending physician for the year ending September 30, 1904.

The following named diseases have been under treatment:

Abscess.....	1
Bronchitis.....	5
Contusion.....	8
Conjunctivitis.....	7
Chicken pox.....	2
Chlorosis.....	2
Eczema.....	3
Endocarditis.....	1
Goitre.....	1
Impetigo.....	65
Inflammation of the middle ear.....	1
Ivy poisoning.....	3
Measles.....	7
Neuralgia.....	2
Pneumonia.....	1
Rheumatism.....	5
Sprain.....	2
Scabies.....	11
Tonsillitis.....	9
Tuberculosis of the lungs.....	2
Tuberculosis of glands.....	12
Tuberculosis of joints.....	1
Tuberculosis of spine.....	1

Only two deaths have occurred during the year.

We have had no form of disease that could be ascribed to unsanitary conditions, which, so far as I have been able to discover, have almost entirely been eliminated since the completion of the new buildings.

By the use of the tent, purchased through direction of this board, we have been able, during the past summer, to isolate two

cases of consumption, thereby removing a serious menace to the other inmates of the institution.

Very respectfully,

A. D. LAKE,

*Attending Physician.*

GOWANDA, N. Y., October 8, 1904.

### FIFTIETH ANNUAL REPORT

OF THE

### **Board of Managers of the Thomas Asylum for Orphan and Destitute Indian Children.**

---

*To the Legislature:*

In compliance with the statute the Board of Managers of the Thomas Indian School beg leave to present their report for the fiscal year ending September 30, 1905.

There were 157 children in the institution October 1, 1905. During the year 24 children have been received and 32 have been placed in families or returned to their parents and guardians, so that there is a population at the present time of 61 boys and 88 girls, making 149 in all.

The needs which we emphasized in our last report are still most pressing. The amount appropriated for maintenance is quite insufficient for properly feeding and clothing so many children. Your attention was called very urgently to this fact in our last report. The State of New York should provide suffi-

ciently varied food and ample clothing for these dependent children who are being trained for self-helpfulness. No less pressing is the need for the second dormitory for boys, to which we have already directed your notice. The appropriation therefor should be no longer delayed. The old building now used is decaying and unsanitary and should be at once abandoned.

We respectfully commend the superintendent's report, which we send herewith, to your careful consideration. Its suggestions are timely and of much importance. That report is marked Appendix A. The treasurer's report is marked Appendix B. That of the attending physician, Dr. A. D. Lake, is marked Appendix C. Appendix D gives the names and nationalities of the children, showing the reservation from which each child is received. Appendix E gives a statement of the real and personal property of the institution.

HENRY R. HOWLAND,

*President.*

SAMUEL G. KEYES,

LILLA C. WHEELER,

CORNELIUS SENECA.

## APPENDIX A.

---

*To the Board of Managers of the Thomas Indian School:*

In compliance with the statute, I present you herewith my report, as superintendent, for the year ending September 30, 1905.

The population is somewhat less at this time than it was a year ago. It was then 157, though the average through the year was 160.44, while at the beginning of the new fiscal year it is only 149. The institution has accommodations for only 138 pupils. Every pupil in excess of that number must occupy a bed with someone else. For that reason, I have endeavored to reduce the population, but it is not an easy task when there are so many applications for admission.

The work of the institution for the year has been along the same lines as previous years, and we feel that much has been accomplished and that the children have done well in their school work, in their carpentry and in their farming and gardening, and that there has been something gained for their good in each department.

The boys in the industrial trades, both carpentry and farming, have shown considerable progress, and their work has been of considerable value to the institution. The returns from the farm and garden have been practically the same as a year ago, again proving it to be a profitable investment aside from its educational value.

More than usual interest was manifested in our graduating exercises. The address to the class was given by Capt. Hamilton

Ward, Jr., of Buffalo. It was entertaining, instructive and forceful, and thoroughly enjoyed by every one present. The thanks of the institution are due him and they are gratefully extended. These graduating exercises are always a source of much satisfaction to those directly interested in the institution work, for it demonstrates to us most clearly the interest that the Indian people take in the institution, and shows their appreciation of the work that is being done for their children.

This institution has a great work before it. It not only has the education and elevation of a race of people that have been driven from their vast domains by a more prosperous people into little corners and patches scattered about the State, but it also has the changing of their lives—lifting them out of indolent habits into habits of industry and thrift. This can only be done by teaching them how best to cultivate the few remaining acres that they have, by proper instruction in the principles of economy and by such a thorough training in the trades as will make them skilful in whatever vocation they decide to follow. While we are able to accomplish and have accomplished results along this line in the past, we are severely handicapped for the lack of proper facilities. There is always a great demand for trained and intelligent workmen, and these boys and girls should be so trained that they will have an intelligent and thorough understanding of the trades, and with such a training there need be no fear of the future. That the Indian does advance and that he does improve is beyond contradiction. We see evidences of this on every hand, and while there occasionally may be one who has received some schooling, drifting back into the habits of his ancestors, there are many, many more who are demonstrating to the world each year their ability to be men and their capability to

cope with those who have had greater educational advantages and larger opportunities, and I believe that the Indian boy that has been properly trained should be urged and encouraged to seek employment outside the reservation. I am convinced that the money devoted to the education of these boys and girls will prove to be money judiciously spent, for as one generation succeeds another, the improvement will be most apparent, and I believe most emphatically that there is a moral obligation upon the State to protect the Indian and to properly educate his children, and that there is no stronger obligation upon the State nor one that should be met more willingly or freely, for the fields that we now occupy, on which we have built our homes, in which we take so much pride, were once theirs, which we occupy by right of conquest and not by purchase.

The training and education along agricultural pursuits is not receiving the consideration that its importance demands. Public sentiment has changed rapidly in the last few years in this regard. It is no longer thought that any one will do for a farmer, but rather that it is just as essential for a man to be educated for this pursuit as for the professional man to be trained in the profession he intends to follow—as it is for the carpenter or the mason to receive instruction in their respective trades. The boy who intends to follow farming as a vocation should understand the nature of the soil, so that he may know what crops will thrive best in different localities and the kind of plant food to use so as to get the largest possible yield. I thoroughly believe that the establishment of an agricultural department would be a profitable investment for the State, and that it would be the means of turning many unproductive acres on the reservation into well-tilled and well-cultivated farms.

But very little in the way of improvement was accomplished last year, owing to the fact that we were not given the necessary appropriations. We have, by utilizing the \$2,000 appropriated for repairs and equipment, been able to make temporary connections with the new power plant, and it is now occupied. The laundry apparatus, both new and old, will be installed in the new laundry, so that it can be operated by the 15th of December. The new power plant is nowhere complete, as much of the equipment provided for in the State Architect's specifications had to be omitted for lack of funds.

The imperative needs of the institution are the necessary equipment and facilities for giving instruction and training in agriculture and in the trades—those in most common use—carpentry, painting, blacksmithing and masonry. These departments should be established at once. They cannot in justice to these people be longer deferred, and I trust the incoming Legislature will make provision for them.

We have found by actual experience during the last five years that some changes are necessary in the school building to properly follow out the school work as outlined by the Department of Education. Another room is required to provide for an additional grade. The partition between the two classrooms on the first floor should be taken out and one built through the large schoolroom on the second floor. And what is equally imperative, is a change in the toilet arrangement in the basement, so that the sexes may be completely separated. In order to provide for this additional room for the extra grade, an addition will need to be built. This can be done by extending the L on the rear of the building fifteen or sixteen feet.

In the year 1896, a plan for reconstructing the institution was decided upon and approved. The old frame buildings were

veritable fire-traps, thoroughly saturated and impregnated with disease-breeding germs. They were in a dilapidated condition and had passed their usefulness. All of the buildings in the plan outlined have been provided for with the exception of one dormitory building for boys, and an industrial or trade school building, and it seems to me that it would be wise to provide for both of these buildings this winter, so that the group may be complete. I would also recommend that a sufficient amount be appropriated to properly furnish and equip these buildings and to complete the steam and electric plants as designed by the State Architect.

I also believe it would be wise and of great benefit to the pupils if a gymnasium were established in connection with the school, and I would recommend a small appropriation for gymnasium equipment and that the basement of the school building be fitted up for a temporary gymnasium. A physical director should be employed. People are awakening to the fact that it is necessary to give some attention to the physical development of the child, and that it goes hand in hand with its mental training, for if the body be defective, it is sure to have its influence upon the brain, and there are very few children without some physical defects that, if attended to while the child is young, may be easily corrected. In schools where a gymnasium is maintained, those in charge claim it to be of great value, and that it aids materially in maintaining proper discipline.

The law under which the institution is operated provides that all of the officers and employees shall reside at the institution, but we cannot comply with this provision owing to the fact that there are not sufficient accommodations; neither do I believe it is practical in every instance, but the farmer is required to be here

early in the morning and late at night, and it is really necessary that he make his home at the institution. Some provision should be made for him and his family, and I would recommend that the old dormitory building be moved to a suitable location and fitted up as a dwelling for the farmer. This can be done for a moderate sum.

A vegetable cellar is also greatly needed, and I would recommend that an appropriation be granted for this purpose.

No provision has ever been made for furnishing the employees' cottage, which was constructed out of one of the dormitory buildings. The building at the present time is bare and not at all cosy or pleasant, which adds to the discomfort of the people employed. I believe it is the duty of the State as well as of any large corporation to provide comfortable and pleasant surroundings for its employees, and I would recommend an appropriation for this purpose.

There is a large amount of exposed pipe between the several buildings that should be covered so that the steam plant may be operated with as little wastage as possible.

I wish to renew a recommendation that I made in a former report, that the work required for the completion of the institution be done by days' labor, employing the boys as far as practicable, and under the supervision of its officers, rather than by contract. I make this recommendation for two reasons—its educational value to the boys and that of economy. In support of this contention, permit me to state that before the appropriation of 1904, providing for a new boiler, steam and water extensions, etc., was asked for, an estimate was prepared by a representative of the State Architect's office and myself, covering the items in detail and giving the estimated amount that would be

required to accomplish each specified purpose. The appropriation was granted in accordance with this estimate. In every instance where the work was done under the supervision of the institution, the amount estimated for the purpose was found sufficient and ample, and in many instances a large saving was effected; but in those items on which bids were asked for the proposals exceeded the amount of the appropriation in every instance. I thoroughly believe that, if all the work had been done by day's labor, under the supervision of the institution, the estimated items would have been sufficient and it would not now be necessary to ask for an additional appropriation. The reason for this is apparent. The institution is practically isolated, and no contractor cares to come here and undertake the work without there is a fair margin of profit in sight.

For the completion of the institution and for carrying out some of the recommendations made above, the following appropriations will be required:

1. Industrial school building .....	\$7,500 00
2. Dormitory building .....	15,000 00
3. Addition to school building, including changes in lavatories and new classrooms .....	4,000 00
4. Gymnasium—fitting up the basement of the school building for this purpose and equipping same..	500 00
5. Moving old dormitory building and converting it into a cottage for the farmer.....	400 00
6. Vegetable cellar .....	500 00
7. Furnishing employees' cottage .....	1,000 00

*Steam and Electrical Equipment.*

8. New 150-H. P. boiler.....	2,700 00
9. Low pressure main from station B through con- duit to dining-hall and other buildings of the group .....	2,000 00

10. Conduit piping from main conduit to hospital and employees' cottage .....	2,800 00
11. Additional radiation in school building, day rooms of dormitories No. 1 and No. 2 and assembly hall	500 00
12. New electrical unit, 25-K. W. engine and generator	1,800 00
13. Electrical connections to dormitory No. 3.....	500 00
14. Equipment, including all necessary machinery and tools, electrical and steam connections in each department of the trade school, including agriculture .....	2,500 00
15. Pipe covering .....	4,000 00
16. Gas well .....	2,000 00
17. Repairs and equipment .....	2,500 00

I have made the item for repairs and equipment \$500 in excess of the usual amount for the reason that this fund was used entirely for other purposes this year; consequently, many of the repairs that should have been done this year had to go over until next season, and the cost of doing this kind of work does not grow less with age.

Items 9, 10, 11, 12, 13 are to provide for the items that were called for in the specifications prepared by the State Architect, No. 611, July 2, 1904, and No. 641, July 11, 1904, that were omitted from the contract for lack of funds.

The appropriation for maintenance for the past few years has not been sufficient to meet the demands of the increased population. A more liberal dietary should be provided than can be with the means at hand, and a more generous supply of clothing is also required. Besides, we must employ an additional teacher if we meet the full requirements of the school. The appropriation for maintenance should not be less than \$29,000, and I think

you, as a board, should urge upon the Legislature the importance of appropriating this sum.

I wish to take this opportunity to make public acknowledgment and to express our sincere thanks and those of the children to Miss Lilla C. Wheeler, Mr. Henry R. Howland, Dr. Dewitt Greene; Mr. Tracy C. Becker, Hon. George A. Davis, Hon. Louis W. Marcus, Mrs. A. B. L., Mr. W. H. Bard, Miss Sara Johnston, John W. Danforth & Co., Mr. W. S. Lawton, Mr. Walter J. Shepard, Mr. William L. Marcy, Mr. and Mrs. Henry Sprague, Harriet E. Ashley, Mary Dames, Mr. J. A. Anderson, Hon. Henry H. Persons, Mr. Thomas H. Noonan, Wm. Hengerer Co., Miss Lottie Preas, Arnold & Wallace, to the employees of the Institution and others unknown, for their generous contributions, either in money or in presents, to our Christmas festivities. To the publishers of "Puck" for an annual subscription, to George H. Daniels for two copies of the "Four Track News" for 1905, to Mr. H. J. Weisenheimer for several copies of the Daily and Sunday "Times," to the Erie County and Iroquois Fair Associations for free admission to the fair, to Hon. Harvey J. Putnam for providing a generous school prize, to Mr. O. W. Pierce for a large contribution for the purchase of swings, etc., to W. F. Fisher for valentines, to Mr. Andrew John for his contribution of a fine new whistle for the boiler, and to all others who have contributed in any way towards the advancement and to the pleasure and happiness of these children.

Our relations with the several departments at Albany have been pleasant and I wish to herein publicly thank each and all for the courtesy shown and for the evident desire on the part of each to advance the interests of the school and to assist in its administration.

You, as a board, have been most loyal in your support and most kind and painstaking in your consideration of the needs of the institution, as well as our personal comfort, and it is with pleasure that I extend to you my heartiest and sincere thanks. It is not the individual work of any, but the cooperation of all that has devolved out of what was an institution in name only, a school, that is accomplishing results and that is a credit to you and to the State.

The officers, teachers and employees have been zealous and faithful in their duties and have contributed much towards the prosperity of the institution and I wish to thank them one and all for this fidelity and for the cooperation and assistance that they have given me.

Respectfully submitted,

GEORGE I. LINCOLN,

*Superintendent.*

## APPENDIX C.

---

*To the Board of Managers of Thomas Indian School:*

I beg to submit herewith my report as attending physician, for the year ending September 30, 1905.

The following named diseases have been under treatment during the year:

Impetigo . . . . .	5
Conjunctivitis . . . . .	8
Scabies . . . . .	4
Tuberculosis of glands . . . . .	11
Tuberculosis of lungs . . . . .	3
Chlorosis . . . . .	4
Bronchitis . . . . .	8
Disorder internal ear . . . . .	1
Abscess . . . . .	5
Rheumatism . . . . .	4
Neuralgia . . . . .	2
Contusion . . . . .	2
Tonsilitis . . . . .	2
Dyspepsia . . . . .	6
Influenza . . . . .	4
Epilepsy . . . . .	1
Functional disorder of heart . . . . .	1
Chronic gastritis . . . . .	2

---

---

One death, from tuberculosis of the lungs, has occurred during the year.

It is to be noted that there is a decided decrease in the number of cases of all forms of tuberculosis. This is, without doubt, to be ascribed to the better sanitary condition of the institution, and the larger living and sleeping space which the new buildings provide. We are also enabled, by the use of the tents, purchased during the past two years, to more thoroughly isolate tubercular cases, as well as to give these patients the benefit of living, during a large part of the year, practically in the open air. Our experience has abundantly proven that the children are far more healthful during the summer months, when they not only obtain the benefit of life in the open air, but also, with the girls especially, when they can have the opportunity of plenty of exercise. The latter, to a large extent, is impossible for them in the winter time. This condition could be largely obviated by the use of a gymnasium which, without doubt, would conduce to their physical well-being, and would be a very valuable acquisition to the institution.

It is being continually demonstrated here that the application of good sanitary regulations and hygienic living are a sure way to healthful conditions. Our success in the prevention of disease among Indian children is well worthy of comment, when we consider the physical condition of the race from which they come.

The death rate on the several reservations of New York State is about thirty per thousand annually, whereas the death rate of Thomas Indian School is about eight per thousand, which has been the rate for several years past. In fact this exceedingly good result has existed since the adoption of modern sanitary appliances, and the erection of the new buildings, which beyond question has brought about the saving of many lives. Another

factor has been the early recognition of the contagious nature of tuberculosis, and the thorough isolation of patients suffering therefrom.

Very respectfully,

A. D. LAKE,

*Attending Physician.*

GOWANDA, N. Y., *September 30, 1905.*

### FIFTY-FIRST ANNUAL REPORT

OF THE

### THOMAS INDIAN SCHOOL.

---

*To the Honorable the Legislature of the State of New York:*

In compliance with the statute the undersigned, the Board of Managers of the Thomas Indian School at Iroquois, N. Y., beg to submit their report on the affairs of the management of the school during the year ending September 30, 1906.

During that period the school work has prospered. There has been no serious illness among the beneficiaries, and the work accomplished has, we believe, been of material service to the State.

We take the liberty of referring you to the excellent report of the superintendent, which is attached hereto, for the details of the past year's work, and we commend to your favorable consideration his suggestions as to the needs of the institution. We would especially suggest the importance of providing a farmer for the proper care of the farm and for the instruction of the boys therein.

We also call to your especial attention the necessity for some decided improvement in the public highway between Iroquois and Lawton Station. The institution is compelled to have its coal drawn from the railroad track at Lawton Station over this highway, and its condition during a considerable portion of the year is lamentable. We beg to express the hope that the Commissioner of Public Works may be provided with sufficient funds for keeping this road in proper repair.

The other appropriations asked for, as detailed in the superintendent's report, are, we believe, just and proper. We trust that they may receive favorable consideration. We send hereto attached the report of the treasurer for the fiscal year; the report of the superintendent, the report of the attending physician, commending these to your consideration.

Very respectfully,

HENRY R. HOWLAND,  
NEWTON A. CHAFFEE,  
SAMUEL G. KEYES,  
LILLA C. WHEELER,  
JOHN SCHOEPFLIN,  
WILLIAM S. LAWTON,  
IRVING R. LEONARD,  
WALLACE JEMISON,  
ALFRED JIMESON,  
CORNELIUS SENEAC.

## REPORT OF THE SUPERINTENDENT.

---

*To the Board of Managers of the Thomas Indian School:*

I beg leave to present you herewith my report as superintendent for the year ending September 30, 1906.

The capacity of the institution is practically the same as last year, although our statistical reports show an increase of two — 140 instead of 138. This was provided by substituting two three-quarter beds in place of single beds and figuring their capacity as two each instead of one. While we have in the past provided for a population as high as 160 and more, we have found that it was not advisable to crowd the institution to that extent; consequently, we made a determined effort to reduce the population until the new dormitory building is provided, and accomplished it in part — the average for the year being 149.

The per capita cost is considerably more than last year. This is due to the reduction in the population, an increase in the salaries, and to an unusual expenditure for coal during the winter, occasioned by the necessity of moving from the old power plant to the new, which required the operating of both plants for a considerable portion of the winter. The extra cost for this alone was nearly \$1,000.

The increase in the salaries paid several of the employees has been productive of much good, especially in the pay of attendants, enabling us to secure a higher grade of employees and to retain several valuable and worthy ones that were contemplating a change on account of the low pay allowed.

In this connection permit me to say that there are other increases that should be granted which would certainly tend to the efficiency of the institution. The salary of the farmer is not sufficient to secure to the institution a man of sufficient ability to properly instruct the boys in this important branch. The pay allowed by the Commission is not equal to that paid the ordinary

farmer. It is less than the prevailing rate of wages. The farmer should be one that has had special training in this branch and who has the executive force and ability to impart his knowledge to the boys, and in such a manner as to make them interested in the work.

The pay of the head teacher should also be increased. This position is one of great responsibility and means much to the success of the school. I believe that the salary of all employees of the State should be sufficiently high so that we may secure the highest standard of efficiency in all departments.

I am exceedingly gratified with the work of the institution in all of its departments during the past year. There has been a continual improvement and a greater interest manifested by the pupils in its several departments.

#### SCHOLASTIC DEPARTMENT.

This branch of the school has made excellent progress during the past year under the direction of Mr. John C. Brennan, the principal and his efficient assistants, and from his report we find the following number have been enrolled in the several grades of the school, including the kindergarten.

##### *Eighth Grade.*

David Sylveser,	Jennie Tallchief,
Grover Thompson,	Myra Skye,
Leroy Beeman,	Eva Henry,
Tillie Bluesky,	Flossie Ground.

##### *Seventh Grade.*

Carl Lay,	Augusta Jack,
Baptist Pallas,	Minnie Charles,
Wilber Skye,	Julia Snow,
Paul White,	Marjorie Jackson,
Florence Thompson,	Winifred Garlow,
Maysie Skye,	Geneva Thompson.
Grace Boyle,	

*Fifth and Sixth Grades.*

Albert Lay,  
 Franklin Jamison,  
 Arthur Johnson,  
 Cleveland Shanks,  
 Gilbert Powlas,  
 Mitchel Johnnyjohn,  
 Daniel Twoguns,  
 Mitchel White,  
 Dinah Scanandoah,  
 Betsy Johnnyjohn,  
 Lizzie Gypson,  
 Electa Doxtator,

Laúra Hill,  
 Theresa Lay,  
 Effie Snow,  
 Lizzie Johnson,  
 Rhoda Blackchief,  
 Agnes Jacobs,  
 Laura Jacobs,  
 Rachel King,  
 Lucy Charles,  
 Gertrude Pierce,  
 Emma Spring,  
 Rhoda Crouse.

*Fourth Grade.*

Robert Anderson,  
 Frederick Thompson,  
 Ora Halftown,  
 Lindsay Jackson,  
 John Connors,  
 Alfred Twoguns,  
 Reuben Williams,  
 Sherman Pierce,  
 Victor Skye,  
 Jemima Peters,  
 Grace Jamison,  
 Gertrude Jimerson,

Louise Green,  
 Ethel Charles,  
 Ruby Spring,  
 Mary Green,  
 Lucy Doxtator,  
 Rose Snow,  
 Ella Doxtator,  
 Alta Doxtator,  
 Helen Gibson,  
 Anna Skye,  
 Hazel Skye.

*Third Grade.*

Oliver Thompson,  
 Horace Thompson,  
 Archie Tallchief,  
 Roy Moses,  
 Lawrence Moses,  
 John Dear,  
 Cleveland Johnnyjohn,  
 Joseph Connors,

John Webster,  
 Ella Hatch,  
 Marjorie Jimerson,  
 Nellie Logan,  
 Nora Hill,  
 Ellen Doxtator,  
 Libbie Halftown,  
 Ida Jake.

*Second Grade.*

Lawrence Poodry,  
 Bert Moses,  
 Milo John,  
 Lawrence Cooper,  
 Dudley Poodry,  
 George Twoguns,  
 John Pallas,  
 Wyman Jacobs,  
 Jason Hill,  
 Ned Blueye,

Sherry Poodry,  
 Evangeline Clark,  
 Elsie Doxtator,  
 Mamie Crouse,  
 Gladys Logan,  
 Melissa Anderson.  
 Clara Logan,  
 Carrie Green,  
 Nancy Patterson.

*First Grade.*

David La Forte,  
 Lafayette Bullis,  
 Harvey Johnson,  
 Rutherford Lay,  
 Philo Jackson,  
 Laura Williams,  
 Oreno Pierce,

Elizabeth Snow,  
 Louise Patterson,  
 Lucy Thompson,  
 Lorenza Thompson,  
 Nettie Skye,  
 Alberta Parker.  
 Nora Ground.

*Kindergarten.*

George Crouse,  
 McCarthy Hill,  
 Newman Laforte,  
 Clifford Halfston,  
 James Warrior,  
 Aaron Kittle,  
 Israel Jackson,  
 Adrian Clark,  
 Renier Clark,  
 Elean Webster,  
 Emery Miller,  
 Nelson Twoguns,  
 Richard Kittle,  
 Lovina Charles,

Irene Poodry,  
 Mina Patterson,  
 Grace Wandle,  
 Ida Patterson,  
 Hattie Snow,  
 Eunice Joe,  
 Nancy Joe,  
 Madella Anderson,  
 Lorenza Bullis,  
 Irene Williams,  
 Malphena Thompson,  
 Louise Tallchief,  
 Lena Parker.

The Regents examinations were held in the months of January and June. The following gives a list of the subjects tried and the names of those who passed.

### JANUARY EXAMINATION.

#### *Reading.*

Grace Boyle,  
Marjorie Jackson,  
Maysie Skye,  
Geneva Thompson,

Florence Ground,  
Augusta Jack,  
Florence Thompson.

#### *Writing.*

Leroy Beeman,  
Tillie Bluesky,  
Florence Ground,  
Marjorie Jackson,  
Augusta Jack,

Maysie Skye,  
Jennie Tallchief,  
Geneva Thompson,  
Grover Thompson.

#### *Spelling.*

Grace Boyle.

#### *Elementary English.*

Tillie Bluesky,  
Eva Henry,

David Sylvester,  
Jennie Tallchief.

#### *Arithmetic.*

Florence Ground,  
David Sylvester,

Grover Thompson.

#### *Geography.*

Leroy Beeman,  
Tillie Bluesky,  
Augusta Jack,

Maysie Skye,  
Myra Skye.

### JUNE EXAMINATION.

#### *Reading.*

Tillie Bluesky,  
Eva Henry,  
Myra Skye,

Jennie Tallchief,  
Leroy Beeman.

*Writing.*

Eva Henry.

*Spelling.*Winifred Garlow,  
Carl Lay,Maysie Skye,  
Florence Thompson.*Elementary English.*

Maysie Skye.

*Arithmetic.*Tillie Bluesky,  
Myra Skye,

.Leroy Beeman.

*Geography.*Winifred Garlow,  
Marjorie Jackson,  
Carl Lay,Wilber Skye,  
Julia Snow,  
Florence Thompson.

The test of graduation adopted by the institution is the preliminary Regents examination of the State, which takes in the grade commonly known as the grammar grade. The following completed this course in June and accordingly graduated:

Tillie Bluesky,  
Eva Henry,  
Florence Ground,Jennie Tallchief,  
David Sylvester,  
Grover Thompson.

These have not only received the diploma of this institution, but are entitled to the preliminary Regents certificate of the State, which permits them under a recent law to enter any high school of the State without payment of tuition whether they are residents of the school district or not.

The Putnam prizes, provided by the Hon. Harvey W. Putnam of Buffalo, consisting of the first and second, the first being confined to members of the graduating class and the second to the entire school, except the kindergarten and first grade, were awarded as follows:

First: Jennie Tallchief.

Second: Myra Skye.

## MUSIC.

This is a most important branch of the institution, for the Indian people get more real enjoyment out of music than from any other form of entertainment, and, while they may not derive any special benefit from it financially, it certainly adds to their culture and to their contentment and to their future comfort and happiness. All the pupils have received instruction in vocal music and the following have been given instruction on the organ and piano.

*Organ.*

Electa Doxtator,	Rhoda Crouse,
Helen Gibson,	Gertrude Pierce,
Agnes Jacobs,	Effie Snow,
Lucy Charles,	Louise Green,
Lizzie Johnson,	Lucy Doxtator,
Gertrude Jimerson,	Marjorie Jamison,
Hazel Skye,	Rhoda Blackchief,
Anna Skye,	Julia Snow,
Nellie Logan,	Franklin Jamison,
Ella Hatch,	Grace Jamison.

*Piano.*

Florence Ground,	Minnie Charles,
Tillie Bluesky,	Laura Hill,
Eva Henry,	Emma Spring,
Florence Thompson,	Lizzie Gibson,
Myra Skye,	Rachel King,
Maysie Skye,	Betsy Johnnyjohn,
Geneva Thompson,	Grace Boyle,
Winifred Garlow,	Augusta Jack,
Marjorie Jackson,	Jennie Tallchief.
Laura Jacobs,	

## TRADE SCHOOL.

The manual training department or trade school, under the supervision of Mr. A. F. Lorenz, has made excellent progress during the year. This branch takes up only two trades — painting and carpentry. The work is so arranged that each boy above

the third grade is employed two half-days each week, and they have to a large extent done all of the repair work at the institution and have aided in constructing additions to the buildings. They have put in the partitions in one of the old frame nursery buildings so as to convert it into a home for the employees. They have done considerable of the painting and have been taught how to mix and prepare paint for use, and have made many useful articles of mission furniture for use in the institution, some of which were exhibited at the Erie County Fair and the Indian Fair and were awarded first prize at both places.

This department is of much value to the institution from an economical standpoint, for it provides the boys with a practical knowledge of the care and the handling of tools, which cannot help but be of great value to them in future life, even though they do not take up either branch as a trade.

The following gives a list of those pupils that have received instruction in these trades:

Carl Lay,	Albert Lay,
Baptist Pallas,	Arthur Johnson,
Wilber Skye,	Cleveland Shanks,
Paul White,	Mitchel Johnnyjohn,
David Sylvester,	Daniel Twoguns,
Leroy Beeman,	Mitchel White,
Robert Anderson,	Oliver Thompson,
Frederick Thompson,	Horace Thompson,
Ora Halftown,	Archie Tallchief,
Lindsay Jackson,	Roy Moses,
John Conners,	Lawrence Moses,
Alfred Twoguns,	John Deer,
Reuben Williams,	Cleveland Johnnyjohn,
Sherman Pierce,	Joseph Conners,
Victor Skye,	John Webster.
Gilbert Powlas,	

One of the urgent requirements of the institution is a competent instructor in farming and gardening, so that the boys may receive proper training in this important trade or vocation. When we stop to consider that this industry adds more wealth to the country each year than all of the manufactures combined, it

is but reasonable to expect with the sharp competition in the business world that it is important that a scientific and systematic training be given along these lines, so that the future farmer may be able to produce the largest possible yield at the lowest expense. We realize that there are vast undeveloped farming sections that will produce bountifully, and seem to require but little care and cultivation, yet we must admit that the eastern portion of the United States is rapidly filling up with people. Larger demands are being made upon the farm for its products, while its acreage is being lessened. It simply resolves itself down to a condition that must be met; larger yields must be produced; and it has been demonstrated thoroughly that this can be done. I know of an instance in this immediate vicinity where a certain farmer received scientific training indirectly through one of the professors of Cornell University, and is now making a specialty of potato culture, and produces from three to four hundred bushels per acre — fine, smooth potatoes — where the average farmer in the same vicinity does not produce but from seventy-five to one hundred bushels, and he receives a higher price for his potatoes because of their superior quality.

More of these Indian boys are going to follow farming than any other trade, yet we are denied an instructor in this important branch. To me this seems unreasonable, and I can only account for it in the fact that there has not been an organization among the farmers for their mutual benefit that there has been in other trades.

#### MAINTENANCE.

I believe the maintenance appropriation should be increased to \$30,000, and recommend that the Legislature be requested to grant that amount. On a basis of a population of 160, and that is the population at the present time, which is sure to increase rather than diminish, this is at a per capita cost of \$187.50, which is certainly low for an educational institution. The school aims to give a substantial literary education and training in some of the trades and in agriculture. It provides medical attendance and hospital care, which is no small item for a race of people that have tendencies toward tubercular afflictions.

## SPECIAL APPROPRIATIONS.

The committee on special appropriations, appointed by the Board, April 10th, consisting of Mr. Howland, Mr. Leonard, and Mr. Lawton, made the following report on appropriations:

“ We, the undersigned committee on special appropriations, recommend the following appropriations:

1. Dormitory building ..... \$18,000 00

With this dormitory building provided the group will be complete so far as dormitory buildings are concerned. The general plan as adopted provides for two dormitory buildings for the girls and two for the boys. Those for the girls have been built and one of them for the boys. This dormitory is badly needed as the old nursery building is in bad shape and unfit for occupancy, and the capacity is not sufficient to meet the requirements of the institution.

2. Addition to school building, including changes  
lavatories and classrooms ..... 4,000 00

A new grade is required in the school to conform with the work as outlined by the Department of Education, and the lavatories and toilet arrangements of the present building need to be changed so as to provide a more complete separation for the sexes.

3. Furniture and furnishings for Employees' Cottage and Dormitory No. 4, proposed.... 1,500 00

There is practically no furniture in the employees' cottage except some old that has been picked up and saved from the old buildings. It is really a barren looking place, while it should be made cheerful and cozy. And with the dormitory completed, which, if the appropriation is granted, should be by early fall, furniture will be required for that.

4. Gymnasium: Fitting up the basement of the school building for this purpose and equipping same ..... 500 00

The attending physician has recommended,

many times, the purchase of gymnasium equipment. It certainly will be beneficial in keeping the children in a healthy condition, and we earnestly recommend this small appropriation for this purpose.

- 5. Vegetable cellar ..... \$1,500 00

At present there is no place whatever for storing vegetables. Last season a part of the basement in the cow barn was used, but many of the vegetables froze, notwithstanding the exceedingly mild weather.

- 6. Purchase of additional land — about sixty acres ..... 2,500 00

The line on the east is very close to the buildings — so close that it is not only annoying to us, but to the adjacent property-owners. Besides with the present population a farm of 100 acres is not sufficient. We are compelled to rent twenty-five acres each year, which it does not seem to us the State should do, and when we are making the change we should increase it to a sufficient size for all time to come. We recommend the purchase of the twenty-five acres now leased and so much more as is necessary to change the line of the east side so as to run from the post situate on the east and north corner of land purchased by Job King, running thence to the southeast corner of the land leased of Mary Kennedy, there being about sixty acres, more or less.

- 7. Gas well . . . . . 2,000 00

The Legislature of 1899 granted an appropriation of \$2,000 for drilling a well. This well was drilled and quite a volume of gas secured. We began using it Thanksgiving Day of that year, and have continued to use the well until the present time. We are confident that saving effected by the well has been between three and four hundred dollars a

year — not less than three hundred — so the well has paid for itself, and while the flow is not as great as the first two or three years, there has been practically no diminution in the flow for the past four years. Using the success that we have had with the present well as a criterion to go by it seems that it would be a good business proposition to sink another well. We are quite confident that it will not be a total loss and it may be of sufficient capacity to supply fuel for the boilers especially in the summer season.

8. Cement walks . . . . .	500 00
<p>These walks are needed to connect the several buildings with the hospital and employees' cottage.</p>	
9. Moving old dormitory building and converting it into a cottage for the farmer . . . . .	1,000 00
<p>The present nursery building must give way for a new dormitory building, and we recommend that it be converted into a cottage for the farmer. Some sort of home should be provided for the head farmer and his family, as it is important that the farmer live at the institution.</p>	
10. New Electrical Unit, 25 kilowatt engine and generator . . . . .	1,800 00
<p>A new electrical unit should be provided, so that in case of accident to the present generator we would have something to resort to. Besides, the present generator is not of sufficient capacity to furnish all of the lights required.</p>	
11. Repairs and equipment . . . . .	2,000 00
	\$35,300 00

Respectfully submitted,  
 HENRY R. HOWLAND,  
 I. R. LEONARD,  
 W. S. LAWTON.

Subsequent to this report the Board recommended an appropriation for bay windows or open verandas for the hospital at an expense of \$400, where tubercular patients may be given special care, as urged by Doctor Lake.

These items represent needed improvements at the institution, and I recommend that a determined effort be made to secure the same from the incoming Legislature.

### SEMI-CENTENNIAL CELEBRATION.

This year being the fiftieth anniversary of the opening of the institution it was thought best to have some sort of a celebration commemorating the event, and as the institution was opened in June it was decided to hold the celebration in connection with the commencement exercises of the school, which occurred on the 22d day of June. A large number of people were in attendance from Buffalo and the surrounding towns, notwithstanding the very unfavorable weather.

It seems to me best to make some public record of these exercises, and for that reason I have embodied them in this report. The school closing exercises, or graduating exercises, were held in the forenoon in Stewart Hall, and the following program was observed:

#### *School Exercises 10.30 A. M.*

March . . . . . Semper Fidelis  
Lay's Seneca Band.

Invocation . . . . . Rev. J. Emory Fisher  
Piano Solo . . . . . Reveil Du Lion  
Mathilda Bluesky.

Advantages of Country Life . . . . . Florence Ground  
Commerce . . . . . Grover Thompson  
March and Song . . . . . The Musicians

#### *Kindergarten Children.*

Music . . . . . Jennie Tallchief  
The American Indian of the Past . . . . . Mathilda Bluesky  
Song . . . . . Gently Blows the Breeze

American Progress . . . . .	David Sylvester
The American Indian of the Future . . . . .	Eva Henry
Scarf Drill . . . . .	
Address . . . . .	Hon. Herbert P. Bissell
Presentation of Diplomas . . . . .	Mr. John C. Brennan
Awarding of Putnam Prizes . . . . .	Mr. I. R. Léonard
National Airs . . . . .	America
	Lay's Seneca Band.

Each of the graduating class prepared essays that were read at these exercises, all of which were good, but one is especially deserving of mention, "The American Indian of the Past," by Mathilda Bluesky, which I include in this report, to the end that the public may have some idea of what these Indian boys and girls are able to accomplish in a literary way.

#### THE AMERICAN INDIAN OF THE PAST.

As we all know, when Europeans set foot on our shores about four centuries ago, they found the country, all of what is now the United States, Mexico and Canada, a wilderness, already inhabited by wandering tribes of red men, and, adopting the name given to them by Columbus, they were called Indians. They were not Indians, or natives of Asia, but a race by themselves, which ages before the time of Columbus was spread all over North and South America. Like their descendants of to-day, they were tall, straight and well-proportioned; their skin was of a copper brown; their hair was long, black and straight; their faces beardless, and their cheek-bones high.

The Indians of that time were not a civilized race. This means that they made no progress, they had no written books or well-organized societies, arts, manufactures or agriculture. They lived in wigwams that looked as graceful as they were rude. Their clothing was made of the skins of animals and their food consisted of corn, beans, squashes and the flesh of the wild animals they killed in the chase.

Woman among the Indians was regarded as a drudge, whose business was to save man from the degradation of labor. It is not recorded that the women ever abused their privileges. They

never meddled with that which did not belong to them. They tilled the ground, dressed the food, nursed and brought up the children.

The Indian men, when young, were hunters and warriors; when old, counsellors, for all their government was by the council of the Wise Sachems. The consent of the warriors alone was not deemed sufficient, but the women, the mothers of the nation, were also consulted.

Our government, then, many centuries ago, was remarkable for its wisdom and adapted to the condition of the people. It was a powerful, democratic government, in which the rule of the people ruled.

The Indian at that time had no capacity for settled industry. "To try to civilize him was but to destroy his native virtues, 'The Great Spirit,' he said himself, gave the white man a plow and the red man a bow and arrow and sent them into the world by different paths, each to get a living in his own way."

The white man's laborious manner of life compared with theirs, they esteemed slavish and base, and the learning, on which he prided himself, they regarded as silly and useless.

An instance of this occurred at the treaty of Lancaster in Pennsylvania in the year 1744, between the government of Virginia and the Six Nations. After the principal business was settled, the commissioners from Virginia acquainted the Indians by a speech that there was a college at Williamsburg with a fund for educating youth, and if they would send half a dozen of their sons, they would be placed under the care of the Virginian government and instructed in all the useful and domestic occupations of the white people. One of the Indians replied that he knew the white people thought highly of the kind of learning that was being taught in their colleges, but they must stop to consider that different nations had different ideas of things, and they must not be offended if their ideas of education happened not to be the same as the white man's. He went on to say that they had had some experience of that kind. Several young Indians were brought up at the colleges of the northern provinces and were instructed in all the learning of the white people, and when they returned they were bad runners, ignorant of every

means of living in the woods; they were unable to bear either cold or hunger; knew neither how to build a cabin or kill an enemy, and were thought by the Indians fit for nothing. The Indians, to show how grateful they were to the white people for their kind offer, offered to take half a dozen white sons and take great care of their education and instruct them in all they knew and make men of them.

You must not think from all this that the Indian had no good qualities, for under his tawny skin there beat a human heart, and in every human heart there is something divine. They were often hospitable and generous. When they were well-treated they generally showed friendship and fidelity.

The Indians believed there was one powerful being who ruled over all, and that was the Great Spirit. Idolatry was rare among them.

In war they were brave and high spirited, but treacherous, revengeful and cruel beyond description. They prided themselves on their stoicism and they were noted for their eloquence.

The day that the white colonists landed here they were like a little feeble plant, which wanted a little of our earth on which to grow. The Indians gave it to them, and when they could have trodden them under their feet, they watered and protected them. In return the white people gave them rum which has slain thousands. I do not say that they did not give them more than this. We know that they did. The progress which our race makes will be due to the Indians' veneration and emulation of the white people.

HON. HERBERT P. BISSELL

delivered an instructive and inspiring address. He spoke as follows:

*Mr. Superintendent, Members of the Graduating Class, Ladies and Gentlemen:*

The pleasure which I have derived from the invitation to deliver this address has been somewhat modified by the anxiety I feel to give expression, in a way that will be effective and not uninteresting, to some of the serious thoughts inspired by this occasion, and to present to the members of the graduating class

counsel that will be not only suitable but useful at this important epoch in their lives.

At the outset, I wish to congratulate heartily the Board of Managers, the superintendent, and the instructors of the Thomas Indian School upon the very satisfactory results which their devoted labors have achieved for this excellent institution.

The Greek philosopher, Plato, declared more than 2,000 years ago that "Of all wild beasts the boy is the most difficult to manage." I am very glad, as the father of several daughters, that the philosopher did not include girls in his censorious remarks. But when I reflect upon my own school days, I cannot but feel that there have been boys, even in this Christian era, very much like the Athenian boys of Plato's time. I can readily understand that the heedlessness of boyhood is sometimes so exasperating to instructors that they are obliged to keep their good nature and practice saintly forbearance, under circumstances almost as trying as those in which the poor Irishman found himself when he was walking leisurely along a country road, and, being suddenly charged down upon by an angry bull, was thrown violently over a high rail fence. Pat picked himself up, looked around at the infuriated bull which was pawing and tearing up the ground; then, deciding to make the best of it, smiled good-naturedly and exclaimed: "Ah! ye brute, if t'were not for your bowin' and scrapin' and your humble apologies, be jabers, and I would suppose you had trun me over that fince on purpose."

But, in spite of the trials which teachers are so often obliged to endure as the consequence of youthful thoughtlessness, it seems to me that no one can derive more genuine satisfaction from the performance of successful labors than the patient tamers of these wild beasts. To guide and instruct the young is, indeed, a noble and a responsible calling. The good or bad characters of the men and women of America must depend, in a large degree, upon the influence, tact and wisdom of our school teachers; for, as Quintilian quaintly says: "We are very tenacious of what we imbibe in the dawn of life, in the same manner that new vessels retain the flavor that they first drink in."

No name is more revered in England than that of Thomas Arnold, whose example as head master at Rugby wrought such

a great change in the English public schools, that he is credited with having introduced the principle of morality into English education.

Dean Stanley, who was one of his pupils, relates the story, that on one occasion, when, in consequence of a disturbance, Dr. Arnold had been obliged to send away several boys, in the midst of the general spirit of discontent which this excited, the famous head master stood in his place before the assembled school, and said: "It is not necessary that this shall be a school of 300, or of 100, or of 50 boys, but it is necessary that it shall be a school of Christian gentlemen."

It was this principle, steadily adhered to, that raised the standard of scholarship and character at Rugby to such a high degree that Dr. Arnold's pupils became the prime favorites of the English universities.

I think that we very well understand what a gentleman is without the necessity of definition or explanation.

Far too often,  
 "The grand old name of gentleman,  
 "Defamed by every charlatan,  
 "And soiled with all ignoble use."

is made to depend upon the individual distinction, obtained through wealth, social position, or celebrated achievements; but we know that the true gentleman is the man, in any and every walk of life, who is moral and upright in his conduct and dealings, and kind and considerate in his treatment of others. The true gentleman is the man who would do unto others as he would have others do unto him.

Here, in this cheerful secluded world of yours, you enjoy a freedom from temptation, and an opportunity to inculcate a high sense of morality, which must enable you to build characters that will hereafter be strong enough to resist the evil forces of the greater world outside. Your school curriculum cannot fail, if faithfully followed, to insure to the scholars well-disciplined minds and a truly liberal education — that education which is the necessary foundation of all high attainments, and has been truly called, "The best succor in adversity, the truest luxury in prosperity."

Up to a certain point, the education of all youth should be substantially the same. The end, in all cases, is to train them up to be intelligent, thoughtful, virtuous and useful men and women, capable of turning their talents to account in whatever situation they may be placed. Although it may be impossible for many of us to put into practice the advice to "Learn something of everything and everything of something," we must, nevertheless, seek to obtain that broad and liberal education which will make us receptive of special training thereafter, and of high attainments in practical life.

If students ask what a school can do for them, the true answer is: It can do for *them* only what they do for *it*, in its good name and character as an institution of learning. A school and its students are trustees for each other. They give and take, and each is richer by the process. I cannot recall truer words than those spoken by a great president of Harvard College, who said to his students: "It is a superficial view of things which leads to the distinction between education and self-education. In point of fact, all education is self-education, the only difference being that education in churches, schools and colleges, and amidst libraries, museums and laboratories, is self-education under the best advantages.

We can find no happier occasion than that which permits us to stand face to face with young and ardent searchers after knowledge. The student is always an object of interest. His presence is an inspiration, and his face an open book on which are written a hope and a prophecy. This occasion, commemorative as it is of the fiftieth anniversary of the founding of this excellent institution, is a fitting time for its graduates to lay the foundation for a noble career.

It would perhaps be more in harmony with the times, if I should speak to you on some theme of immediate and pressing importance. Many such themes there are; but I beg of you to believe it is not because I underestimate their importance that I have chosen to ask you to rest for a little while in a serener air.

The hungry problems of to-day will have their hearing without asking permission of you or me. The age is restless; it is self-assertive; it is pleased with the sound of its own voice, and con-

fidant in the strength of its own arm. And yet in its heart there is a profound sorrow. When men turn their minds persistently to social and economic questions; when labor is dissatisfied and capital alarmed; when criminations and recriminations are exchanged among the organized forces of the country, we may be sure that something is out of place in the machinery we call civilization.

Men are earnestly considering many evils, and proposing many remedies. The public conscience has been awakened, and we have been startled by exposures of graft, of injustice, of corruption and of breaches of trust. We are sometimes reminded of the death-bed advice of the old Roman merchant to his son, "My son, make money; honestly if you can; but at any rate make money!"

Critical observers call this the Commercial Age; but of late it would seem as if it might more properly be called the Hysterical Age; for the disposition to go to extremes, both of praise and denunciation, seems to meet with popular approval. The well-known rule of logic, which forbids broad generalizations from particular instances, is violated whenever even a small percentage of evil is exposed.

I think that we here today should remove our gaze from the muck rake, and try to follow for a while the advice of Democritus, the philosopher of laughter, cheerfulness and hope, leaving Heraclitus, the philosopher of weeping, woe and pessimism, alone with his troubles.

This anniversary is dedicated to the young, the ambitious, the joyous and the generous; and I prefer to gaze with you upon the glad field of optimism, where beneath the bright sun of high expectations and good wishes, cheerful hopes and happy results must flourish.

Time was when a liberal education was regarded as unnecessary for any one but a professional man; but today the value of such an education is everywhere appreciated by men of business, as well as by men and women in all the walks of life.

The value of a liberal and a thorough education is best shown in Germany, where, not only grade schools, but trade schools are developed to the highest point, and those who are to engage in business with foreign countries acquire two or three languages

beside their own. This method is rapidly placing Germany in the lead in the race for industrial success and the markets of the world. In an article just published on the urgent need of trade schools in the United States, Mr. F. A. Vanderlip, formerly Assistant Secretary of the Treasury, and now Vice-President of the great City National Bank of New York, says: "The school-master is the great corner-stone of Germany's remarkable commercial and industrial progress. The school system of Germany bears a relation to the economic situation that is not met with in any other country."

As an illustration of German thoroughness, the story has been told that when the Franco-Prussian war broke out in 1870, the news that war had been declared was first announced to General Von Moltke, commander of the Prussian army, while he was in bed. He immediately said to his servant: "Go to my dressing case, and in the top drawer, on the right hand side, you will find a plan of the campaign." Battles are won by education and preparation as well as by bravery on the field, just as success in the trial of cases at law is achieved by thorough work in the office before the struggle in the court room begins.

A further example of the value of preparation is found in the recent Russo-Japanese war, where the complete victory of the Japanese midjets over the Russian giants was really won by the splendid work of preparation by Japanese students in the best schools of the world. They took the best that we could give them at West Point and Annapolis, and at Harvard, Yale and Cornell; and the best also at the English, French and German institutions of learning, with the result that both on land and sea they won enduring laurels through their successful and intelligent bravery. Their skill in sanitation alone made one little Japanese soldier equal to at least three Russian giants in the conflict with disease.

How useful and valuable, indeed, is the ability to speak even one more language than our own! You remember the thrilling story of the sinking of the Merrimac in the Spanish-American war of 1898 by Richmond Pearson Hobson and his companions. This brave young officer, who graduated at the United States Naval Academy at the age of 17 first in his class, is a typical example of the new American, highly trained and educated both

mentally and physically, thoroughly imbued with patriotism and honor, and capable of applying his attainments and moral force to new problems and emergencies as they arise. Soon after the Spanish fleet had entered the harbor of Santiago, and the American fleet under Admiral Sampson had formed a blockade outside, the fear arose that the Spanish ships would make a dash on some dark and stormy night to escape; and this led to one of the most daring and brilliant exploits in history. The entrance to the harbor is narrow and tortuous and but 440 feet wide at the mouth of the channel. The plan was formed to obstruct the entrance by sinking across the channel a steam coaling vessel 300 feet long, loaded with 2000 tons of coal. Lieutenant Hobson with seven picked men, eagerly volunteered to carry out the plan, and through the intelligent bravery of this young commander not a single life was lost.

As soon as the Spaniards discovered the approach of the *Merri- mac* in the darkness, they opened upon her with their batteries from both shores, and she was subjected to a fire which it would seem must riddle her like a sieve and kill every man on board. But under the direction of the cool-headed and daring lieutenant, the collier was swung into the right position and, but for the shooting away of the rudder, would have been sunk directly across the channel, and would thus have effectively blocked it.

Having accomplished as nearly as possible the perilous task (of which Admiral Sampson, in his report to the Secretary of the Navy, said: "I venture to say that a more brave and daring thing has not been done since Cushing blew up the *Albemarle*") the gallant party was obliged to remain clinging to a raft until morning, avoiding detection by the picket boats whose crew would have shown them no mercy by concealing themselves in the water under and about the raft, until Hobson, through his perfect knowledge of the Spanish language, recognized the Castilian dialect of the Spanish officers who came out to reconnoitre, and immediately hailed their boat and safely surrendered himself and companions as prisoners of war to Admiral Cervera. In this case, a knowledge of the Spanish language surely had a distinct value, for it saved the lives of Hobson and his gallant crew.

But I must not detain you longer. I cannot close, however,

without paying a brief tribute of respect to the memory of that noble-hearted founder, of whom this day is especially commemorative. You, as graduates of this institution, should never be unmindful of your grateful obligation to Philip E. Thomas, the simple Baltimore Quaker, to whose benevolence this institution owes its origin. "He is ungrateful," says Seneca, "who denies that he has received a benefit; he is ungrateful who conceals it; he is ungrateful who makes no return for it, but most of all is he ungrateful who forgets it."

I feel sure that you, and all good Americans, will ever bear in grateful remembrance the good work of the noble-minded and kind-hearted man who contributed liberally of his own means, and devoted his influence and personal efforts to the establishment of this institution, where orphan and destitute Indian children can receive "proper care, moral training and education, and instruction in husbandry and in the arts of civilized life."

What more enduring could this beneficent man have erected to bear his honored name to a grateful posterity? How little did the retiring Puritan youth, who gave his library of 320 volumes and the sum of \$4,000 to aid the general court of Massachusetts to establish the first great educational institution in the new world, realize that such a man as Josiah Quincy would one day say of him: "The noblest and purest tribute to religion and science this western world has yet witnessed was made by John Harvard in 1638."

The America people will ever remember, with especial gratitude, men like Elihu Yale, John and Samuel Phillips, Samuel Deveaux, Ezra Cornell, John D. Rockefeller, and the many others whose benefactions to educational institutions in this country will extend their blessings to many generations yet unborn. And the name of Phillip E. Thomas is entitled to a place on this memorable roll of honor.

Nor should gratitud be lacking from you to the imperial commonwealth in which we live, the great State of New York, several of whose distinguished officers have honored this occasion by their presence to-day.

We can depend upon it that the State of New York will forever aid and protect its Indian wards in all of their rights, just as it

has furthered the benevolent plan of Philip E. Thomas, and aided and protected the orphan and destitute Indian children of the State by the establishment and maintenance of this splendid institution.

REMARKS BY MR. BRENNAN TO THE CLASS ON THE PRESENTATION  
OF DIPLOMAS.

*Members of the Graduating Class of the Thomas Indian School:*

It is with a marked degree of pleasure and satisfaction that I now speak to you.

It is occasionally well for us to take a serious view of life. I would briefly compare life to a book. We must each write one volume. There is to be but one edition and therefore no chance for revision. It covers the period from the cradle to the grave. Our purpose in this world forms the frontispiece. It is illustrated by noble deeds and written in the language of every day life. It is bound in the estimation of other people, but the real worth is not in the cover. When the last page is complete, it is to be given up to the Great Librarian and deposited in the library of eternity.

Members of this class, you have begun your books. The work of to-day completes the preface. It is time for you to decide upon a purpose in life, which shall form the frontispiece. You go forth from here to begin the first real chapter. May the first and all succeeding chapters be written with care.

I am about to present to you diplomas, which stand for the highest honor this institution can confer. The diplomas in themselves are of little value; yet they mean much. They cost labor, diligence and perseverance. You paid the price; they are yours. They mean also, that because you have won these, you can go forth to win greater victories and greater honors. Therefore, I present them to you as a seal for the past and as a sign for the future.

The anniversary exercises were held in the afternoon, but owing to the large number of people that were in attendance, these exercises were held upon the lawn and the following program was arranged.

## ANNIVERSARY EXERCISES 2 p. m.

Overture . . . . . Rival  
*Lay's Seneca Band*

Address of Welcome . . . . . Supt. George I. Lincoln  
 Historical Sketch of the Institution. Mr. Henry R. Howland, Pres.  
 Chorus . . . . . Dear Columbia  
*School Children.*

Address . . . . . Hon. James G. Johnson  
 Warrior's Dream . . . . . Cornet Solo  
*Master Alanson Lay.*

Short Speeches by:

Mr. Theodore F. Jamerson,  
 Hon. Robert Lynn Cox,  
 Hon. James M. Wadsworth, Jr., Speaker of the Assembly.

Solo . . . . . Miss Molly B. Jemison

Short Speeches by:

Hon. George A. Davis, State Senator,  
 Hon. M. Linn Bruce, Lieut. Governor.

Hon. M. Linn Bruce did not attend, owing to illness, which was a disappointment to all. Owing to a heavy shower, these exercises were broken into and only partially carried out. I would like to publish the address of each speaker, but am able to get a copy of only the following:

HISTORICAL SKETCH OF THE INSTITUTION  
 BY MR. HENRY R. HOWLAND, PRESIDENT.

The Thomas Indian School stands to-day pre-eminently as a witness to the self-sacrifice and devotion to the deeds of mercy, charity and love of two noble missionary workers who labored here in days long since gone by with unselfish hearts and humble souls and without hope of other reward than His, sought only to do their Master's bidding.

Reverend Asher Wright and Laura M. Wright, his wife, who was his helper in all good things, first came to the Senecas when they were still upon the Buffalo Creek Reservation, sent by the

American Board about 1830. From that time until the close of their earthly days they made their home with this alien people, following them to the Cattaraugus Reservation when the Buffalo Creek lands were sold in 1843, giving up their whole lives to the task of teaching the Senecas the ways of civilization, of thrift and helpfulness as being inseparably connected with the ways of Christ. They were greatly beloved; their sympathies were sincere, their words like their deeds were honest and true and no influence has had a more abiding effect in bettering the condition of this people physically, morally and spiritually than that of those two faithful souls who taught by their own example.

The Society of Friends had established a boarding or industrial school upon this reservation, where for about fifteen years Indian girls had been boarded and taught to work while receiving elementary instruction. Soon after Mr. and Mrs. Wright came to the Cattaraugus, in 1845, the school discontinued. About this time the Indians had made a change from their old tribal form of government by chiefs, to that "republic within a republic" under which they still continue their corporate existence. An attempt was made by the new government to reopen the industrial school, but there was no money for its maintenance and the effort failed after three or four months' trial. In the summer of 1854 an Indian died on the reservation leaving a large family of children in extreme want. This led to an investigation which showed that there were about fifty orphan and destitute Indian children on the Cattaraugus Reservation in a condition of wretchedness and direct need, helpless and exposed to the most degrading influences, and at once Mrs. Wright began an effort for their relief. She applied to several persons for help in establishing an asylum upon the reservation and wrote to Phillip E. Thomas of Baltimore, an aged and highly honored member of the Society of Friends, long known as a devoted helper of the Indians. Mr. Thomas was a man of wealth, who had been the first president of the Baltimore & Ohio Railroad, which had largely owed its success to his abilities. He came at once to the rescue and authorized Mrs. Wright to take into the Mission House as many of the most destitute children as she could receive and care for them there at his expense. The American Board granted

their permission and that winter ten children were taken into her family, where they remained for about a year and a half until the asylum building was ready for occupancy. Their stories were pitiful; all were in rags and all were suffering from hunger and exposure, and it was as if the gates of paradise had opened to them when this gentle mother to the poor took them to her home and her heart. When she wrote the record which was placed in the old cornerstone, she said "May it excite the pity of future readers, and lead them to search thoroughly and ascertain if there may not be somewhere in their day similar objects of charity. If not, let them bless God for the happier times in which their lot has fallen."

After the work had been thus begun, Mr. Thomas suggested that possibly aid might be procured from the State for this charitable undertaking, and the council of the Seneca Nation having passed resolutions approving of the project and authorizing the sale of such land as might be required for it, ten persons, of whom five were whites and five Indians, associated themselves as trustees and applied for a charter of incorporation. Mr. Wright went to Albany and so presented the needs of the unfortunate children for whom he spoke that on the 10th day of April, 1885, an act was passed incorporating the "Thomas Asylum for Orphan and Destitute Indian Children" and an appropriation of \$2,000 was given for the erection of a suitable building therefor.

On the 27th of April, 1885, the trustees organized under their charter and elected Samuel G. Ellis as president, Reverend Asher Wright as secretary, and Dr. Eben M. Pettit as treasurer.

In May the trustees purchased fifteen acres of land from Caleb Davis, and work having been begun in the summer, on the 14th of September, 1855, the cornerstone of the original building was laid, as Mrs. Wright touchingly says, "in hope that He, who cares for the poor and the orphan and whose kind providence feeds the raven and clothes the lily, will smile upon the enterprise and furnish the means for carrying it forward to a happy completion and render it an efficient instrumentality in relieving human misery and promoting the welfare of the people for whose benefit it is especially intended."

I am glad to state that one of the present Board of Trustees who is with us to-day, Mr. Newton A. Chaffee of Gowanda, was one of those who were present on the occasion of laying the first cornerstone and I hope that there are others present who were witnesses of that first beginning of this noble charity.

The lateness of the season and the severity of the following winter prevented the early completion of the building. Mr. Thomas went to Washington to enlist the interest of the United States Commissioner of Indian Affairs and obtained a grant of \$500 for the asylum. The Legislature of 1856 appropriated an additional \$1,500 to enable the trustees to carry out the provisions of their charter, and thus \$4,000 was provided for the asylum buildings, which cost \$4,046.28. Fairs and concerts by the Indian band were held in Jamestown and Buffalo. Mr. Thomas and the Society of Friends sent them \$780 and many others contributed further sums towards furnishing the building and towards the maintenance of the beneficiaries, and on the 21st of July, 1856, just fifty years ago, the ten children were removed from the Mission House to the shelter of the institution, which had been named after the generous benefactor who had made it possible for Mr. and Mrs. Wright to carry out their benevolent purpose. Within a year the number of children had been increased to forty-five. Mr. N. H. Pearce was the first superintendent and Miss Jane Shearer the first matron.

For nineteen years the work was carried on under great difficulties and discouragements. The aid extended by the State was small; frequent appeals were made to the benevolent public, whose contributions were the main reliance of the management, and the enterprise must have been abandoned for lack of support had not its beneficent purpose awakened the interest of Hon. William Prior Letchworth, then Vice-President of the State Board of Charities, whose life has been so long devoted to the aid of his fellow men, with such results as have made his name honored and blessed throughout the land. He enlisted the special interest of Senator Daniel P. Wood, and in the winter of 1875, at his suggestion, Reverend Asher Wright, then enfeebled by years, appeared at Albany in behalf of these Indian children, accompanied by his tried friend, Dr. E. M. Pettit, the treasurer of the

asylum. By their efforts, furthered by Mr. Letchworth, Senator Wood and others, the act of April 24, 1875, was passed, by the provisions of which the trustees transferred all the property of the asylum of the State of New York, which then assumed the responsibility for its care, placing it among the State institutions subject to the supervision and control of the State Board of Charities, and requiring its managers to receive destitute and orphan children from each of the several Indian reservations located within the State, and to furnish them with "such care, moral training and education and such instruction in husbandry and the arts of civilization as they shall provide by their rules and by-laws."

I will not weary you with an account of the work as it has been carried on since that time. There have been several superintendents and many successive boards of managers. The present administration has lasted since 1895, when a new board of managers was appointed by Governor Morton, and the present superintendent, Mr. George I. Lincoln, and his devoted wife, Mrs. Lincoln, the matron, were placed in charge. At that time the old buildings were fast falling to decay and the State Board of Charities, acting upon the suggestion of Hon. Wm. R. Stewart, then its president, who became especially interested in the work of the institution and has always been its consistent friend, adopted plans for replacing the dilapidated structures then existing, by more permanent buildings, suitably arranged and equipped for the institution's needs. One by one these buildings have been erected, as appropriations have been made from year to year, until the series is now completed with the exception only of one boys' dormitory, much needed to replace the old frame building still standing, and it is to be hoped in time a suitable building for special industrial training, thus completing the group as originally planned eleven years ago. The State has been generous in providing properly for the maintenance of these dependent children that they may be suitably clothed and fed, and also in providing the means for giving them a good common school education, beginning with the kindergarten and ending with the eighth grade of the ordinary grammar school. So important has this educational feature of the insti-

tution seemed, that a year ago its corporate name was changed by the Legislature to "The Thomas Indian School," preserving the memory of its first generous benefactor. The boys have also been taught farm work and gardening, carpentry and other industries, while the girls receive instruction in housekeeping, cooking, dairy work and sewing.

The efforts of the managers have been to so train these Indian boys and girls that when they reach maturity they may become self-helpful men and women, whose influence upon their own race shall be beneficial and elevating, seeking to make them self-reliant, that when in due time that change will come, as come it will, which shall bring these Indians into the more desirable relations of citizenship, they may become worthy members of the civil body politic.

To the State of New York, and to its people who have thus recognized the beneficence of this endeavor, our hearty thanks are due.

To the memory of those with whom it began fifty years ago, we pay the hearty tribute of grateful thanks and praise. Could they see into what those small beginnings have grown in the lapse of half a century, they would rejoice in knowing how great a fruitage has come from the seeds of their sowing. All honor to the memory of Asher and Laura M. Wright, and to that of their generous helper whose honored name we here perpetuate. Their efforts were self-sacrificing and noble; the work which they begun is worthy and should be worthily maintained.

ADDRESS DELIVERED BY HON. JAMES G. JOHNSON,  
RANDOLPH, N. Y.

More than fifty years ago, in the old council house, just over there on the Flats, there was a notable gathering of Senecas. Party spirit ran high; a revolution had but recently set aside the time-honored government by chieftains, substituting a written constitution and elective officers to administer affairs of state for the Senecas. This had been accomplished by force, although bloodless, and it was in the air that the new government was likely to share a similar fate.

Rude benches running around the sides of the room were filled by resolute men and women. Doors and windows were crowded by the overflow. The council, of meeting in mass, of the people had been called by the United States Indian Agent to meet a financial question arising over the disposal of the so-called Swart-out fund, where a former Indian Agent after receiving for distribution the Seneca annuity money for the year, had absconded with it. Long years after Congress had appropriated money to make this good.

To secure this appropriation the Senecas had employed an attorney, agreeing to pay him ten per cent. of such an amount as he should obtain for them. The Indian bureau at Washington, after the money had been appropriated, refused to recognize this arrangement and the matter of its disposal was in this way brought before the people of the Seneca tribe.

The proceedings were marked with the utmost decorum. No people has more scrupulous courtesy in public meetings — all seemed to be proud to be rude. While there was present a remarkable gathering of strong men including among others Andrew John, Sr., John Kennedy, M. T. Strong, a practicing lawyer of ability, who had been the United States interpreter at the time the treaty selling the present Reservation to the Ogden Land Company was made and, who, for his part therein was under a cloud, and Marius B. Pierce, principal of the State Indian School on the Cattaraugus. The situation eventually centered around two striking personages — Israel Jameson, better known as “Old Israel,” the strong man of the old chief party on the one side, and a tall, blanketed woman of magnificent poise, on the other.

There was an unusually large proportion of women among those present and it is my recollection that none were in other than this national costume, while quite a number of them wore moccasins or were barefooted, and also blanketed.

Jameson opposed making any compensation to the attorney. The money, he said, was all owing by the Government to the Indians; it was interest on money paid by the Ogden Land Company for land the Senecas had sold them; that money had originally been deposited by the Senecas in the Ontario County Bank. The United States, without consent of the Indians, took this money

from the bank and said it would pay the Senecas for its use. It was the interest on this money that the Government had run away with. If the attorney must be paid for getting Congress to make an appropriation to pay the interest, let the Great Father, the President of the United States, pay it. This seemed reasonable and the talk was applauded, notably by the adherents of the old chief party.

The woman addressed herself to Old Israel, and said: "You know that for many years our petition that this money may be paid to us was unheeded; then we sent a delegation to Washington to get it; you were one of the men who went. That was before the old chiefs were turned out of office. At that time our annuity money was not paid by the United States agent to the people; he paid it directly to your old chiefs and you paid us what you thought best. How much of our money you kept out to pay your expenses to Washington, I don't know. When you came back you made a report to the people; I heard you report. You said the only way to get our money was to hire an influential agent, living right there in Washington, to look after the matter for us, who would keep pressing our claim in season and out until Congress should appropriate, to escape the importunities of our agent, if for no other reason. You said your delegation had secured the services of such a man, that he was to receive for his pay ten per cent. of what was appropriated, and nothing otherwise. You asked the people, in the council you called, if they ratified your action, and we all voted to ratify. Next year when we thought we would get our money, you said our agent had worked hard for it but had not succeeded, and the same story the next year, and the next, until we thought that money would never come. And now, after all, when the money comes, you say we must not pay our agent who got it for us. I say I will pay him because I promised."

This talk was loudly applauded, and the applause, that gained in volume as the speaker proceeded, lasted long after she was seated. Old Israel knew he was defeated unless he could break the effect of her appeal.

Looking over toward his opponent he said: "You better keep your mouth shut. Women have no right to talk here." In-

stantly the woman was on her feet—stretching out her arm, pointing to Old Israel, she said: “If your wife had done her duty as well as your grandmother did, you wouldn’t be here urging Indians to be dishonest.”

This reply brought down the house and enlisted the most frantic approval of its wit and sentiment. Those familiar with a domestic episode in the life of Mary Jameson, when she was compelled, in the defense of her own and her children’s lives, to strike to death her husband, Old Israel’s grandfather, can appreciate the fearful force of the retort; under it Old Israel was forced out of the contest.

At the time of this meeting this orphan asylum had not taken form. When the building was afterward completed, it was my privilege, as clerk for the agent, to pass to Mrs. Wright \$500, appropriated for the support of Indian children in the asylum. This, it seems, was the first public recognition of what she regarded as the culmination of the life work of herself and her husband. While the annual appropriation of to-day for this work runs into the tens of thousands of dollars, I doubt if it evokes such expressions of intense gratitude as was poured out at the family altar that night. During the time this work was being planned and pressed to completion, Mr. Wright was in feeble health, so the responsibility and strain, as it seemed to me, devolved upon Mrs. Wright, as it continued to do for many succeeding years, until the State of New York took up the work as a part of its routine charity.

If there is any memorial erected to these faithful, Christian workers in or upon this magnificent work, it has escaped my notice. A visitor at St. Paul’s cathedral in London, not finding any inscription or memorial to Sir Christopher Wren, its architect and builder, asked why it had been neglected. The reply was “St. Paul’s cathedral is Sir Christopher Wren’s memorial, could he have a better?” So we, of this generation, may truly say this magnificent institution keeps alive the memory of its sturdy founders, but how will the knowledge of their labor, sacrifices and successes be carried forward?

Owing to the claims being made for land warrants by Indians on account of services for the United States in the War of 1812,

the Indian Agent was directed to take evidence of their service. In that way I learned at first hand many of the details of what seems to have escaped historical attention. After the Revolutionary war a considerable part of the Iroquois took up their home in Canada, where the King granted them ample land and remuneration for their services to the Crown during that war. Those remaining in New York had an empire, stretching toward the Mississippi river, ceded to them by the United States. As time passed and the West began to develop, the Indian with his title to the land was in the way; so in one way and another he lost most of his land. When war became imminent, Great Britain was anxious to secure for her armies the services of that part of the Iroquois who had remained in the United States. Up to this time the League of the Iroquois had bound together all of the Six Nations, whether located in Canada or here. The Great Chief Brant, and other leaders, who had settled in Canada came over with full authority from the King, to promise land, money, military rank, annuities — all the Indians could desire — if they would remove into Canada and serve him. A series of councils were held at Buffalo Creek, Niagara Falls and other points along the frontier. Every art was employed to induce them to remove, but without avail. Led by such men as Red Jacket, Farmers Brother, Governor Blacksnake and Cornplanter, those of the Iroquois who had remained in this State refused all temptation to remove. An effort was then made to enlist the Iroquois as a nation in the service of the King, but the same wise leaders prevented this also. Angered by his defeat, Brant proclaimed that he was a warrior, that he and his people would fight, that they would fight for their King; that his King had always kept his promises to the Indian, which the American never did, but was all the time trying to get rid of him so as to get his land.

While there was only too much truth in all of this it did not avail, and then the League was rent in twain. It was agreed that those in Canada should serve the King, and those on this side, our government, but as between themselves, each should refrain from injuring the other. With that the conference ended — the Canadians left to serve their country and their King — not with the others.

A series of unfortunate incidents occurred during the Revolutionary war, which caused the Americans to adopt as a settled policy that it would not enlist the services of Indians in their wars so those whose loyalty had endured such a test were coolly turned back to their Reservation home. "None but white men wanted" was a standing order. The war broke in all its fury, resulting in a rapid series of American reverses. The surrender of General Hull and his army, the failure of the much-vaunted Canadian invasion, then in a return invasion from Canada with ample force accompanied by Indian auxiliaries, whose war whoops brought visions of tomahawks and scalping knives; then the capture and burning of Buffalo under circumstances that carried terror to the scattered frontiersmen in their isolated homes through the wilderness of western New York. The revulsion of feeling these catastrophies brought, led to a most frantic appeal to the faithful Indian to come to the rescue. The response was instantaneous and en masse, making no terms, asking no promises, putting their all at our disposal. Most fortunately, owing to the great confusion among the armymen along the frontier, the Indians were permitted to organize and officer themselves, conduct their own campaigns without interference only charged with protecting the Niagara River frontier from Lake Erie, where Commodore Perry dominated, to Lake Ontario and the scene of Commodore McDonald's victories.

It was a task of great magnitude, for the Canadian Iroquois knew every pathway as well as our own Indians, but the trust was kept. From the day our Indians were called in to the close of the war there was not an outrage, no enemy broke through the line; the settler, his family, his home and possessions were as safe as a babe at his mother's knee.

At what cost of life, what expense of labor and endurance this result was accomplished, nothing has been preserved. Nor was that all. When it was decided to again invade Canada, and the attempt was made at Queenstown, a force of our Indians was called in. They went over the river with the advance, scouting and clearing the way up the heights for Scott and his regulars, then when the transports re-crossed the river to bring over the supporting troops, consisting largely of militia from New York

and surrounding States, those troops refused to cross, claiming they could not be compelled to serve outside the boundaries of the United States. Even the transports were not returned — were retained on the American side, and our victorious soldiers, who had carried the heights and everything before them, were caught like rats in a trap and overpowered. Our Iroquois, with their knowledge of the locality and skill in woodcraft, managed to escape capture, losing severely in killed and wounded — the penalty of fighting under white generalship.

So vigilant was the ward and watch they kept, no hostile force was permitted to gather even on the other side of the river without warning to our officers, and the frontier of western New York ceased to be a storm center. When the war ended these friendly neighbors were permitted to return to their homes substantially without reward save only a warm letter of thanks from the officer commanding on the frontier.

It was a long, discouraging journey for our Indians from the free, out of door life of the wilderness to the cribbed, cabined and confined one of civilization and the house. During the passing every power of evil seemed combined to destroy him. Firearms and fire-water; the fierce unscrupulous demand for his land led by the Ogden Company, aided by bribery and fraud; unused to house life, absolutely ignorant of all laws of sanitation, he easily fell victim to every destroying disease. Ravaged with the smallpox, and the great white plague, consumption; with constantly decreasing numbers and lessening stamina, there seemed little hopes for his survival. Happily he had an ancestry antedating the settling of the whites on this continent. Here the white man found a nation that had made such advances in statesmanship and practical knowledge required in the wilderness, that students agree, but for the entrance of the white man in their world, they would have evolved a civilization, which in time could have successfully met and repelled the invader. Inheriting the brain and brawn of such an ancestry, and blood will tell, slowly but surely all these adverse influences were met and overcome until the dark and dismal path had merged into the glorious sunlight that surrounds us. The horrid past survives only in ghostly dreams, while the present is rich in enjoyment.

Dame nature is imperative in carrying out her own plans. When two peoples of different lineage occupy permanently the same lands, eventually they merge and become a composite. No people have escaped or evaded this law. As the Indian can hardly hope to absorb our 80,000,000 of whites, it follows that he will be merged and become a citizen. Nature never hurries. Allotment in severalty of your land and the breaking up of tribal government may bring the result sooner; that is all. Nor need you fear as to the result if we may judge the future by the past. Of good old Mohawk Dutch stock, O'Bail, the cornplanter, was absorbed into the Indian life. The staunch, sturdy O'Bails and cornplanters are not only highly esteemed among Indians, but command the respect of their white neighbors. The little golden-haired Irish girl, Mary Jameson, was merged into the Senecas; certainly no race failure followed if we may judge from the Jameson response at roll call. Mrs. Marius B. Pierce, Mrs. Nicholas Parker taught your people by precept and example, by books and by daily life. Each were strong Christian characters and devoted their life-work to the upbuilding of your race into which they had been merged. Nor has the gain been all on your side. No prouder Virginia cavalier ever represented his State in the Senate of the United States than John Randolph of Roanoke. His proudest boast was of an ancestry connecting him with the simple Indian girl, Pocahontas.

Poets of this composite race will find no field of romance richer than the heroic deeds and simple lives of their Indian ancestors, if only they can have preserved for their use the treasures of song and story and of folk lore now being handed down by tradition, which, if not gleaned and preserved for their use, will forever pass into oblivion, almost, if not absolutely, with the present generation.

#### IMPROVEMENT OF HIGHWAY.

From the fact that this institution is located four miles from a railway, it seems to me that it would not be out of place to speak of the importance of the appropriation for repairing the highway between Lawton Station, the shipping point, and the institution. More than three miles of this highway is across an

Indian reservation, the care and maintenance of which has been recognized as devolving upon the State. This highway is one of the hardest in this vicinity, and while the State has made several appropriations and improved the same several times, it has not granted a sufficient appropriation to put the road in proper shape. When we consider the enormous amount of coal and other freight necessary to haul each year to the institution, it strikes me that it would be economy for the State to build a first class highway — a road that could be maintained in good condition at all seasons of the year. And by changing the highway in many places and cutting off corners, the steep grade can be lessened to a great extent and the distance lessened nearly a mile, which of itself is no small item. I would recommend that a liberal appropriation be given the Commissioner of Public Works for the purpose of changing and improving the highway between the institution and Lawton Station. This is really an important matter and should receive earnest consideration.

#### ACKNOWLEDGMENTS.

Our acknowledgments are due and heartily extended to all those who have aided in any way in promoting and advancing the work of the school. We are under special obligations to Miss Lilla C. Wheeler, Mr. Henry R. Howland, Mr. W. S. Lawton, the Bank of Gowanda, Hon. George A. Davis, Mr. Edmond McCarthy, Mr. N. Loren Danforth, Mr. W. H. Bard, Mr. Henry W. Sprague, Miss Susie Jacobs, Mr. Walter H. Shepard, Mr. William L. Marcy, Sibley & Holmwood, Plimpton, Cowan & Company, the teachers and employees of the institution for their contributions in money and presents to our Christmas exercises. We feel grateful for the generosity with which they responded and the spirit in which it was given, and I can assure them that their efforts were thoroughly appreciated and that the means they provided make these boys and girls happy and joyous, not only at Christmas time but for many days after.

We are also under obligations to Hon. Joseph Keppler for an annual subscription to "Puck"; to Mr. H. J. Weisenheimer for free copies of the Buffalo daily and Sunday "Times"; to the management of the Erie County and Iroquois Fair Associa-

tions for free admission to the fair; to Hon. Harvey J. Putnam for the school prizes, which have been an incentive for increased effort in the school; to Mr. W. F. Fisher for a large supply of valentines, sufficient for all. These valentines are a source of much pleasure to the little ones, and in fact the older ones as well. Mr. Fisher is entitled to great credit for his thoughtfulness in this direction.

Each department with which the institution has to do at Albany has shown much interest in every way in aiding the management in its conduct of the school. The Fiscal Supervisor has been of much service to the institution, especially in the installation of additional equipment to the steam-heating plant, and I take pleasure in making this public record of my appreciation of the same.

You, the Board of Managers, have been ever zealous in promoting the interest and welfare of the school and its pupils. The co-operation that you have given us is thoroughly appreciated, and I am sure that it has been the moving power for the advancement of the institution. For myself and on behalf of the teachers and the employees I extend to you our sincere thanks.

Among the working force of the institution there has been the usual spirit of co-operation and desire to work for the advancement of the boys and girls that have been placed in our care. I wish to thank each for doing his full duty and more, realizing fully that much of the service they have given cannot be recompensed for by the salary they receive or measured by a money standard.

Respectfully submitted,  
GEORGE I. LINCOLN,  
*Superintendent.*

## REPORT OF ATTENDING PHYSICIAN.

---

*To the Board of Managers of Thomas Indian School:*

I beg leave to submit herewith my report as attending physician, for the fiscal year ending September 30, 1906:

The following named diseases have been under treatment during the year:

Abcess .....	1
Amenorrhoe . . . . .	3
Anaemia . . . . .	1
Boils . . . . .	1
Burn . . . . .	1
Bronchitis, Acute . . . . .	6
Catarrh, Nasal . . . . .	1
Conjunctivitis . . . . .	8
Constipation . . . . .	2
Disease of Middle Ear . . . . .	1
Dyspepsia, Acute . . . . .	7
Dyspepsia, Chronic . . . . .	3
Eczema . . . . .	4
Gastro-Enteritis . . . . .	3
Herpes . . . . .	1
Impetigo. . . . .	9
Incontinence of Urine . . . . .	1
Laryngitis . . . . .	2
Menorrhagia . . . . .	1
Neuralgia . . . . .	2
Pneumonia . . . . .	3
Rheumatism . . . . .	1
Scabies . . . . .	4
Tonsilitis . . . . .	5
Tuberculosis of the Lungs . . . . .	3
Tuberculosis of the Glands . . . . .	6
Tuberculosis of the Joints . . . . .	1

---

---

There has been one death from tuberculosis of the lungs, and one from accident. No other fatalities have occurred.

It is very gratifying to state the extraordinary decrease in the cases of tuberculosis of the lungs, seen in the institution, during the past few years. This good result must be ascribed largely to the better sanitary condition brought about by the erection of the new buildings, as well as to the thorough recognition of the infectiousness of the disease, and the means which have been put in effect for the isolation of patients. Something yet, however, remains to be done that we may be enabled to properly treat these cases, and protect others from contagion. We are handicapped in the management of tubercular patients through our inability to furnish proper quarters for them during the winter. During the summer months we are enabled to isolate them, and to give them outdoor treatment, by the use of tents, but the danger of infection, and of unfavorable progress of the disease, is largely increased as winter approaches. This is due to the fact that they must live with others in closed rooms. All of this could be changed for the better at comparatively small expense, by devoting the upper floor of the hospital to their use. This could be made very suitable by building bay windows, which should at all times be open to the outside air, at each end of the main room of the upper floor. This room is of sufficient size to be converted into two wards, so that both sexes could be properly cared for. I earnestly recommend that this be done.

Permit me to suggest the great need which the institution has of a properly equipped gymnasium. Nothing of this character exists here at present, and it requires no argument to understand that children cannot be maintained in good health without proper exercise. This is of especial importance to the boys during the winter, when they are deprived of the opportunity, which the summer offers them, to work on the farm.

I desire to express my acknowledgments for the ready and valuable assistance extended to me in my work here, by Superintendent and Mrs. Lincoln, and also my appreciation of the useful services of our nurse, Mrs. Paterson.

Very respectfully,

A. D. LAKE,

*Attending Physician.*

GOWANDA, N. Y., *September 30, 1906.*

### FIFTY-SECOND ANNUAL REPORT

OF THE

### THOMAS INDIAN SCHOOL.

---

*To the Honorable, the Legislature of the State of New York:*

In compliance with the statute, the undersigned, the Board of Managers of the Thomas Indian School at Iroquois, N. Y., beg to submit their report on the affairs and the management of the school during the fiscal year ending September 30, 1907.

During the year the school and the State have suffered a serious loss in the sudden death of Mr. George I. Lincoln, Superintendent, which occurred May 22, 1907. For twelve years Mr. Lincoln had filled that important office with such faithful fulfillment of its duties and with such success in the accomplishment of that for which your board has been striving,— that development of character and that general uplift of these children of an alien race as should make them industrious, self-helpful men and women, fitted for citizenship when the proper time shall come,— that his loss cannot be measured by any ordinary tribute to his memory.

Mr. Lincoln was born at Simonsville, Vermont, September 30, 1858. His parents were farmers, who removed to East Otto, N. Y., in 1868. He received his education at the Randolph Academy and after graduation became a teacher himself, learning

thus from practical experience much that became of the highest value to himself and others in the later labors of his life. He was married February 10, 1880, to Miss Emily P. Reynolds, of Collins Center, N. Y., who became his faithful helpmeet and co-worker. Two children were born to them, who are still living. For fifteen years their home was at Gowanda, N. Y., during which time Mr. Lincoln was actively engaged in the real-estate and insurance business at Gowanda and at Buffalo. Later he was employed in the offices of the county clerk and the county auditor of Erie county; and in April, 1895, was appointed, by the Board of Managers, Superintendent of the Thomas Indian School, then known as the Thomas Asylum for Orphan and Destitute Ind'an Children, his wife at the same time becoming its Matron. The conditions then existing were such that the first years of their service here were years of continual struggle against many discouragements, but the earnest desire of the Board of Managers for the betterment of those conditions met with such a hearty seconding from the Superintendent as in time accomplished their endeavor and he lived to see the old and unsanitary buildings replaced by others of modern construction adapted to our needs and to know that such great changes as have occurred were the result in no small measure of his personal and painstaking efforts. His influence and his authority with the staff of his coworkers and with the children under his charge was always exerted toward such things as were needful and best. He loved children and they knew it and gave him their affection in return. He was patient with them and wise; he knew each child's limitations and watched over its development with an unusually thoughtful care. There was no misunderstanding on either side; when it was necessary, he could reprove, but the kindness of his nature mingled with the reproof, so that the relationship was always one of love and not of fear; children and employees alike trusted him, for they knew that he would always do the thing that was right.

His death came suddenly while he was still in the prime of life and full of life's activities, and the grief that his death brought to all who were connected with him was heartfelt and sincere.

Immediately, upon Mr. Lincoln's death, the Board of Managers, with the sanction of the State authorities, placed Mr. Samuel G.

Keyes temporarily in charge of the institution. Mr. Keyes had been so long a member of the board and had become so familiar with details of management at the school that the best interests of the State were thus conserved and he kindly consented to act as Superintendent until Mrs. Emily P. Lincoln was promoted to succeed her husband in that responsible office on July 23, 1907. Mrs. Lincoln had been matron since April, 1895, and was thoroughly familiar with the work which her husband had carried on and better able to assume its responsibility than any other person could have been. The employees respected her and recognized her executive ability, and the children loved her. Your board feel that they have been particularly fortunate in this appointment. The work which she is doing is well done and in her the institution has a most excellent executive officer.

The several reports which are annexed will show the present condition of our affairs. The Superintendent's report calls your attention to some of our most pressing needs and we commend these to your generous consideration.

The dormitory for boys should be no longer delayed. We are cramped for room. We cannot increase our numbers until we have a place where we can put new comers and properly care for those now housed in a dilapidated and unsanitary building.

The other appropriations asked for are much needed and should be granted.

The Treasurer's report and that of our able attending physician, Dr. A. D. Lake, are attached hereto; also a list of the children, our beneficiaries and an inventory of the property of the State.

Respectfully submitted,

HENRY R. HOWLAND.

## REPORT OF THE SUPERINTENDENT.

---

*To the Board of Managers of the Thomas Indian School:*

This, the annual report for the year ending September 30, 1907, I now submit in compliance with the statute.

There have been many changes since the last annual report. The work of the institution for the year has been along the same lines as in former years, and although sadly broken in upon by the death of our Superintendent, Mr. Lincoln, I feel that much has been accomplished. The population throughout the year has been up to the average of the previous year, the average being 132.58.

We have many applications for the admission of children who are worthy and very needy, but owing to our already crowded capacity, we cannot admit them. We need the other dormitory for boys very much indeed and I hope you will be able to procure the appropriation this coming winter for the same, as well as the other appropriations asked for which were not allowed.

There have been several changes of employees in the different departments as follows: In the teachers' staff, Miss Sarah E. Guy has been employed in the place of Miss Ethel D. Hill, resigned; among the attendants, Miss Mabel Mallory was transferred from the boys' department to fill the vacancy caused by the resignation of Miss Jessie Mayo in the girls' department and Miss Marian Logan was employed to fill the vacancy made by the transfer of Miss Mallory; in the engineers' department, E. D. Tibbetts was employed to fill the vacancy caused by the resignation of Fred Russell, Jr. Frank Harrington has been employed as teamster, to succeed Salem Moses, who resigned.

With these few changes in the personnel of the employees, the help remains the same except as to the office. Miss Alta J. Alden succeeded to the position of stenographer caused by the promotion of Miss Ida L. Bunn to that of bookkeeper in the place of Miss Mabel M. Hawkins, resigned.

The following list of special appropriations is very much needed in the advancement of the institution:

A new dormitory building to replace the old frame building now in use.....	\$20,000 00
Furniture and furnishings for the employees' cottage. . . . .	1,500 00
A vegetable cellar, to do away with storing vegetables in the barn.....	1,500 00
An electrical unit, as our present generator is not large enough, and in case of accident, we have nothing to resort to.....	1,800 00
Addition to school building, including the changes in lavatories and class rooms.....	4,000 00
The fitting up of the basement of the school building for a gymnasium.....	500 00
For moving and fitting up the old nursery building into a cottage for the farmer.....	1,000 00
Repairs and equipment.....	2,000 00

I am sorry to have to report that all of the bids we received for drilling the gas well exceeded the appropriation, therefore this work has not been done and I would recommend that you ask for an additional appropriation of sufficient amount to meet the requirements, so that this well may be drilled as early in the spring as possible.

#### SCHOLASTIC DEPARTMENT.

The work in the school has been most satisfactory during the past year and from the report of the Principal we find the following number have been enrolled in the several grades, including the kindergarten.

##### *Eighth Grade.*

Leroy Beeman,  
Carl Lay,  
Julia Snow,  
Mavisie Skye,

Winifred Garlow,  
Augusta Jacques,  
Myra Skye,  
Florence Thompson.

*Seventh Grade.*

Wilber Skye,  
Baptist Pallas,  
Cleveland Shanks,  
Marjorie Jackson,

Grace Boyle,  
Minnie Charles,  
Betsey Johnnyjohn,  
Geneva Thompson.

*Sixth Grade.*

Franklin Jamison,  
Gilbert Powlas,  
Arthur Johnson,  
Robert Anderson,  
Mitchel White,  
Mitchel Johnnyjohn,  
Harry Jimerson,  
Daniel Twoguns,  
Ernest Jacobs,  
Rhoda Blackchief,  
Electa Doxtator,  
Lucy Charles,

Ethel Garlow,  
Lizzie Gibson,  
Gertrude Pierce,  
Agnes Jacobs,  
Laura Jacobs,  
Rachael King,  
Theresa Lay,  
Emma Spring,  
Lizzie Johnson,  
Effie Snow,  
Rhoda Crouse,  
Laura Hill.

*Fifth Grade.*

Ethel Charles,  
Ella Doxtator,  
Lucy Doxtator,  
Helen Gibson,  
Mary Greene,  
Gertrude Jimerson,  
Anna Skye,  
Hazel Skye,  
Rose Snow,  
Ruby Spring,

Louise Greene,  
Nellie Logan,  
Alta Doxtator,  
John Connors,  
Sherman Pierce,  
Frederick Thompson,  
Reuben Williams,  
Ora Halftown,  
Lindsay Jackson,  
Roy Moses.

*Fourth Grade.*

Ella Hatch,  
Libbie Halftown,  
Nora Hill,  
Ida Jake,

John Deer,  
Cleveland Johnnyjohn,  
Roy Moses,  
Archie Tallechief,

Marjorie Jamison,  
Nellie Logan,  
Amy Peters,  
Irene Parker,  
Joe Connors,

Horace Thompson,  
Oliver Thompson,  
Alfred Twoguns,  
John Webster.

*Third Grade.*

Ellen Doxtator,  
Emma Johnson,  
Clara Logan,  
Gladys Logan,  
Nancy Patterson,  
Elida Williams,  
Ina Luke,  
Lena Blackchief,  
Elsie Doxtator,  
Evangeline Clark,

Ned Blueeye,  
Milo John,  
Bert Moses,  
Lawrence Moses,  
John Powlas,  
Dudley Poodry,  
Lawrence Poodry,  
George Twoguns,  
Sherry Poodry,  
Lawrence Cooper.

*Second Grade.*

Sophia Bill,  
Lafayette Bullis,  
Sarah Chew,  
Mamie Crouse,  
Earl Griffin,  
Wyman Jacobs,  
Philo Jackson,  
Harvey Johnson,  
Francis Kettle,  
David La Forte,  
Myrtle Miller,

Rutherford Lay,  
Ira Mitten,  
Ira Moses,  
Orena Pierce,  
Alberta Parker,  
Elizabeth Snow,  
Nettie Skye,  
Lucy Thompson,  
Laura Williams,  
William Pierce,  
Louise Patterson.

*First Grade.*

Lorenza Bullis,  
George Crouse,  
Clifford Halftown,  
Nancy Joe,  
Eunice Joe,  
Aaron Kettle,  
Lydia Poodry,

Lena Parker,  
Hattie Snow,  
Louise Tallichief,  
Irene Williams,  
Emeline Luke,  
Elmer Jacobs.

*Kindergarten.*

Renier Clark,	Alberta Williams,
Jacob Bullis,	Ida Patterson,
Barney Jacobs,	Bula Parker,
Henry Rockwell,	Mildred Parker,
Jerriett Cooper,	Irene Peckman,
Richard Kettle,	Charlotte Peckman,
Newman La Forte,	Flossie Kettle,
James Warrior,	Vivian Luke,
Nelson Twoguns,	Malphena Thompson,
Elean Webster,	Elsie Spring,
Emery Miller,	Ruth Jacobs,
Ernest Miller,	Grace Wandle,
Adrian Clark,	Mina Patterson,
Edna Rockwell,	Julia Elcha.

The Regents examinations were held in the months of January and June. The following gives a list of the subjects tried and the names of those who passed.

## JANUARY EXAMINATION.

*Reading.*

Winifred Garlow,	Cleveland Shanks.
Carl Lay,	

*Writing.*

Winifred Garlow,	Myra Skye,
Carl Lay,	Julia Snow,
Cleveland Shanks,	Florence Thompson.

*Spelling.*

Ethel Garlow,	Effie Snow,
Myra Skye,	Geneva Thompson.

*Elementary English.*

Leroy Beeman,	Julia Snow.
Winifred Garlow,	

*Arithmetic.*

Augusta Jacques,  
Maysie Skye,

Baptist Pallas.

## JUNE EXAMINATION.

*Reading.*

Julia Snow.

*Spelling.*

Augusta Jacques,  
Baptist Pallas,

Julia Snow.

*Elementary English.*

Augusta Jacques,  
Myra Skye,

Florence Thompson,  
Geneva Thompson.

*Arithmetic.*

Winifred Garlow.

*Geography.*

Minnie Charles,  
Cleveland Shanks,

Geneva Thompson,  
Baptist Pallas.

*United States History and Civics.*

Leroy Beeman,  
Carl Lay,  
Winifred Garlow,  
Augusta Jacques,

Maysie Skye,  
Myra Skye,  
Julia Snow.

The following is a list of the pupils who received diplomas in June:

Leroy Beeman,  
Maysie Skye,  
Myra Skye,

Winifred Garlow,  
Augusta Jacques.

The Putnam prizes were awarded the following:

Winifred Garlow, first,

Julia Snow, second.

## MUSIC.

Each pupil has received instruction in vocal music and the following have been given instruction on the piano and organ.

*Piano.*

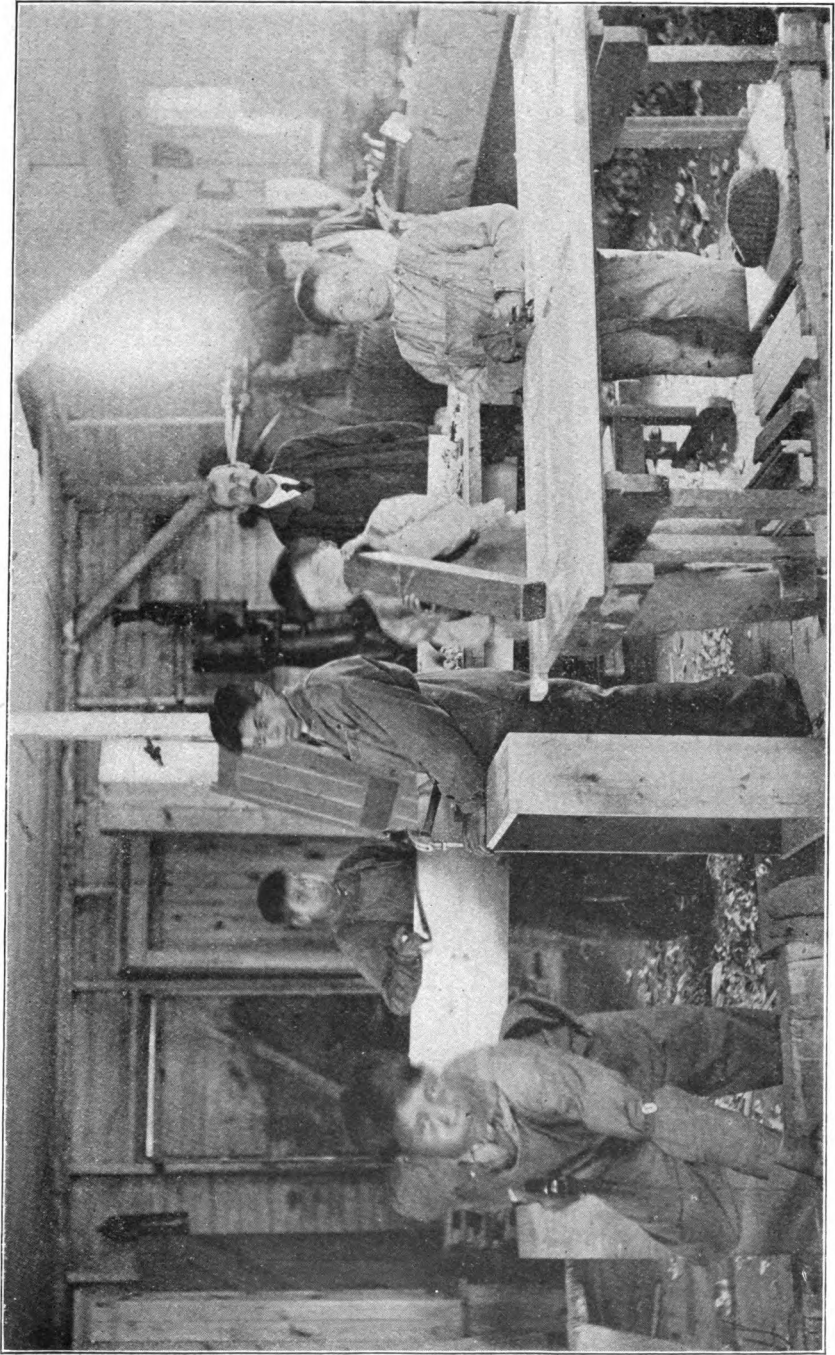

Florence Thompson,	Geneva Thompson,
Myra Skye,	Winifred Garlow,
Maysie Skye,	Marjorie Jackson,
Laura Jacobs,	Augusta Jacques,
Minnie Charles,	Gertrude Jimerson,
Laura Hill,	Rhoda Crouse,
Emma Spring,	Julia Snow,
Lizzie Gibson,	Theresa Lay,
Rachael King,	Effie Snow,
Betsey Johnnyjohn,	Gertrude Pierce,
Grace Boyle,	Lizzie Johnson.

*Organ.*

Electa Doxtator,	Louise Green,
Helen Gibson,	Lucy Doxtator,
Agnes Jacobs,	Marjorie Jamison,
Lucy Charles,	Rhoda Blackchief,
Hazel Skye,	Franklin Jamison,
Anna Skye,	Ethel Charles,
Nellie Logan,	Gladys Logan,
Ella Hatch,	Amy Peters,
Libbie Halftown,	Emma Johnson,
Mary Green,	Ethel Garlow,
Ida Jake,	Nancy Patterson,
Ella Doxtator,	Ruby Spring.

## TRADE SCHOOL.

This feature of the school work has made its usual satisfactory progress during the past year.

CLASS IN CARPENTRY.

The following is a list of the boys who have received instruction in the trades, painting and carpentry:

John Conners,	Cleveland Shanks,
Sherman Pierce,	Gilbert Powlas,
Frederick Thompson,	Arthur Johnson,
Reuben Williams,	Mitchel White,
Ora Halftown,	Daniel Twoguns,
Lindsay Jackson,	Joe Connors,
Roy Moses,	John Deer,
Leroy Beeman,	Alfred Twoguns,
Carl Lay,	Horace Thompson,
Wilber Skye,	John Webster,
Baptist Pallas,	Cleveland Johnnyjohn.

#### ACKNOWLEDGMENTS.

I wish to publicly thank each and all who have contributed toward making the Christmas season a happy one for these boys and girls. I am also especially grateful to Hon. Joseph Keppler for an annual subscription to "Puck;" to Mr. W. F. Fisher for a sufficient supply of valentines to make each child happy; to Hon. Harvey J. Putnam for the school prizes, which have certainly increased the interest of the children; to Mr. H. J. Weisenheimer for free copies of the Buffalo daily and Sunday "Times;" to the management of the Erie county and Iroquois Fair Associations for free admission to the fair. These fairs are a source of great delight to the children and makes a pleasant change for them.

I desire to thank you as a Board and as individuals for your wise counsel, encouraging words and hearty co-operation and to assure you that I shall do all in my power to carry out your every wish.

To the officers, teachers and other employees I wish to extend my thanks for their loyalty and willing support.

Respectfully submitted,

EMILY P. LINCOLN,

*Superintendent.*

STATEMENT OF ATTENDANCE FOR THE YEAR ENDING SEPTEMBER  
30, 1907.

## REPORT OF ATTENDING PHYSICIAN.

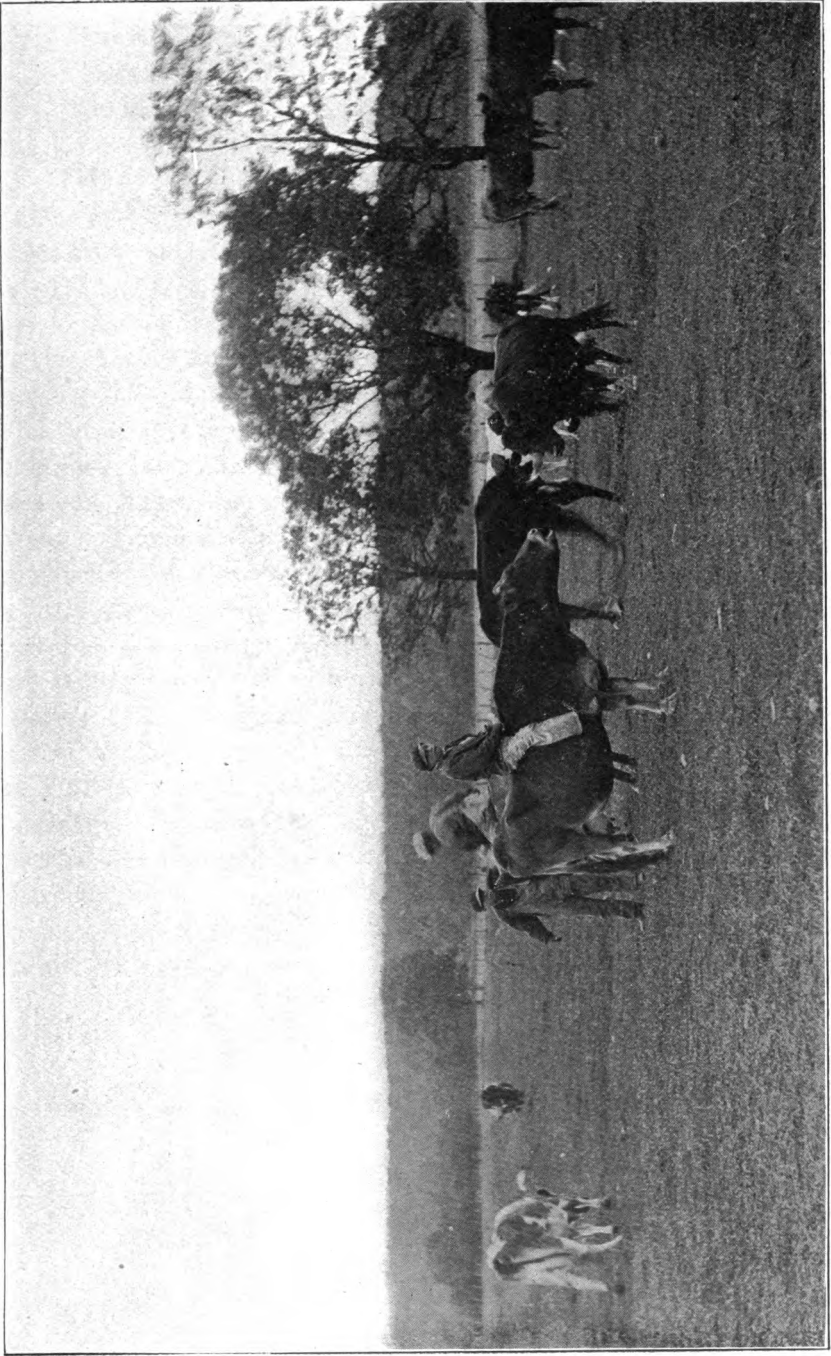

---

*To the Board of Managers of Thomas Indian School:*

I beg to submit herewith my report as attending physician for the year ending September 30, 1907.

The following diseases have existed and been under treatment during the year:

Ammenorrhoea . . . . .	1
Anaemia. . . . .	2
Astigmatism . . . . .	2
Burns. . . . .	1
Bronchitis, acute. . . . .	2
Bronchitis, chronic. . . . .	2
Chlorosis. . . . .	1
Contusion. . . . .	1
Conjunctivitis. . . . .	10
Dyspepsia, acute. . . . .	4
Fracture of clavicle . . . . .	1
Eczema. . . . .	4
Gastritis, chronic. . . . .	1
Herpes. . . . .	4
Incontinence of urine . . . . .	5
Impetigo. . . . .	8
Inflammation of middle ear. . . . .	2
Lumbago. . . . .	1
Measles. . . . .	89
Pleuritis. . . . .	1
Pneumonia. . . . .	3
Ringworm . . . . .	1
Rheumatism, acute. . . . .	1
Scabies. . . . .	3
Tonsilitis. . . . .	2
Typhoid fever. . . . .	1

THE SCHOOL'S HERD OF CATTLE.

Tuberculosis of glands.....	3.
Tuberculosis of lungs. ....	1
Wounds. . . . .	2

---

One case of pneumonia terminated fatally. The case of tuberculosis of the lungs was removed from the institution, by his friends, and died one month later. No other deaths have occurred among the pupils.

The history of the foregoing list of diseases shows that a considerable proportion of them are of probable tubercular origin. Among these may be included some of the cases of anaemia, chlorosis, inflammation of the middle ear, conjunctivitis and eczema. There has been a slight increase here in this class of disease, during the past year, and it is impossible to avoid the conclusion that the reason for this is that the institution may be a little over-crowded with inmates. It is now a well established fact that the increase and propagation of diseases of this class are largely brought about by insufficient air space and poor ventilation. For this reason it is apparent, that if the present number of pupils are to be retained, an additional dormitory should be built as soon as possible.

During the past year the institution has suffered an irreparable loss through the death of Superintendent Lincoln. His thorough devotion to the work in which he was engaged, and his great interest in the welfare of the pupils, will be an inspiration to all who may be connected with the school hereafter.

Very respectfully,

(Signed) A. D. LAKE,  
*Attending Physician.*

Twelve cans shinon . . . . .	1 47
Three packages stove polish . . . . .	13
Eleven boxes Miller's blacking . . . . .	27
Nineteen boxes Waxona blacking . . . . .	99
Twenty-one pounds corn starch . . . . .	70
Four boxes gelatine . . . . .	37
One dozen blackboard erasers . . . . .	39
One dozen rubber erasers . . . . .	40
Three boxes crayons . . . . .	33
One box pencils . . . . .	68
Seventy-five school tablets . . . . .	2 58
Six cans baking powder . . . . .	1 20
Ten bottles bluing . . . . .	63
Eight vegetable knives . . . . .	47
Eight bunches shoe laces . . . . .	46
Seven gas mantles . . . . .	87
Nineteen brick (scouring) . . . . .	71
Forty scrubbing brushes . . . . .	2 93
Two hundred and twelve pounds sugar . . . . .	10 81
Twenty-seven pounds coffee . . . . .	3 16
Six pounds chocolate . . . . .	76

Twenty and one-half pounds tea . . . . .	\$2. 87
Twenty-eight pounds starch . . . . .	95
Twenty-two pounds crackers . . . . .	1 03
Farina, forty-nine pounds . . . . .	1 23
Fifteen pounds chloride lime . . . . .	53
Thirty-three pounds toilet soap . . . . .	1 98
One hundred and thirty-three pounds laundry soap.	5 98
Ten pounds wax . . . . .	83
One-half gallon formaldehyde . . . . .	70
Five hundred cathartic pills . . . . .	82
One gallon syrup white pine compound . . . . .	2 00
Two ounces oil of cloves . . . . .	35
One pound peppermint . . . . .	1 00
Five pints lactated pepsin . . . . .	1 65
Five pounds Epsom salts . . . . .	15
One pound citrate iron . . . . .	65
Two pounds syrup iodide iron . . . . .	90
Five cow cards . . . . .	33
Five pounds absorbent cotton . . . . .	1 00
Twenty-five yards gauze . . . . .	1 25
One dozen gauze bandages . . . . .	65
One flour sifter . . . . .	48
Ten pounds mustard . . . . .	1 05
Eight ounces nutmegs . . . . .	18
Forty-seven pounds soda . . . . .	88
Four and one-half pounds ginger . . . . .	72
Sixty-five pounds silex powder . . . . .	1 63
Three pounds pepper . . . . .	54
Men's fine shoes, one pair . . . . .	2 00
Four pairs men's coarse shoes . . . . .	5 60

### FIFTY-THIRD ANNUAL REPORT

OF THE

### THOMAS INDIAN SCHOOL

---

*To the Honorable, the Legislature of the State of New York:*

In compliance with the statute, the undersigned, the Board of Managers of the Thomas Indian School at Iroquois, N. Y., beg to submit their report for the year ending September 30, 1908.

The report of the Superintendent which follows gives the details of the past year's work and the suggestions as to our needs are especially commended to your consideration. The erection of a new boy's dormitory to take the place of the old and unsanitary frame structure should no longer be delayed. This old building is a menace to health and seriously injures the work of the institution. The other appropriations asked for are, in our judgment, necessary and we trust may be granted.

The report of the Treasurer for the fiscal year, that of the attending physician, and the inventory are also attached hereto as forming a part of this report.

Very respectfully,

HENRY R. HOWLAND,  
NEWTON A. CHAFFEE,  
SAMUEL G. KEYES,  
MATE C. GREZINGER,  
WILLIAM S. LAWTON,  
JAMES E. BIXBY,  
ALFRED L. JIMESON,  
WILLIAM HATCH,  
THEODORE L. JIMERSON.

## REPORT OF THE SUPERINTENDENT.

---

*To the Board of Managers, the Thomas Indian School:*

In compliance with the statute, I present you herewith, my report, as Superintendent, for the year ending September 30, 1908.

The population of the institution at the close of the fiscal year ending September 30, 1908, was 154, the average for the year being 133.02. The average of last year and the one this year are lower than in previous years owing to the fact that more were away during vacation.

In the thirteen years of my work at this institution we have never received as many applications for admission in one year as we have during the past one. There are about seventy-five on file now.

Annexed hereto is a memorandum of special appropriations, which, in my judgment, are needed for the betterment and advancement of the institution. Among these is the dormitory building for boys, which has been asked for many times. We are very much in need of this building and hope an appropriation may be secured from the Legislature of 1909 for this building, thus enabling us to receive more of these deserving children, who are desirous of entering our school.

Very few changes have been made in the personnel of employees. The teachers' staff remains the same, with the exception of Miss Maude Ellis who was appointed in the place of Miss Sarah E. Guy, resigned.

We received from the last Legislature \$3,000 for repairs and equipment, including furniture and furnishings for the employees' and other cottages. With this we have been able to comfortably furnish the employees' cottage, which has been so long in need of furniture, to paint all the frame buildings and the outside woodwork of the brick buildings, also to decorate the interior of the school building, the two girls' dormitories, hospital and several

rooms in some of the other buildings, besides purchasing one new rug for the hospital and several for the administration building.

Our gas well was so clogged with water that it was practically useless. This appropriation has been utilized in cleaning it out and the flow of gas has been materially increased, but not sufficient for our needs. In my memorandum of special appropriations, already referred to, I have included \$2,800 for a new gas well, which would, I think, be a great saving to the institution in the item of other fuel. At the present time we use hard coal in the main kitchen and laundry, which, of course, necessitates a constant fire night and day, while if we had gas the night fuel could be saved and considerable during the day. Not only this saving, but with gas one always has a ready fire and it is much more satisfactory.

During the past year a large farm horse has been purchased to take the place of the old team which was disposed of the first of this year. By driving this horse with our large black team it gives us two three-horse teams for hauling coal. With this same appropriation we have purchased what was necessary to equip ourselves with two three-horse wagons.

Out of this year's appropriation of \$500 for cement walks, we have laid over 1,000 feet of walks on the west side of the group of buildings. This appropriation is not quite used up and in the spring I expect to use it as far as it will go on the east side.

We were also granted, by the last Legislature, \$2,000 for a new electrical unit, the estimate for which is now in the hands of the Fiscal Supervisor.

On the morning of July 31st we had the misfortune to lose our cow barn and silo by fire, together with over sixty tons of hay and a very little other farm produce, besides some small farming implements. I have spent considerable time trying to ascertain the origin of the fire, but have not been able to do so. I notified the Department at Albany immediately and within a few days the State Architect sent one of his representatives out to look over the situation, and upon his report the State Architect at once set about drawing plans for the new building.

The Department allowed us to purchase and erect a new silo, which was completed at harvest time.

The following appropriations are much needed, viz.:

Boy's dormitory .....	\$22,000 00
Vegetable cellar .....	800 00
For extending roof over coal pocket and installing a coal conveyer .....	2,200 00
Conduit and piping for the main conduit to the hos- pital and employees' cottage and relaying pipes to water main .....	2,000 00
Fitting up the basement of the school building for a gymnasium .....	500 00
Gas well .....	2,800 00
Repairs and equipment .....	2,000 00
New industrial building .....	22,000 00
For completing the corridor between dining-hall building and proposed new dormitory (Dormitory No. 3) .....	5,200 00
For completing the corridor between dormitory No. 3 and dormitory No. 4 .....	5,200 00
For constructing conduit and corridor between dormitory No. 4 and the proposed new industrial building, including the steam piping and electric feeder to industrial building .....	6,650 00
Maintenance .....	31,000 00

---

Our commencement exercises which were held on Friday evening, June 28th, were a credit to the institution, the pupils doing especially well. The assembly hall was crowded, many people who were not able to get in being on the stairs and in the entrance hall. Rev. Andrew J. Purdy, of Gowanda delivered a very inspiring and instructive address. The essay on Slavery in the United States, by Miss Julia Snow, the only graduate, showed thought and careful work. As Miss Snow was the only graduate the first of the Putnam prizes was awarded her and the second to Miss Virginia Williams.

Kathleen L. Carter, our trained nurse, organized at the first of the year a Training Class for Girls and to Miss Gertrude Jimer-son, who did the most efficient work, she awarded \$5 in gold as a

prize. Miss Virginia Williams, Miss Ethel Garlow and Miss Theresa Lay received honorable mention. Mrs. Carter introduced this new feature in connection with the school work with a view of giving these girls a few practical ideas of how to care for the sick in their own homes.

### SCHOLASTIC DEPARTMENT.

The school work has been progressing in a very creditable manner under the direction of Mr. John C. Brennan, Principal, and his staff of able assistants. In connection with the regular school work a gymnastic exercise has been instituted, which the children seem to enjoy very much and which cannot help but be of benefit to them.

Perhaps it would not be out of place to mention here what some of the former pupils have accomplished. Miss Flora B. Tallchief graduated from here in 1902 and entered the Geneseo Normal School a year after. She graduated from there in February of 1908, and immediately secured a position in one of the schools on this reservation at a salary of \$8 per week.

Miss Molly B. Jemison, who entered the Oswego Normal School in 1904, graduated from there last June. Before graduating she accepted a position in the Spring Valley High School at a salary of \$500 per year. Miss Jemison graduated from here in 1901, after which she had three years in Lima Seminary before entering the normal school. While in Lima she was graduated in vocal music and had a salaried position in one of the church choirs in Oswego nearly all the time she was at the normal school.

At present Miss Salina Maybee is attending Geneseo Normal School and Mr. Leroy Beeman is at the Fredonia Normal School. We also have four pupils preparing to enter normal schools. It seems to me as though the progress that these pupils have made cannot help but be an inspiration to the others.

Following is a list of the pupils enrolled in the several grades of the school, including the kindergarten:

#### *Eighth Grade.*

Julia Snow,  
Florence Thompson,

Minnie Charles,  
Geneva Thompson.

*Seventh Grade.*

Mitchel White,  
 Arthur Johnson,  
 Franklin Jamison,  
 Ethel Garlow,  
 Rachael King,  
 Lessie Beeman,  
 Emma Spring,

Rhoda Crouse,  
 Virginia Williams,  
 Laura Hill,  
 Theresa Lay,  
 Evelyn Snow,  
 Electa Doxtator,  
 Rhoda Blackchief.

Gertrude Pierce.

*Sixth Grade.*

Roy Moses,  
 Sherman Pierce,  
 Lindsay Jackson,  
 Reuben Williams,  
 John Conners,  
 Ora Halftown,  
 Frederick Thompson,  
 Anna Skye,  
 Nellie Logan,  
 Hazel Skye,

Lucy Doxtator,  
 Ruby Spring,  
 Rose Snow,  
 Ella Doxtator,  
 Mary Green,  
 Ethel Charles,  
 Gertrude Jimerson,  
 Grace Jamison,  
 Mabel Warrior,  
 Louisa Green,

*Fifth Grade.*

Joseph Conners,  
 John Deer,  
 Cleveland Johnnyjohn,  
 Archie Tallchief,  
 Oliver Thompson,  
 Alfred Twoguns,

Alta Doxtator,  
 Libbie Halftown,  
 Ella Hatch,  
 Ida Jake,  
 Marjorie Jamison,  
 Irene Parker,

Amy Peters.

*Fourth Grade.*

Evangeline Clark,  
 Elsie Doxtator,  
 Ellen Doxtator,  
 Nora Hill,  
 Clara Logan,  
 Gladys Logan,  
 Ina Luke,

Lawrence Cooper,  
 Francis Kettle,  
 Leroy Kettle,  
 Bert Moses,  
 Lawrence Moses,  
 Dudley Poodry,  
 John Powlas,

Nancy Patterson,  
Lena Seneca,  
Grace Warrior,

George Twoguns,  
Hattie Snyder,  
Elida Williams,

*Third Grade.*

Sophia Billy,  
Rena Button,  
Mamie Crouse,  
Elizabeth Johnson,  
Myrtle Miller,  
Alberta Parker,  
Louise Patterson,  
Orena Pierce,  
Lillian Pierce,  
Elizabeth Snow,

Ira Mitten,  
Sarah Tallchief,  
Lucy Thompson,  
Laura Williams,  
Lafayette Bullis,  
Philo Jackson,  
Wyman Jacobs,  
Harvey Johnson,  
David La Forte,  
Rutherford Lay.

*Second Grade.*

George Crouse,  
Clifford Halftown,  
Aaron Kettle,  
Chauncey Doctor,  
Lorenza Bullis,  
Emeline Luke  
Lena Parker,

Lydia Poodry,  
Hattie Snow,  
Louise Tallchief,  
Irene Williams,  
Bertha Green,  
Irene Doctor,  
Nettie Skye.

*First Grade.*

Adrian Clark,  
Elmer Jacobs,  
Richard Kettle,  
Newman La Forte,  
Emery Miller,  
Ernest Miller,  
Carl Printup,  
Nelson Twoguns,  
James Warrior,  
Elean Webster,  
Ulysses Johnson,

Dennis Button,  
Julia Elcha,  
Irene Carpenter,  
Mary Cornelius,  
Florence Patterson,  
Mina Patterson,  
Edna Rockwell,  
Elsie Spring,  
Lucina Spring,  
Malphena Thompson,  
Grace Wandle,

Avis Sundown.

*Kindergarten.*

Elsie Crouse,	Betsy Carpenter,
Ida Patterson,	Lydia Harris,
Irene Peckam,	Winifred Printup,
Charlotte Peckam,	Lillian Talchief,
Mildred Parker,	Gertrude Armstrong,
Flora Logan,	Richard Shanks,
Lottie May Bissell,	Percy White,
Geraldine Sundown,	Joseph Johnson,
Andrew Francis,	Stanley Eels,
Pearl Johnson,	Ora Patterson,
Bula Parker,	Barney Jacobs,
Flossie Kettle,	Jerriett Cooper,
Izora Parker,	Henry Rockwell,
Alberta Williams,	Jacob Bullis,
Delia Cornelius,	Renier Clark.

Regents examinations were held only in the month of June this year. Following is a list of the subjects tried and the names of those who passed.

*Spelling.*

Rhoda Crouse,	Franklin Jamison,
Rachael King,	Theresa Lay,
Gertrude Pierce,	Virginia Williams,
	Evelyn Snow.

*Elementary English.*

Ethel Garlow,	Virginia Williams.
---------------	--------------------

*Arithmetic.*

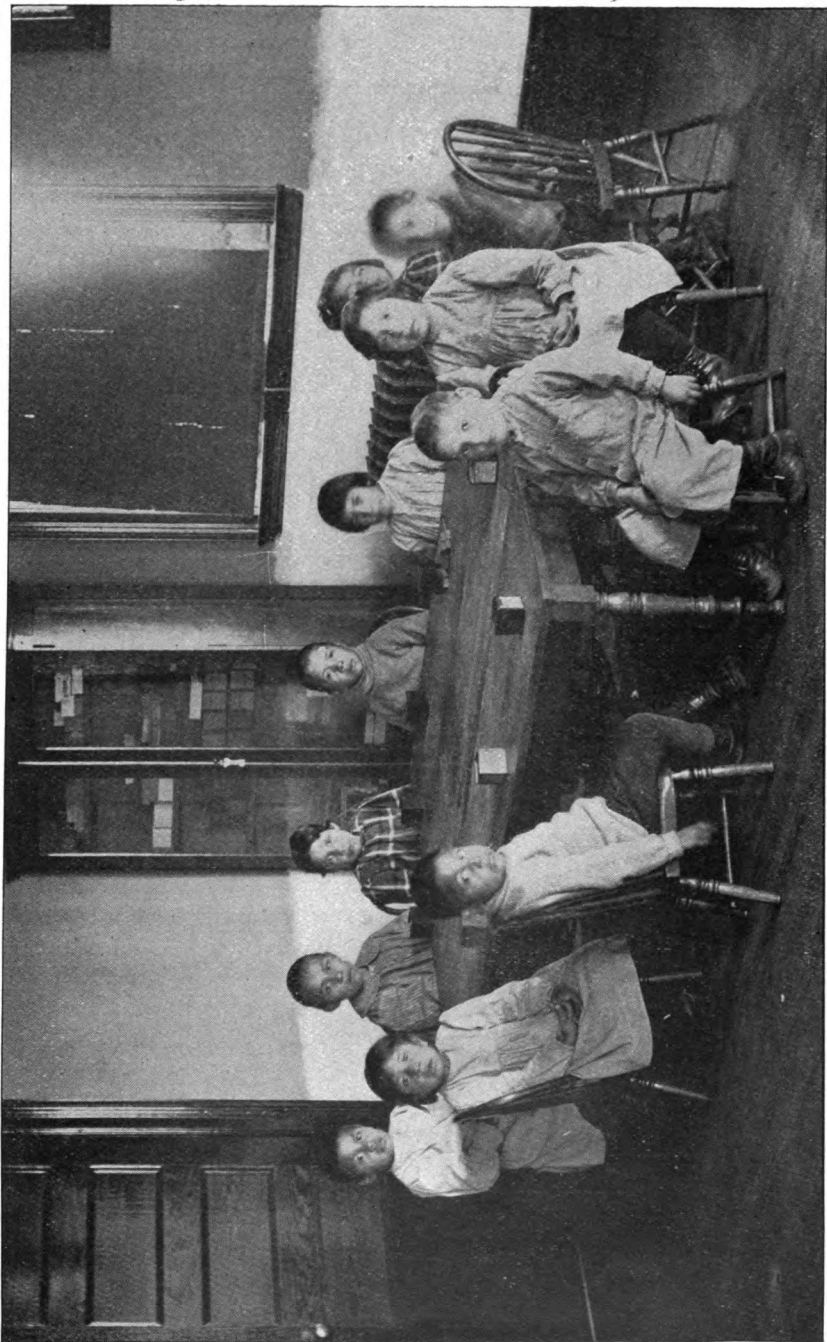

Julia Snow,	Geneva Thompson.
-------------	------------------

*Geography.*

Lessie Beeman,	Ethel Garlow,
Franklin Jamison,	Theresa Lay,
Evelyn Snow,	Virginia Williams.

*United States History and Civics.*

Minnie Charles,	Florence Thompson.
-----------------	--------------------

KINDERGARTEN CHILDREN.

## MUSIC.

These children take readily to music, consequently their advancement along this line is more rapid than in some branches of their education. Each of the pupils have received instruction in vocal music and the following have been given instruction on the piano and organ.

*Piano.*

Geneva Thompson,	Emma Spring,
Virginia Williams,	Grace Jamison,
Florence Thompson,	Hazel Skye,
Theresa Lay,	Anna Skye,
Minnie Charles,	Nellie Logan,
Evelyn Snow,	Rhoda Blackchief,
Laura Hill,	Marjorie Jamison,
Gertrude Pierce,	Lucy Doxtator,
Rachael King,	Lessie Beeman,
Gertrude Jimerson,	Ethel Garlow,
Electa Doxtator,	Rhoda Crouse.

*Organ.*

Ethel Charles,	Amy Peters,
Ruby Spring,	Gladys Logan,
Ella Hatch,	Ellen Doxtator,
Rose Snow,	Laura Williams,
Elida Williams,	Mamie Crouse,
Nancy Patterson,	Ida Jake,
Elsie Doxtator,	Lillian Pierce,
Ella Doxtator,	Evangeline Clark,
Mary Green,	Mabel Warrior,
Irene Parker,	Libbie Halftown,
	Ora Halftown.

## TRADE SCHOOL.

This branch of our school work under the instruction of Mr. A. F. Lorenz has been accomplishing excellent results, some of the boys taking naturally to it. The work has been so arranged for the past year that a certain number of boys have worked in this department every forenoon through the week and a certain

number in the afternoon. They have helped materially in the general repair work of the institution and in manufacturing new pieces of furniture, including some very useful pieces that are placed in the different buildings of the institution.

Several articles of furniture were entered at both the Erie county and Iroquois agricultural fairs. Our exhibit at Hamburg was entered to late for premiums, but the Buffalo papers mentioned it as being "an exceptionally fine exhibit." Nearly everything entered at the Iroquois agricultural fair received premiums.

Following is a list of the boys employed during the year :

John Deer,	Alfred Twoguns,
Oliver Thompson,	Cleveland Johnnyjohn,
Archie Tallchief,	Leroy Kettle,
Lawrence Cooper,	Bert Moses,
	Francis Kettle.

#### FARM AND GARDEN.

I consider this branch of our work a very important one for a great many of these Indian boys will undoubtedly make farming their occupation. This year our farm and garden have yielded us unusually large crops. Under the supervision of Mr. Carl Dankert, the boys have manifested an active interest and accomplished results which are most gratifying. The boys entered several products of the farm at the Iroquois agricultural fair, most of which received prizes.

The following gives the boys who have worked in this department during the past year :

Franklin Jamison,	Arthur Johnson,
Ora Halftown,	Lafayette Bullis,
Frederick Thompson,	Dudley Poody,
Alfred Twoguns,	Joe Conners,
John Conners,	Reuben Williams,
Mitchel White,	Ira Mitten,
Roy Moses,	Lindsay Jackson,
Harvey Johnson,	Francis Kettle.

## ACKNOWLEDGMENTS.

I wish to publicly express my thanks to each and every one who contributed toward making the Christmas season a happy and joyous one for these boys and girls. I can assure you that it was appreciated by them. You certainly would not have questioned it if you could have seen their happy faces on Christmas eve, as one by one their names were called to receive different gifts.

Mrs. Andrew John, an Indian woman living just below us, made them very happy on Christmas day by furnishing chickens enough for a chicken pie dinner. After all had enjoyed this treat, they extended to her a vote of thanks.

Thanks are also due Hon. Joseph Keppler for an annual subscription to Puck, Mr. H. J. Weisenheimer for several copies of the Buffalo Daily and Sunday Times, Mr. W. F. Fischer for enough valentines for all the children.

On account of the serious illness of Hon. Harvey J. Putnam, his check failed to reach us for the usual Putnam prizes. Our children had expected this and worked for it, so Miss Lilla C. Wheeler very generously came to our aid with the amount. To her I am most grateful.

We also extend our thanks to the management of the Erie county and Iroquois agricultural fair associations for their usual free admission and to you as a board for your loyal support, guidance and individual interest you have taken in the work. .

I extend to the officers, teachers and other employees my heartfelt appreciation of their earnest co-operation.

Respectfully submitted,

EMILY P. LINCOLN,

*Superintendent.*

## REPORT OF ATTENDING PHYSICIAN.

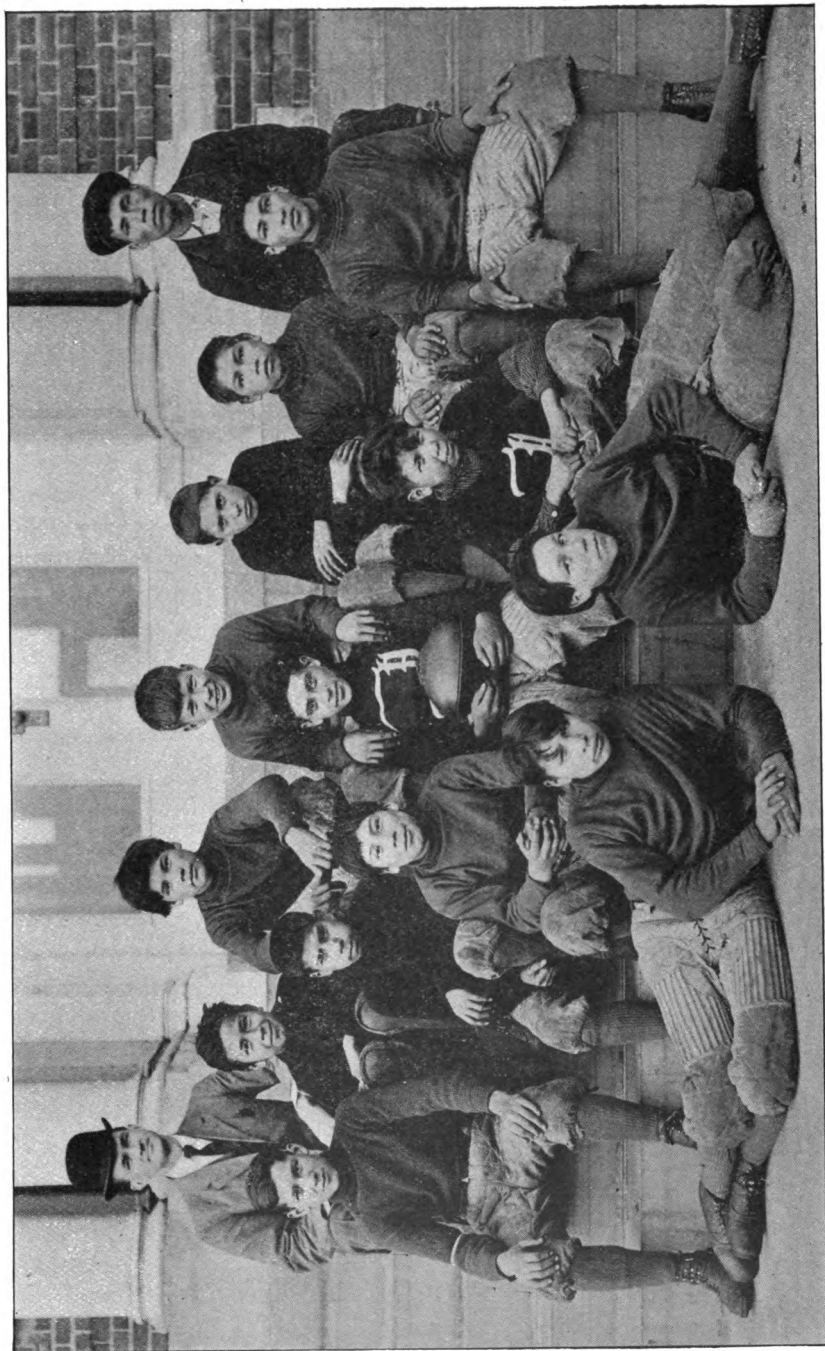

---

*To the Board of Managers of Thomas Indian School.*

I beg to submit, herewith, my report as attending physician, for the year ending September 30, 1908.

The following named diseases have been under treatment during the year:

Amenorrhœa . . . . .	5
Bronchitis . . . . .	10
Chickenpox . . . . .	10
Chlorosis . . . . .	5
Chorea . . . . .	1
Coleocystitis . . . . .	1
Colitis . . . . .	1
Conjunctivitis . . . . .	13
Contusion . . . . .	3
Eczema . . . . .	4
Enteritis . . . . .	1
Fracture . . . . .	1
Gastroduodenitis . . . . .	1
Gunshot wound . . . . .	1
Herpes . . . . .	1
Impetigo . . . . .	9
Inflammation middle ear . . . . .	2
Influenza . . . . .	43
Pneumonia . . . . .	2
Poison ivy . . . . .	1
Scabies . . . . .	11
Sprain . . . . .	2
Tonsilitis . . . . .	6
Tuberculosis of glands . . . . .	3
Tuberculosis of bones . . . . .	1
Tuberculosis of lungs . . . . .	2

IROQUOIS FOOT BALL TEAM OF 1908.

Tumor . . . . .	1
Ulcer of cornea . . . . .	3
Vaccinations . . . . .	35

---

---

No deaths have occurred during the year. The sanitary condition has been well maintained, although this has been difficult considering the necessary over-crowding of the dormitories, and from the fact that one building is old and dilapidated, with inadequate means of ventilation. It is most important, if the present number of pupils are to be kept here, that the additional building, so long projected, be speedily provided.

It is very satisfactory to note the constantly decreasing number of cases of tuberculosis, in all forms. The two cases of tuberculosis of the lungs, now under treatment, are incipient, with every indication of recovery. It is not to be forgotten, however, that the over-crowding of our dormitories may soon be followed by more cases of this disease.

Very respectfully,

(Signed) A. D. LAKE,

*Attending Physician.*
